Case study examples of the different ways in which carers' respite needs are currently met in Cheshire East

Service Type	Examples
Shared Lives - the service can offer customers long-term	A customer with a diagnosis of Dementia supported through Shared Lives day care which provides respite for his carer.
respite or day support either in their own home or within the Shared Lives carer's family home.	A customer who lives with his wife who is his main carer. He has a diagnosis of dementia, he struggles to understand some questions and give accurate answers due to his cognitive and memory impairment. The referral to Shared Lives was to match to a Shared Lives Carer who could encourage the customer to pursue his interests and give the clients wife respite away from her caring responsibilities. The Carers comments on the service she received: Feedback from the carer
	The carer reported that the service has given her the confidence to leave her husband with competent, experiences carers and allows her time to have respite.
	Two customers jointly supported through Shared Lives Day Care & flexible overnight stays.
	The customer has a diagnosis of advanced dementia. She lives with her daughter who has a learning disability. Both are supported by the son, who is he is the family's main carer. The son lives over 40 miles away and had resorted to staying most nights with his mother and sister, away from his own family home, to ensure their safety.
	Shared Lives has supported the family to remain together within the family home since 2005. During this time they have had the same team of Shared Lives Carers.
	The service has provided flexible day time support, as well as regular overnight respite (shared lives carer staying overnight in the clients home). This has allowed the main carer a break from his regular caring responsibilities. Feedback from the carer
	"The Shared Lives Service has helped to keep the family as a unit and remain in the family home together. The respite arrangements have been successful and I appreciate the sterling job the girls do".
