1.0 INTRODUCTION

- 1.1 Cheshire East Council ('the Council') have instructed Keppie Massie and WYG to assess the economic viability of new development in the Borough to inform decisions about the implementation of a Community Infrastructure Levy ("CIL") within the Borough.
- 1.2 This Report provides a brief summary of the Guidance in relation to the CIL and the key policies that are contained within the Local Plan Strategy. This Report then provides an analysis of developments within the Borough, before identifying the assumptions that have been made within the testing that has been undertaken. The results of the viability testing are then summarised together with our conclusions about the amount of development surplus and the implications of this for setting a CIL tariff in Cheshire East. The results of this assessment are then used to inform an appropriate Preliminary Draft Charging Schedule ("PDCS") for the Borough.

1.3 Community Infrastructure Levy

- 1.4 The CIL Regulations 2010 came into force on 6 April 2010, and have been subject to further Amendment Regulations (in 2011, 2012, 2013, 2014 & 2015). The most recent guidance in relation to CIL at the time of writing this Report was added to the Planning Practice Guidance ("PPG") on 16 November 2016.
- 1.5 The Community Infrastructure Levy (the levy) is a tool for local authorities in England and Wales to help deliver infrastructure to support the development of the area. Charging Authorities are able to set a charge payable on development which creates net additional floor space, where the gross internal area of new build exceeds 100 sq.m (subject to minimum requirements and exemptions), provided that the economic viability of development is not compromised.
- 1.6 The PPG at Paragraph 8 (Reference ID: 25-008-20140612) states that "Charging authorities should set a rate which does not threaten the ability to develop viably the sites and scale of development identified in the relevant Plan (the Local Plan in England)".

- 1.7 Furthermore the PPG within the same paragraph acknowledges that the relevant Charging Authority "will need to draw on the infrastructure planning evidence that underpins the development strategy for their area. Charging authorities should use that evidence to strike an appropriate balance between the desirability of funding infrastructure from the levy and the potential impact upon the economic viability of development across their area."
- 1.8 The PPG suggests that balance is at the heart of setting the levy and it will be for charging authorities to show and explain how their proposed levy rate (or rates) will contribute towards the implementation of their relevant plan and support development across their area.
- 1.9 A charging authority must use 'appropriate available evidence' to inform their draft charging schedule. The PPG recognises that the available data is unlikely to be fully comprehensive. However charging authorities need to demonstrate that their proposed levy rate or rates are informed by 'appropriate available' evidence and consistent with that evidence across their area as a whole.
- 1.10 There is no set term for the review of a Charging Schedule, however in order to fully capture changing economic circumstances, it is expected that a Charging Schedule would be under constant review. A change in the Charging Schedule does however require further public consultation and is subject to examination by an independent examiner. The legislation does allow for an annual inflationary increase in accordance with the national Tender Price Index of Construction Costs, which is published by the Building Cost Information Service (BCIS) of the Royal Institution of Chartered Surveyors (RICS).
- 1.11 The Charging Schedule set at the outset therefore needs to be sufficiently considered and robust to ensure that it remains relevant and appropriate to the Borough without the need for fundamental review. We have been mindful of this in our methodology and approach, albeit it is not possible to anticipate significant changes in the property market in future years, and inevitably periodic review of the tariff is likely to be necessary. It is therefore anticipated that, once the Charging Schedule is implemented, the property and construction market will need to be closely monitored.

1.12 Scope of the Report

- 1.13 This Report comprises a broad area based financial viability assessment that has been prepared to assess the levels of CIL that can be supported within Cheshire East. It is acknowledged that this report comprises an Initial Report that will need to be revised at Draft Charging Schedule stage. This may be as a result of modifications to Planning Policy or as a result of information that has been made available through stakeholder consultation. Regardless of the above, further testing will be required
- 1.14 Within this Viability Report three key assumptions have been made that underpin the testing that has been made. For completeness they are set out below:-
 - The testing that we have prepared reflects the policies that are contained within the Local Plan Strategy (Proposed Changes Final Version dated July 2016). The Council's Local Plan Strategy was submitted to the Secretary of State on 20th May 2014, and the version that we have used comprises the most recent version that was submitted to the Examiner as part of the reconvened hearing sessions that took place between 13 September 2016 and 21 October 2016. It is acknowledged that any modifications that are made by the Examiner will need to be addressed in subsequent testing. The Inspector has now published his interim views on the Main Modifications and further work necessary in order for it to be found sound. Consultation on the Main Modifications is anticipated to take place in early 2017.
 - The testing that we have prepared does not seek to specifically assess viability of the Strategic Sites contained within the emerging Local Plan Strategy. The viability of Strategic Sites will be assessed within subsequent viability testing that will be undertaken at a later date following consultation on the PDCS. The PPG at Paragraph 19 (Reference ID: 25-019-20140612) is clear that viability testing should "focus on strategic sites on which the relevant Plan relies and those sites (such as brownfield sites) where the impact of the levy is likely to be most significant." The same paragraph within the PPG states that:-

"In addition, a charging authority should directly sample an appropriate range of types of sites across its area, in order to supplement existing data. This will require support from local developers. The exercise should focus on strategic sites on which the relevant Plan (the Local Plan in England, Local Development Plan in Wales, and the London Plan in London) relies, and those sites where the impact of the levy on economic viability is likely to be most significant (such as brownfield sites)"

The PPG acknowledges that the viability testing of Strategic Sites will be dependent on support from local developers. Given the number of strategic sites contained within the Council's Local Plan Strategy it is imperative that the viability of an appropriate sample of Strategic Sites are tested to ensure that any proposed CIL charges can be supported. This point is acknowledged within this Report, and the viability of Strategic Sites will be considered within further testing at a later date. It is hoped that Local Developers and other Stakeholders will feed into this process through the relevant consultations and make available appropriate available evidence so that the viability of these sites can be considered in greater detail (improving the accuracy of the testing that we have undertaken).

• The testing that has been undertaken is based on high level BCIS costing data, with further allowances for additional professional fees, external works and contingencies. BCIS data comprises high level published costing data that provides aggregated build costs for different types of development. Notwithstanding this, it is recognised that there are a number of inherent weaknesses with BCIS. In the first instance, it is noted that the data is predominantly based on smaller developments. We also understand that a high proportion of returns are provided by Registered Providers also, and not large scale-market developers. Furthermore, the specification and types of developments that are considered are not known.

Whilst we have used BCIS data within this initial testing, it is recommended that at further viability testing is undertaken by costings that are provided by a suitably qualified Quantity Surveyor. This will ensure that the costings accord with the sizes of the development and account for the fact that development will typically be undertaken by house-builders (as opposed to Registered Providers), and we recognise that as a result this will provide a more accurate basis for assessing the viability of development within the Borough. Therefore, whilst BCIS costings have been adopted within this initial high level testing to provide the Council with initial advice concerning the levels of CIL that are appropriate, we consider that a more robust and accurate method of establishing the true cost of development can be established by seeking professional advice from an independent expert (and use this information to inform further viability testing and advice).

- 1.15 The Report has been prepared in an 'open book' format, and presents all of the information that we are able to disclose in a transparent manner. Where possible sales and costing information is provided, together with a relevant analysis of developments that are located throughout the Borough. In the event that we have relied on confidential data, this is clearly set out.
- 1.16 It is recognised within the PPG that a CIL Viability Assessment is evidence driven process. Within this Report we have sought to present the data in such a fashion that stakeholders (and in particular local developers) are able to assess how key decisions that have been made within the testing that we have prepared have been formulated. As detailed above, this Report has been prepared to identify a potential CIL charge. Should further evidence on matters such as sales revenues or construction costs be provided by stakeholders throughout the consultation, then this evidence will be considered alongside the existing evidence that has been presented within this Report. In the event that following consideration this additional evidence changes our views on the appropriateness of any of the inputs that have been adopted, further testing will need to be undertaken that incorporates these changes.
- 1.17 It is hoped that by providing details of the assumptions and workings at the outset, that this will enable stakeholders to feed into the process at the earliest possible time. This will hopefully facilitate the disclosure of information from stakeholders in a timely manner and ensure that the viability testing that is subsequently undertaken reflects the appropriate available evidence.

1.18 Format of Report

- 1.19 The report is presented to provide an overview of the Local Plan and its key policies, details of our methodology, a property market commentary, the results of our testing and conclusions regarding Plan viability and delivery.
- 1.20 For ease of reference the report is structured based on the following sections:

1.21 Section 2 - Planning Policy Context

Here we have provided an overview of the Local Plan Strategy together with an outline of the allocations and plan policies which impact on viability and delivery.

1.22 **Section 3 – Methodology**

In this section we outline the methodology that has been adopted within this Report to assess the level of CIL that could be supported.

1.23 Section 4 - Evidence

This section provides general information about the social and economic characteristics of Cheshire East, together with an overview of the residential and non-residential property markets.

1.24 Section 5 - Financial Appraisal Assumptions

This section outlines the key assumptions that we have made in preparing our financial assessments.

1.25 **Section 6 – Viability Results**

This section provides an overview of the results from the viability testing.

1.26 <u>Section 7 - Prospects for the Introduction of a Community Infrastructure</u> <u>Levy</u>

This section contains the conclusions regarding an appropriate Preliminary Draft Charging Schedule.

2.0 PLANNING POLICY CONTEXT

2.1 **Background**

- 2.2 The Council submitted the Local Plan Strategy to the Secretary of State for Communities and Local Government on 20th May 2014 in preparation for independent examination. The Examination began and was adjourned in the Autumn of 2014 so that the Council could undertake further work to address some initial concerns identified by the Inspector. Following the resumption of the examination, 'Resumed Hearing Sessions' took place in October 2015 and further 'Proposed Changes Hearing Sessions' took place in September and October 2016.
- 2.3 We understand that as of 16 December 2016 the Inspector has now published his interim views on the Main Modifications and further work necessary to the Proposed Changes (March 2016) version of the Plan in order for it to be capable of adoption.
- 2.4 For the purpose of this Report we have used the Local Plan Strategy (Proposed Changes Final Version dated July 2016) as an indicator of future policy within the Borough. At the time of writing this Report it is considered likely that the policies contained within this document will come into effect, but it is noted that any potential modifications to the Local Plan Strategy by the Inspector may result in changes needing to be made.

2.5 <u>Cheshire East Local Plan - Local Plan Strategy (Proposed Changes - Final Version dated July 2016)</u>

- 2.6 According to Section 1.26 the Local Plan Strategy is the spatial interpretation of that vision and sets out how the economy can continue to thrive by providing new land for development up to 2030, whilst minimising the impact on the natural environment.
- 2.7 Section 1.27 of the Local Plan Strategy details that its aim is to "deliver at least over 36,000 new homes by 2030 and around 31,000 jobs in the longer-term by 2030. These figures represent a pro-growth policy position that is forecast to see the Borough's population grow by around 58,100 people. Policies in this Plan will also make sure that the right mix of new homes is provided to meet the needs of a growing workforce and support both current and future employers. This is set within the demographic context that Cheshire East will have a 65% increase in over 65s and a 134% increase in over 85s the Plan period."

- 2.8 According to the Local Plan Strategy the policy principles underpinning the vision are to:
 - "Develop brownfield sites, where possible, to minimise the use of Greenfield, Green Gap, open countryside or Green Belt sites.
 - Ensure a town-centre first policy to support our main urban centres and deter out of town development.
 - Deliver new homes of the right quality, in the right location at the right price; providing access to low cost and affordable housing to support our growing economy.
 - Support new development with the right new infrastructure; our plan proposes at least eight miles of new roads and substantial upgrades to our overall transport network.
 - Focus new housing development in strategic locations through the creation of a new sustainable urban village and urban extensions, rather than a dispersed growth model that would undermine the well-defined character and strengths of our market towns and smaller villages."

2.9 **Planning for Growth Policies**

2.10 A number of polices within the Local Plan Strategy will guide the location and scale of new development in Cheshire East. We have provided a short summary of those most relevant to the study in the paragraphs that follow.

2.11 **PG1 – Overall Development Strategy**

2.12 This Policy details the quantity of land that will be released for development within the Borough. This policy identifies that 380 hectares of land will be released for business, general Industrial and storage and distribution uses over the period 2010 to 2030 to support the local economy alongside sufficient provision to support 36,000 dwellings.

2.13 **PG2 - Settlement Hierarchy**

2.14 This Policy details where development will be located within the Borough. Significant development will be encouraged within the Principal Towns (defined as Crewe and Macclesfield), whilst development of a "scale, location and nature that recognises and reinforces the distinctiveness of each individual town" will be supported within Key Service Centres (defined as Alsager, Congleton, Handforth, Knutsford, Middlewich, Nantwich, Poynton, Sandbach and Wilmslow).

2.15 The Policy states that small scale development will be permitted in Local Service Centres (Alderley Edge, Audlem, Bollington, Bunbury, Chelford, Disley, Goostrey, Haslington, Holmes Chapel, Mobberley, Prestbury, Shavington and Wrenbury) provided that they contribute to the creation and maintenance of sustainable communities. Development at a proportionate scale commensurate with the function and character of the settlement and confined to locations well related to the existing built up extent of the settlement will be permitted within other settlements and rural areas.

2.16 **PG3 - Green Belt**

2.17 This Policy states that planning permission will not be granted for inappropriate development except in very special circumstances in accordance with national policy. Details of exceptions are provided within this Policy in addition to details of sites that have been removed from Green Belt.

2.18 **PG 4 - Safeguarded Land**

2.19 This Policy identifies sites that are located between the existing urban area and the inner boundary of the Green Belt that may be required to meet longer-term development needs stretching well beyond the period of the Local Plan. Development that would prejudice the future comprehensive development of the Safeguarded Land is not permitted.

2.20 **PG4a - Strategic Green Gaps**

- 2.21 This Policy states that areas between the following settlements are defined as 'Strategic Green Gaps' that are provided to protect against long-term convalescence of settlements, protect the setting and separate identity of each location and to retain the existing settlement pattern. As a result of this, Policy PG5 Open Countryside (set out below) will apply to these areas:-
 - Willaston/Wistaton/Nantwich/Crewe
 - Willaston/Rope/Shavington/Crewe
 - Crewe/Shavington/Basford/Weston
 - Crewe/Haslington

2.22 **PG5 – Open Countryside**

2.23 This Policy defines 'Open Countryside' as comprising an "area outside of any settlement with a defined settlement boundary" and states that only development that is essential for the purposes of agriculture, forestry, outdoor recreation, public infrastructure, essential works undertaken by public service authorities or statutory undertakers, or for other uses appropriate to a rural area will be permitted. Exceptions include limited infill development, the re-use of existing rural buildings, replacement of an existing builds, development that is essential for the expansion of a business or for the conservation and enhancement of a heritage asset.

2.24 **PG6 – Spatial Distribution of Development**

2.25 This Policy sets out the expected delivery of development within each location. For completeness this is replicated below in Table 2.1 (which replicates Table 8.3 within the Local Plan Strategy):-

Settlement	Location	New H	lomes	Employm	ent Land	
Туре		Total	Annual	Total	Annual	
		2010-30	Average	2010-30	Average	
Principal	Crewe	7,700	385	65ha	3.25ha	
Towns	Macclesfield	4,250	213	20ha	1.00ha	
Key	Alsager	2,000	100	40ha	2.00ha	
Service	Congleton	4,150	208	24ha	1.20ha	
Centres	Handforth	2,200	110	22ha	0.75ha	
	(inc Growth Village)	2,200	110	22110	0.75114	
	Knutsford	950	48	15ha	0.75ha	
	Middlewich	1,950	98	75ha	3.75ha	
	Nantwich	2,050	103	3ha	0.15ha	
	Poynton	650	33	10ha	0.50ha	
	Sandbach	2,750	138	20ha	1.00ha	
	Wilmslow	900	45	10ha	0.50ha	
Other	Local Service Centres	3,500	175	7ha	0.35ha	
Settlements	Other Settlements and	2,950	148	69ha	3.45ha	
	Rural Areas	2,930	140	OFIIA	J. TJIId	

Table 2.1 – Spatial Distribution of Development in Cheshire East Source – Local Plan Strategy Table 8.3

2.26 **Enterprise and Growth Policies**

2.27 The Policies contained within the 'Enterprise and Growth' section of the Local Plan Strategy focus on the size and location of employment development. Summaries of the relevant policies contained within this section of the Local Plan are detailed below.

2.28 **Policy EG1 – Economic Prosperity**

- 2.29 This Policy states that employment development (use classes B1, B2 or B8) will be supported in principle within Principal Towns, Key Service Centres and Local Service Centres in addition to employment land allocations. Proposals for development on non-allocated sites will be supported where they are in the right location and support the strategy, role and function of the town.
- 2.30 Policies EG2 Rural Economy and Policy EG3 Existing and Allocated Employment Sites detail the form and location of employment that is suitable in Rural locations and detail the protection of existing employment sites (subject to prescriptive exceptions).

2.31 Policy EG5 – Promoting a Town Centre First Approach to Retail and Commerce

2.32 The above Policy states that the Principal Towns will be the main focus for high quality comparison retail, supported by a range of retail, service, leisure, tourism, office and other town centre-type uses including residential, whilst Key Service Centres will focus on the improvement and enhancement of the retail offer (and relevant diversification of uses). The Policy states that there will be a focus on convenience and comparison retail at an appropriate scale to meet the needs of the local community both within Local Service Centres and within other settlements and rural areas within the Borough.

2.33 **Stronger Communities**

2.34 There are a number of policies detailed within the 'Stronger Communities' section that could potentially impact the viability of residential development within the Borough. Each of the policies that could potentially impact the viability of development are detailed below.

2.35 **Policy SC1 – Leisure and Recreation**

2.36 This Policy seeks to ensure that "major residential developments contribute, through land assembly and/or financial contributions, to new or improved sports facilities where development will increase demand and/or there is a recognised shortage of local leisure, community and recreation facilities."

2.37 **Policy SC2 – Indoor and Outdoor Sports Facilities**

This Policy seeks to ensure that "major residential developments contribute, through land assembly and/or financial contributions, to new or improved sports facilities where development will increase demand and/or there is a recognised shortage in the locality that would be exacerbated by the increase in demand arising from the development."

2.38 **Policy SC4 – Residential Mix**

- 2.39 This Policy requires new residential development to maintain, provide or contribute to a mix of housing tenures, type and sizes to help support the creation of mixed, balanced and inclusive communities. Furthermore the Policy states that to meet the needs of the Borough's older residents, the Council will require developers to demonstrate how their proposals will be capable of meeting and adapting to the needs of this specific group of people which may include a provision of a variety of dwelling types and other measures to support health and wellbeing and independent living.
- 2.40 In addition the Policy states that development proposals for accommodation designed specifically for elderly and people who require specialist accommodation will be supported where there is a proven need provided that such developments are located within settlements that are accessible by public transport and are located within proximity to local amenities.

2.41 **Policy SC5 - Affordable Homes**

- 2.42 The Policy states that in respect of residential developments affordable housing will be provided as follows:
 - i. In developments of 15 or more dwellings (or 0.4 hectares) in the Principal Towns and Key Service Centres at least 30% of all units are to be affordable;
 - ii. In developments of 11 or more dwellings (or have a maximum combined gross floorspace of more than 1,000 sq.m) in Local Service Centres and all other locations at least 30% of all units are to be affordable;
 - iii. In future, where Cheshire East Council evidence, such as housing needs studies or housing market assessments, indicate a change in the Borough's housing need the above thresholds and percentage requirements may be varied:

2.43 **Sustainable Environment**

2.44 This section of the Local Plan Strategy sets out policies to ensure that development will protect and enhance Cheshire East's built and natural environment and will make sustainable use of resources.

2.45 **Policy SE1 - Design**

- 2.46 This Policy states that development proposals should make a positive contribution to their surroundings in terms of the sense of place, managing design quality, sustainable urban, architectural and landscape design, liveability/workability and designing in safety. A summary of this policy is contained below at Table 2.2 below.
- 2.47 Alongside this Policy, we have also had regard to the Council's Residential Design Guide SPDs which were prepared in January 2016 and provide additional guidance on the specific application of this Policy.

Item	Policy
Sense of Place	Ensuring design solutions achieve a sense of place by protecting and enhancing
	the quality, distinctiveness and character of settlements.
	Ensuring sensitivity of design in proximity to designated and local heritage
	assets and their settings.
	Ensuring that places are designed around the needs and comfort of people and
	not vehicles, so that layout, street design and parking is in accordance with the
	principles set out in Policy CO1 and Manual for Streets.
	Ensuring that proposals are underpinned by character and design assessment
	commensurate with the scale and complexity of the development.
	Encouraging innovative and creative design solutions that are appropriate to the
	local context.
	Ensuring a high quality public realm that enhances conditions for pedestrians and
	cyclists and creates opportunities for social interaction.
Managing	Ensuring for larger scale and more complex developments that design proposals
Design	have positively responded to the Design Review process.
Quality	Ensuring for major developments that Masterplanning and Design Coding forms
	an integral part of the design process.
	Ensuring that housing developments achieve Building for Life 12 (or as updated)
	standard.
	Encouraging sustainable construction practices including the use of appropriate
	recycled and sustainable materials of high quality.
Sustainable	Encouraging the introduction of passive environmental design principles and
Urban,	climate change adaptation features in the orientation of buildings and spaces and
Architectural	detailed design.
and	Encouraging sustainable modes of travel through appropriate design.
Landscape	Reducing energy and water usage through appropriate design.
Design	Encouraging the use of renewable/low carbon energy technology, as appropriate.
	Encouraging the use of green infrastructure.
Liveability/	Ensuring appropriate level of privacy for new and existing residential properties.
Workability	Ensuring appropriate external storage.
	Ensuring a high quality internal and external working environment
	commensurate with the type and nature of business, particularly for new build
	development or conversions to office space.
	Ensuring appropriate provision for waste storage allowing for its sustainable
	management.
	Ensuring appropriate access for the mobility impaired or partially sighted.
Designing in	Ensuring high levels of passive surveillance of streets, spaces and parking
Safety	including appropriate lighting.
	Incorporating Secured by Design principles, provided that these are adequately
	incorporating becared by besign principles, provided that these are adequately
	balanced against other design considerations and do not undermine the quality

Table 2.2 – Design Policies as Detailed within Policy SE1 of the Local Plan Strategy

2.48 Policy SE2 - Efficient Use of Land

2.49 This Policy states that the Council will encourage the redevelopment/re-use of previously developed land and buildings unless it can be clearly demonstrated that either the landscape amenity or biodiversity value of the site is of sufficiently high value that it would be compromised through the redevelopment of the site.

2.50 **Policy SE6 – Green Infrastructure**

- 2.51 This Policy sets out a prescriptive set of policies that together aim to provide good quality and accessible networks of green spaces for people to enjoy. This includes:-
 - 1. Linking the various assets of Cheshire East's unique landscape.
 - 2. Safeguarding Green Infrastructure.
 - 3. Working with partners to support the potential of Strategic Green Infrastructure Assets to contribute to the mains of wider green infrastructure.
 - 4. Strengthening the contribution that sport and playing fields, open space and recreation facilities make to Cheshire East's Green Infrastructure network by amongst other measures providing adequate open space. The amount of open space required is set out below at Table 2.3.

Unit	Children's	Amenity	Allotments	Outdoor	Green
	Play Space			Sports	Infrastructure
				Facilities	Connectivity
Quantity	0.8ha	0.8ha	0.2ha	Developer	0.8ha
(per 1,000				Contribution	
population)					
Quantity	20 sq.m	20 sq.m	5 sq.m	Developer	20 sq.m
(per family home)				Contribution	

Table 2.3 – Open Space Standards

2.52 **Policy SE9 - Energy Efficient Development**

- 2.53 The above Policy states that the Council will look favourably upon development that follows the principles of the Energy Hierarchy, and seeks to achieve a high rating under schemes such as BREEAM (for non-residential development), CEEQUAL (for public-realm development) and Building for Life. Other key policies to note include:-
 - An expectation that non-residential development of over 1,000 sq.m will be expected to secure at least 10% of its predicted energy requirements from decentralised and renewable or low carbon sources (unless it can be demonstrated that for this type of development is not feasible or not viable).
 - In those areas defined as comprising 'District Heating Network Priority Areas' or within large scale development (of over 100 dwellings or 10,000 sq.m gross floor space) to install a site wide district heating network (unless it can be demonstrated that for this type of development is not feasible or not viable).

2.54 Policy SE13 - Flood Risk and Water Management

2.55 This Policy states that developments must integrate measures for sustainable water management to reduce floor risk, avoid an adverse impact on water quality and quantity within the Borough and provide opportunities to enhance biodiversity, health and recreation, in line with national guidance. According to this policy this should be achieved through the provision of a Flood Risk Assessment if the development is at risk of flooding and by seeking improvements to the current surface water drainage network (through SuDs or Green Infrastructure), demonstrating that there is sufficient infrastructure in place to service the development and incorporates water efficiency measures.

2.56 **Incorporation of Policy into Testing**

2.57 Table 2.4 below provides details as to how the planning policies detailed above need to be addressed when assessing the viability of development.

Planning Policy	Implications for Testing					
PG1 – Overall Development	Policies PG1 to PG6 identify where development will be located					
Strategy	within the Borough. The generic testing typologies that will be					
PG2 – Settlement Hierarchy	tested within this Report will therefore need to account for the					
PG3 – Green Belt	size and character of development within all parts of the					
PG 4 - Safeguarded Land	development were development is likely. As detailed above, this					
PG5 – Open Countryside	will need to be supplemented by site specific viability					
PG6 – Spatial Distribution of	assessments for each larger strategic allocation.					
Development						
Policy EG1 – Economic Prosperity	These two policies provide the location of employment					
Policy EG5 – Promoting a Town	development within the Borough. The testing will therefore need					
Centre First Approach to Retail	to comply with these policies concerning the form and character					
and Commerce	of potential commercial forms of development in the Borough.					
Policy SC1 - Leisure and	The development costs will need to be sufficient to allow for the					
Recreation	provision of Public Open Space in accordance with the above.					
Policy SC2 – Indoor and Outdoor	Where not provided, the S106 contributions that are assumed					
Sports Facilities	will need to be sufficient to meet the potential offsite					
	requirements.					
Policy SC4 – Residential Mix	The testing typologies tested will need to accord with the					
	requirements of this Policy.					
Policy SC5 - Affordable Homes	The testing will need to account for the Council's Affordable					
	Housing Policies at a Policy Compliant Position.					
Policy SE1 – Design	The development costs will need to be sufficient to incorporate					
Policy SE2 – Efficient Use of Land	each of the policies that are listed within SE1 to SE13.					
Policy SE6 - Green Infrastructure						
Policy SE9 - Energy Efficient						
Development						
Policy SE13 - Flood Risk and						
Water Management						

Table 2.4 - Planning Policy Obligations and Integration into Viability Testing

3.0 METHODOLOGY

- 3.1 To arrive at fully informed conclusions regarding the viability of development in Cheshire East we have prepared in the first instance an appropriate evidence base that is robust, legible and fully supported by facts. We have undertaken research into the variables, both cost and revenue, that a developer would consider in financially appraising any development scheme. We have then utilised an industry recognised appraisal tool and method to test the viability of each of the development scenarios having regard to the current planning policy framework.
- 3.2 In deciding the most appropriate forms of development to test, we have had regard to existing developments within the Borough and to the likely forms of future development. This has involved analysing both historic planning permissions, and also reviewing future development sites identified within the Local Plan Strategy. We have also had regard to the SHLAA 2012.

3.3 Appraisal Methodology

3.4 In preparing our viability assessments we have adopted the Residual Approach. This is where the value of the completed development is assessed and the cost of undertaking the development (including the cost of land, finance and planning obligations) is deducted, along with a target developer's profit return. The residual sum that is left, if positive, represents a surplus that is available to be paid as CIL. Consideration of this then allows an informed decision to be made about the viability of development in general and in particular the prospects of the introduction of a CIL tariff. Table 3.1 below provides a simple diagram illustrating this approach:

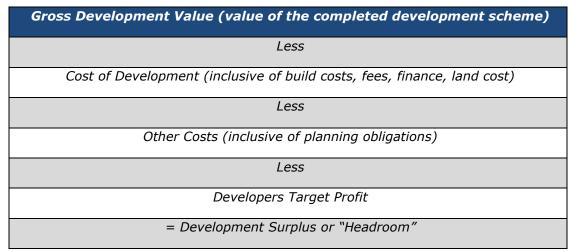

Table 3.1 - Residual Appraisal Approach

- 3.5 This methodology is recognised and supported by the Royal Institution of Chartered Surveyors (RICS) in relation to the valuation of development land. The RICS Guidance Note 'Financial Viability in Planning' defines viability for planning purposes as (paragraph 2.1.1): 'an objective financial viability test of the ability of a development project to meet its costs including the cost of planning obligations, whilst ensuring an appropriate site value for the land owner and a market risk adjusted return to the developer in delivering that project'.
- 3.6 The guidance note defines site value as follows (paragraph 2.3.1): 'site value should equate to the market value subject to the following assumption; that the value has regard to development plan policies and all other material planning considerations and disregards that which is contrary to the development plan.'
- 3.7 When undertaking area wide viability testing, the guidance suggests that a second assumption needs to be applied to this definition, namely (paragraph 2.3.3): 'Site value may need to be further adjusted to reflect the emerging Policy/CIL charging level. The level of the adjustment assumes that site delivery would not be prejudiced.'
- 3.8 We have assessed Market Value in accordance with VPS4 1.2 and IVS Framework paragraph 29. Under these provisions, the term 'Market Value' is defined as 'the estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm's-length transaction after proper marketing where the parties had each acted knowledgeably, prudently and without compulsion.'
- 3.9 In preparing our residual appraisals, it has been necessary to make certain assumptions, both in relation to the form of development and also the variables adopted in each of the appraisals based upon a significant quantity of data.
- 3.10 Inevitably, given the diverse character of the property market in Cheshire East, the data does not necessarily fit all eventualities and every development site will be unique. It has therefore been necessary to draw upon our development experience and use our professional knowledge to derive a data set that best fits the typical characteristics of development in the area and can be considered reasonable.

¹ RICS Guidance Note 'Financial Viability in Planning' (RICS, 2013)

- 3.11 It should be noted that when adopting the Residual Approach, the end result is extremely sensitive to even the smallest of changes in any of the assumptions which feed into the appraisal process. We are satisfied however that our approach and the assumptions that we have made are appropriate to the property market characteristics within Cheshire East and represent the most reasonable approach given the appropriate available evidence at the time of preparing this study.
- 3.12 We have also considered the Evidence Base work undertaken for the Local Plan, which has included the SHLAA (2012)², SHMA (2013 Update)³, Employment Land Review (undertaken by Arup and dated 2012)⁴, Housing Development Study (2015)⁵, Alignment of Employment, Economy and Housing Strategy (2015)⁶, Spatial Distribution Update Report (2015)⁷ and the Cheshire Retail Study Update (undertaken by WYG and dated May 2016)⁸.

3.13 **Residential Development Scenarios**

3.14 Sites and Typologies for Testing

- 3.15 The Local Plan Strategy identifies the following hierarchy and development distribution for future housing development in the Borough (as detailed within Table 2.1 above).
 - Crewe 7,700
 - Macclesfield 4,250
 - Alsager 2,000
 - Congleton 4,150
 - Handforth (inc Growth Village) 2,200
 - Knutsford 950
 - Middlewich 1,950
 - Nantwich 2,050
 - Poynton 650
 - Sandbach 2,750
 - Wilmslow 900
 - Local Service Centres 3,500
 - Other Rural Settlements 2,950

² Cheshire East Strategic Housing Land Availability Assessment (2012, Cheshire East Council)

³ Cheshire East Strategic Housing Market Assessment (2013, Arc4)

⁴ Cheshire East Employment Land Review (2012, Arup)

⁵ Cheshire East Housing Development Study (2015, Opinion Research Services)

⁶ Alignment of Economic, Employment & Housing Strategy (2015, Ekosgen)

⁷ Spatial Distribution Update Report (2015, AECOM)

⁸ Cheshire East Retail Study (2015, WYG)

- 3.16 The Local Plan Strategy proposes to allocate the following sites. These sites form a component part of the total allocations detailed within each settlement detailed above.
 - Basford East, Crewe 850 dwellings (CS1)
 - Basford West, Crewe 370 dwellings (CS2)
 - Leighton West, Crewe 850 dwellings (CS3)
 - Leighton, Crewe 500 dwellings (CS38)
 - Crewe Green, Crewe 150 dwellings (CS4)
 - Sydney Road, Crewe 525 dwellings (CS5)
 - Cheshire South Growth Village, Crewe 650 dwellings (CS37)
 - Shavington/Wybunbury Triangle 400 dwellings (CS6)
 - East Shavington 275 dwellings (CS7)
 - Broughton Road 175 dwellings (CS39)
 - South Macclesfield Development Area 1,050 dwellings (CS8)
 - Land East of Fence Avenue, Macclesfield 250 dwellings (CS9)
 - Land at Congleton Road, Macclesfield 300 dwellings (CS10)
 - Land south of Chelford Road, Macclesfield 200 dwellings (CS40)
 - Gaw End Lane, Macclesfield 300 dwellings (CS11)
 - Land between Chelford Road and Whirley Road, Macclesfield 150 dwellings (CS41)
 - White Moss Quarry, Alsager 350 dwellings (CS42)
 - Twyfords and Cardway, Alsager 550 dwellings (CS12)
 - Former Manchester Metropolitan University Campus, Alsager 400 dwellings (CS13)
 - Back Lane/Radnor Park, Congleton 750 dwellings (CS44)
 - Giantswood Lane South, Congleton 150 dwellings (CS16)
 - Giantswood Lane to Manchester Road, Congleton 500 dwellings (CS46)
 - Manchester Road to Macclesfield Road, Congleton 450 dwellings (CS17)
 - Tall Ash Farm, Congleton 225 dwellings (CS47)
 - North of Lamberts Lane, Congleton 225 dwellings (CS48)
 - North Cheshire Growth Village, Handforth 1,500 dwellings (CS30)
 - Land Between Clay Lane and Sagars Road, Handforth 250 dwellings (CS49)
 - North West Knutsford 500 dwellings (CS18)
 - Parkgate Extension, Knutsford 200 dwellings (CS19)
 - Land South of Longridge 225 dwellings (CS50)
 - Glebe Farm, Middlewich 525 dwellings (CS20)
 - Brooks Lane, Middlewich 200 dwellings (SL9)
 - Land off Warmingham Lane West (Phase 2) 235 dwellings (CS55)
 - Kingsley Fields, Nantwich 1,100 dwellings (CS21)
 - Snow Hill, Nantwich Unspecified (CS23)

- Land Adjacent to Hazelbadge Road, Poynton 150 dwellings (CS57)
- Land at Sprink Farm, Poynton 150 dwellings (CS58)
- Land south of Chester Road, Poynton 150 dwellings (CS59)
- Land adjacent to J17 of M6, south east of Congleton Road, Sandbach 450 dwellings (CS24)
- Royal London including land west of Alderley Road, Wilmslow 175 dwellings (CS26)
- Land at Little Stanneylands, Wilmslow 200 dwellings (CS61)
- Heathfield Farm (allocation), Wilmslow 150 dwellings (CS62)
- Alderley Park Opportunity Site, Alderley Edge 200-300 dwellings (CS29)
- 3.17 The Strategic Sites outlined above comprise sites that have estimated capacities of between 150 and 1,100 dwellings. The Strategic Sites detailed above are typically larger than those sites that have been identified within the SHLAA.
- 3.18 Having regard to this, and noting that Strategic Sites will be tested separately within future testing we propose to test the following development typologies that are reflective of the size and scope of the sites that will be developed over the plan period (to 2030). For the purpose of this Report we have tested schemes of up to 1,000 dwellings, although it is noted that further testing will be required to test a number of the larger Strategic Sites that are identified within the Local Plan Strategy.

Reference	Number of Dwellings	Sites Tested
1	5	Brownfield and Greenfield
2	10	Brownfield and Greenfield
3	25	Brownfield and Greenfield
4	50	Brownfield and Greenfield
5	75	Brownfield and Greenfield
6	150	Brownfield and Greenfield
7	250	Brownfield and Greenfield
8	500	Brownfield and Greenfield
9	1000	Greenfield

Table 3.2 - Residual Appraisal Approach

3.19 In addition to the above it is noted that standalone apartment development could be developed. In order to assess the financial viability of apartment developments, we propose to test schemes of 15 and 50 apartments.

- 3.20 Having regard to the sites that are contained within the SHLAA, we have tested sites with capacity to provide between 5 and 500 dwellings on Brownfield sites, and between 5 and 1,000 dwellings on Greenfield sites.
- 3.21 In order to formulate testing typologies, we have had regard to a number of developments that are currently being developed within the Borough. For completeness, a copy of the analysis that we have prepared is contained at Tables 3.3 and 3.4 below.
- 3.22 We have adopted dwelling sizes based on the average size of the dwellings that have been provided within the current developments. For completeness this is set out below at Table 3.5.

Dwelling Size	2 Bed	3 Bed	4 Bed	5 Bed
Sq.ft	750	900	1,300	1,950
Sq.m	70	84	121	181

Table 3.5 - Adopted Dwelling Sizes

- 3.23 Having regard to the schemes that we have analysed below, it is noted that there are differences in terms of the types of dwellings that have been developed on Brownfield and Greenfield sites. Developments on Brownfield sites have tended to provide denser developments that include higher proportions of smaller dwellings, whilst conversely the development of Greenfield sites has tended to focus on the delivery of larger dwellings at lower densities, which is evident within the analysis at Table 3.3 below (and within the analyses of these types of schemes within the paragraphs below).
- 3.24 For Brownfield development typologies we have assessed the composition of schemes that have been delivered at the Bombardier Factory in Crewe (Countryside), Brooklands in Holmes Chapel (Bellway), Jersey Fields in Middlewich (Stuart Milne Homes) and Astbury Place and Brook Valley in Congleton (Morris Homes and Bovis Homes). All of the developments on the former Fodens factory in Elworth have also been included within this analysis. The proposed mix is detailed below at Table 3.6. Developments that we have specifically excluded from this analysis include St Anne's Court and Stapeley Gardens in Nantwich (by Jones Homes and David Wilson Homes) which provided a more executive type of mix or were more akin to Greenfield form of development (being built on a former Garden Centre site in a rural location). The only other Brownfield site that was excluded from this analysis comprised Bellway's Waterhouse Mill development in Bollington that provided a more executive offer that it was considered was not reflective of the likely form of development across the wider Borough.

3.25 For Greenfield development typologies we have assessed the composition of schemes that have been developed at the Saxon Gate, Vicarage Fields, Chatsworth Park and Stoneley Park developments around Crewe and the surrounding areas of Haslington and Shavington (by Bloor Homes, Taylor Wimpey, Wainhomes and Elan Homes respectively), the Oak Close development (by Taylor Wimpey) in Nantwich, the Jubilee Pastures and Oak Meadow developments in Middlewich (by Persimmon Homes and Bellway respectively), the Loachbrook Meadow development in Congleton (by Bovis Homes) and both the Limeacre, Paddocks and Coppice developments in Alsager (by Seddon Homes, Stuart Milne Homes and Miller Homes respectively). We have also considered Kingfisher Park in Somerford (Bloor Homes). The proposed mix is detailed below at Table 3.6 (alongside the Brownfield Mix that has been adopted within the testing that has been undertaken).

Area	Developer		Number of Bedrooms						Number of Bedrooms (%)

Table 3.4 – Average Dwelling Sizes and Scheme Characteristics

Scheme	Mix	2 Bed	3 Bed	4 Bed	5 Bed	
Brownfield	Average Mix					
Mix	(from above developments)	28%	37%	33%	2%	
(36 dph)	Proposed Mix	30%	40%	30%	0%	
Greenfield	Average Mix	100/	2201	420/	00/	
Mix	(from above developments)	18%	32%	42%	8%	
(30 dph)	Proposed Mix	15%	30%	45%	10%	

Table 3.6 – Adopted Dwelling Mixes

- 3.26 We have adopted densities of 36 dwellings per hectare in respect of Brownfield sites and 30 dwelling per hectare in respect of Greenfield sites. This conforms with the average densities that are provided in respect of the Greenfield developments that have been assessed (which equates to an average density of 30 dph), and is slightly lower than the average density (at 44 dph) provided in respect of the Brownfield sites that we have assessed. We have adopted a lower density as we consider that Countryside's development of the Bombardier Factory ('The Carriages') has been built at a higher density than we would normally expect to be provided within the Borough (due to the fact that apartments were provided as part of this development).
- 3.27 Both of the Greenfield and Brownfield development mixes provide built floorspace at a rate of around 3,240 sq.m per hectare (14,100 sq.ft per acre). This is slightly below the average of the developments considered above at around 3,228 sq.m per hectare (14,060 sq.ft per acre).
- 3.28 Within the testing that we have prepared we have adopted gross to net ratios that accord with the methodology employed within the SHLAA. This is considered reasonable when compared to the gross to net ratios identified above within the analysis contained at Table 3.4.

Total Site Area	Net Developable Area
0.4 ha to 0.9 ha	90% of developable area
1.0 ha to 9.9 ha	80% of developable area
10 ha to 19.9 ha	75% of developable area
Over 20 ha	70% of the developable area

Table 3.7 - Assumed Net Developable Area used when Calculating Housing Yield

3.29 **Non-Residential Uses**

- 3.30 In preparing the non-residential development typologies to be tested, we have had regard to recent planning applications and discussed the forms of development that are likely to come forward during the Local Plan period with the Council. We have also considered the likely location of this future development, together with its size, form and specification.
- 3.31 Table 3.12 below contains a summary of the non-residential developments that have been tested as part of the viability assessment.
- 3.32 In relation to the non-residential developments, we have had regard to parking requirements, circulation space and the provision of landscaping to arrive at typical forms of development for testing. In addition based on both our and WYG's experience we have analysed typical development footprints in comparison with site areas to form a view as to the ratio of built footprint compared to site area. We have assumed site coverage of 50% in respect of industrial accommodation and 25% for office accommodation (albeit the offices tested are 2no storey). The plot sizes for retail and leisure accommodation are based on the Council's car parking requirements.
- 3.33 For the non-residential developments we have summarised the development scenarios, built areas and also the assumed site area for the development in Table 3.8.

Development Type	Built Area	Built Area	Land Area
	(sq.m)	(sq.ft)	(sq.m)
Industrial B2	465	5,000	929
Industrial B2	1,858	20,000	3,716
Industrial B2/B8	4,645	50,000	9,290
Industrial B2/B8	9,290	100,000	18,580
Industrial B2/B8	27,870	300,000	55,740
Offices	465	5,000	929
Offices	1,857	20,000	3,716
Retail	279	3,000	611
Retail	929	10,000	2,097
Retail	2,787	30,000	6,112
Food & Drink	557	6,000	1,799
Hotel (50 Bed)	155	1,672	310

Table 3.8 - Summary of Non-Residential Development Tested and Site Areas

4.0 EVIDENCE

4.1 **Key Characteristics**

- 4.2 Cheshire East forms the easterly portion of the County of Cheshire. The Borough is bordered by Cheshire West to the west (which forms the westerly portion of Cheshire) and Warrington (also in Cheshire) to the North West. The Greater Manchester Authorities of Trafford, Manchester and Stockport border Cheshire East to the North, whilst more rural local authorities border Cheshire East to the east. This includes High Peak (in Derbyshire), Staffordshire Moorlands (in Staffordshire), Newcastle-Under-Lyme (in Staffordshire) and Shropshire to the South.
- 4.3 The Borough includes the principal towns of Crewe and Macclesfield which comprise the main commercial, retail and cultural centres within the Borough. In addition to the above, Cheshire East includes a number of smaller towns that are defined within the Local Plan Strategy as comprising 'Key Service Centres'. This includes the settlements of Alsager, Congleton, Handforth, Knutsford, Middlewich, Nantwich, Poynton, Sandbach and Wilmslow.
- 4.4 The Borough benefits from strong transport connectivity both to the Manchester Conurbation to the North and to Stoke and the wider Potteries are to the South. The M6 motorway bisects the Borough, and Crewe serves as a major rail transport hub that provides services to London and Glasgow (via the West coast Mainline Railway) and to the North West cities of Chester (and North Wales), Liverpool and Manchester. Wilmslow and Macclesfield Stations also provide high speed connections into both Manchester and London.
- 4.5 Crewe is the largest town within the Borough with a population of 73,500⁹. The town is a major employment centre with a diversified base in education manufacturing, services and distribution, and major employers include Bentley Motors, Mornflake, Leighton Hospital and Manchester Metropolitan University. As detailed above Crewe forms one of the largest transport interchanges in the North West, which will only rise in significance if the proposed High Speed 2 railway link is completed.

⁹ 2013 Mid-Year Population Estimates Published by the Office of National Statistics (ONS, 2013) – Please note that all subsequent references to population estimates derive from this data source

- 4.6 Crewe developed throughout the Victorian era following the advent of the expanding railway network and the formation of the associated railway works. The town therefore developed around heavy industry. Following the decline of these industries, Crewe has a higher unemployment rate than the Borough average and residents have the lowest average incomes in Cheshire East.
- 4.7 Macclesfield with a population of around 52,600 comprises the second largest town within the Borough. Macclesfield developed around the silk and textiles industries, which took advantage of the town's location on the River Bollin. Key industries presently operating in the Town include pharmaceuticals, plastics, architectural and engineering services, advertising and market research. In addition to the above as a result of the high-speed railway link a number of residents within Macclesfield commute into central Manchester.
- 4.8 The Key Service Centres identified below range significantly in terms of size, location and economic fortune. A brief description of each of these areas is provided below:-
 - Alsager has a population of 11,800. The settlement grew up around the armaments factory at Radway Green, and has strong commuter links to Stoke-on-Trent and the wider Potteries Urban Area.
 - Congleton comprises the largest Key Service Centre with a population of 26,700.
 The town grew up around the textile industry, although at present the town specialises in light industry and acts as a commuter settlement to Manchester, Macclesfield and Stoke-on-Trent.
 - Handforth has a population of 6,600 and comprises the smallest of the Key Service Centres identified within the Local Plan and developed through the creation of two overspill housing estates to re-house inhabitants from Central Manchester. The town principally comprises a commuter settlement for nearby Stockport and Manchester, although the area does benefit from its location within close proximity to Wilmslow.
 - Knutsford has a population of 13,200, and grew up throughout the 18th and 19th century and comprises an affluent centre partly as a result of the attractiveness of the heritage assets. Knutsford does contain employment accommodation at the Parkgate and Longridge Trading Estates, although a significant number of residents commute to nearby urban areas.

- Middlewich comprises a market town, and has a population of around 13,700. The
 town grew up around the salt industry although today the town has benefitted
 from the creation of the Midpoint 18 Industrial Estate and specialises to some
 degree in logistics and distribution as a result of the town's proximity to the M6.
- Nantwich comprises a historic town of around 18,200 inhabitants. The town contains a high proportion of Elizabethan buildings in the town centre, and operates as a market town supporting the town's extensive rural hinterlands.
- Whilst Poynton grew up as a mining village, the town essentially comprises an
 affluent commuter location on the fringes of Stockport. The town has a population
 of 13,800 and acts as a local centre.
- Sandbach has a population of 18,200 and again comprises a market town that is similar in size to Nantwich (above). Economically the town expanded around truck manufacturing, but since its closure in 2002 the largest employer in the town is now the Council.
- Wilmslow comprises one of the largest Key Service Centres and has a population
 of 24,200. The town benefits from good road, rail and airport connectivity, and
 comprises one of South Manchester's most affluent suburbs. The town has a
 number of suburban office parks, although there are significant commuter flows
 into Manchester and the surrounding areas (and also to the airport).

4.9 **Property Market Overview**

4.10 Residential Market

4.11 Cheshire East is one of the highest value local authority areas in the North West. According to Land Registry the average dwelling sold for £209,358 in October 2016, which is higher than the North West average of £148,586, but below the UK average of £216,674 as a result of higher property prices in London and the South East.

- 4.12 The average sales value in Cheshire East is higher than the average prices that have been achieved within the majority of neighbouring local authorities (based on average sales prices reported by Land Registry for October 2016). This includes Cheshire West (£191,766), Warrington (£176,579), Manchester (£155,972) Stockport (£203,776), High Peak (£180,863), Staffordshire Moorlands (£158,453), Newcastle-Under-Lyme (£144,588) and Shropshire (£200,367). The only neighbouring local authority with a higher average dwelling price is Trafford (£256,894) which contains higher value areas such as Altrincham, Hale and Hale Barns.
- 4.13 Whilst the average house price in Cheshire East is higher than the majority of neighbouring local authorities, sales prices in the Borough vary significantly between locations. This is illustrated below at Table 4.1 which shows the average sales prices for each of the Principal Towns and Key Service Centres.

Local Plan Designation	Location	Average House Price (last 12 months)
Principal Town	Crewe	£135,862
	Macclesfield	£206,934
Key Service Centre	Alsager	£195,739
	Congleton	£190,037
	Handforth	£221,742
	Knutsford	£396,643
	Middlewich	£167,505
	Nantwich	£222,417
	Poynton	£294,715
	Sandbach	£213,711
	Wilmslow	£413,403

Table 4.1 – Average Sales Prices over the last 12 Months (Rightmove via Land Registry)

Local Plan	Location	Average House Price
Designation		(last 12 months)
	Alderley Edge	£605,267
	Audlem	£341,628
	Bollington	£237,054
	Bunbury	£493,738
	Chelford	£352,967
	Disley	£305,516
Local Service Centres	Goostrey	£331,711
	Haslington	£195,222
	Holmes Chapel	£251,972
	Mobberley	£441,030
	Prestbury	£684,733
	Shavington	£195,213
	Wrenbury	£346,155

Table 4.1 – Average Sales Prices over the last 12 Months (Rightmove via Land Registry – as at January 2017)

4.14 Average House Prices therefore within the different settlements outlined above range between £135,862 in Crewe and £413,403 in Wilmslow. Having regard to this data, higher value areas include the Key Service Centres of Knutsford, Poynton and Wilmslow, in addition to Local Service Centres including Alderley Edge, Audlem, Bunbury, Chelford, Disley, Goostrey, Mobberley, Prestbury and Wrenbury. Average house prices within all of the above locations exceed £280,000, and typically comprise settlements with good transport links into Manchester, or semi-rural villages. Lower value locations with average property values of below £175,000 include Crewe and Middlewich.

4.15 **New Housing Developments**

4.16 The data contained in the preceding paragraphs is helpful to an understanding of relative house prices in Cheshire East. It does however relate principally to re-sales of properties and hence will reflect the stock and condition of properties within each area. To fully inform the study we need to understand the prices that are likely to be achieved for the sale of newly constructed dwellings. Therefore the best evidence of house prices for the purpose of the study comes from sales of new dwellings that have recently taken place in the Borough.

- 4.17 Over the last few years as some confidence has returned to the housing market a number of new housing developments have commenced in the Borough. Some of these developments are now complete and all houses have been sold, whilst others are part way through development and some have only just started.
- 4.18 To inform our study evidence base we have undertaken an analysis of sales prices (taken from Land Registry) for these newly built housing developments in Cheshire East. Appendix 1 contains an overview of the research that we have undertaken in relation to the sales and current asking prices for dwellings on these various developments.
- 4.19 Table 4.4 contains a summary analysis of each of the newly built developments we have considered in preparing our evidence base. All of the evidence considered comprises sales data from 2015 onwards.

Scheme	Settlement	Developer	Ave Price (per sq.ft)	Sales Assessed	Comments
Principal Towns					
The Carriages	Crewe	Countryside	£145	18 sales	Bombardier in Crewe. Brownfield development of 143 dwellings. Inner urban lower value location in Western Crewe. Dense development focusing on the provision of smaller 2 and 3 bed dwelling types.
College Green	Crewe	Redrow Homes	£193	35 sales	Dane Bank Avenue, Crewe. Brownfield infill site in south western Crewe in a suburban location. Comprised mixture of 50no 2, 3 and 4 bed dwellings.
Saxon Gate	Crewe	Bloor Homes	£198	39 sales	Parkers Road, Crewe. Greenfield development on the northern periphery of Crewe in Leighton. Development of 126 dwellings. Mainly 4 bed detached.
The Rookery	Crewe	Taylor Wimpey	£201	16 sales	Basford West, Crewe. Greenfield development immediately to the south of Crewe. Development comprises 40no 2, 3 and 4 bed dwellings.
Stoneley Park/Manor	Crewe	Taylor Wimpey	£199	22 sales	Stoneley Road, Crewe. Greenfield development immediately to the north of Crewe. Development of 215no 2, 3, 4 and 5 bed dwellings.
Meadow View	Crewe	David Wilson Homes	£190	20 sales	Maw Green Road, Crewe. Greenfield development immediately to the north west of Crewe. Development of 165no 2, 3 and 4 bed dwellings.
Mulberry Park	Macclesfield	Redrow	£269	25 sales	Manchester Road, Macclesfield. Infill Greenfield development of 94no 2, 3, 4 and 5 bed dwellings. Development also incorporates 1 and 2 bed apartments also. Scheme towards the north of Macclesfield in Tytherington.
Kingsfield Park	Macclesfield	Jones Homes	£268	8 sales	Springwood Way, Macclesfield. Infill Greenfield development of 172no dwellings towards the north of Tytherington in Macclesfield. Located between Business Park and A523.

Table 4.4 - Summary of New Housing Developments and Sale Prices in Cheshire East

Key Service Centres					
The Paddocks	Alsager	Stuart Milne Homes	£244	9 sales	Close Lane, Alsager. Greenfield development of 74no 3, 4 and 5 bed dwellings towards the north west of Alsager.
Limeacre	Alsager	Seddon Homes	£245	12 sales	Close Lane, Alsager. Greenfield development of 23no 3, 4 and 5 bed dwellings towards the north west of Alsager.
The Coppice	Alsager	Miller Homes	£222	21 sales	Crewe Road, Alsager. Greenfield development of 65no 2, 3, 4 and 5 bed dwellings. Includes provision of 1 and 2 bed apartment dwellings.
Astbury Place	Congleton	Morris Homes	£227	18 sales	Brook Lane, Congleton. Brownfield development of 54 dwellings (Phase 1). Comprised the development of 2, 3, 4 and 5 dwellings.
Vicarage Gardens	Congleton	Pembroke Homes	£195	7 sales	Buxton Old Road, Congleton. Brownfield infill development of 7no 3 and 4 bed dwellings. Located towards the east of Congleton within a suburban location.
Brook Valley	Congleton	Bovis Homes	£165	19 sales	Brookhouse Lane, Congleton. Brownfield development of 126no 2, 3, 4 and 5 bed dwellings towards the east of Congleton.
Loachbrook Meadow	Congleton	Bovis Homes	£239	21 sales	Sandbach Road, Congleton. Greenfield development of 186no dwellings towards the west of Congleton. Includes 2, 3, 4 and 5 bed dwellings.
Jubilee Pastures	Middlewich	Persimmon Homes	£192	18 sales	Jubilee Pastures, Middlewich. Greenfield infill on the south western edge of Middlewich. Predominantly focuses on the provision of 3 bed dwellings. Development will provide 83 dwellings.
Oak Meadow	Middlewich	Bellway Homes	£196	10 sales	Warmingham Lane, Middlewich. Greenfield development on the southern edge of Middlewich. Development will provide 149no 2, 3 and 4 bed dwellings.
Abbey Fields	Middlewich	Jones Homes	£247	18 sales	Nantwich Road, Middlewich Development on a large garden (so assumed Greenfield) towards the north of Middlewich. Development extends to 24 dwellings, which comprise 2, 3 and 4 bed units.

Table 4.4 - Summary of New Housing Developments and Sale Prices in Cheshire East

Scheme	Settlement	Developer	Ave Price (per sq.ft)	Sales Assessed	Comments
Jersey Fields	Middlewich	Stuart Milne Homes	£205	11 sales	Dexter Way, Middlewich. Brownfield development towards the North of Middlewich. Development extends to 83no dwellings, which are made up of 2, 3 and 4 bed dwellings.
St Anne's Court	Nantwich	Jones Homes	£230	8 sales	St Anne's Lane, Nantwich. Urban infill development of 2, 3 and 4 bed mews dwellings close to Nantwich Town Centre. Total of 24no dwellings provided.
Stapley Gardens	Nantwich	David Wilson Homes	£247	24 sales	London Road, Nantwich. Part Brownfield development of a former Garden Centre premises to the south east of Nantwich. Development of 146 1,2,3,4 and 5 bed dwellings. Larger detached units market housing. Smaller affordable.
Malbank Waters	Nantwich	Bovis/Barratt Homes	£240	31 sales	Queens Drive, Nantwich Development of 134no 3, 4 and 5 bed dwellings on a Greenfield site towards the south west of Nantwich. Urban extension.
Elworth Gardens	Sandbach	Barratt Homes	£208	23 sales	Moss Lane, Elworth. Brownfield development of c.190no 2, 3, 4 and 5 bed dwellings. Development located towards the west of Sandbach in Elworth.
Gilberts Cross	Sandbach	David Wilson Homes	£207	20 sales	Moss Lane, Elworth. Brownfield development of 36no 2, 3, 4 and 5 bed dwellings. Development located towards the west of Sandbach in Elworth.
Elsworth Park	Sandbach	Persimmon Homes	£199	29 sales	Moss Lane, Elworth. Brownfield development of 120no dwellings. Includes provision of apartments alongside 3 and 4 bed dwellings. Towards west of Sandbach within Elsworth area (so close to the railway station).
Saxon Lea	Sandbach	Bovis Homes	£237	21 sales	Hind Heath Road, Sandbach. Greenfield urban extension to the south of Sandbach. Development on completion will provide 234no dwellings.
Bramley Wood	Sandbach	Taylor Wimpey/Seddon Homes	£246	5 sales	Congleton Road, Sandbach. Greenfield development to the east of Sandbach. Development on completion will provide 160no dwellings.

Table 4.4 - Summary of New Housing Developments and Sale Prices in Cheshire East

Scheme	Settlement	Developer	Ave Price (per sq.ft)	Sales Assessed	Comments
Local Service Centres					
Greenlines Walk	Alderley Edge	PH Homes	£357	6 sales	Chorley Hall Lane, Alderley Edge. Small bespoke development of 7no dwellings on the plot of a former detached dwelling (Brownfield infill development).
Waterhouse Mill	Bollington	Bellway	£246	40 sales	Wellington Road, Bollington. Brownfield development of 91no dwellings. Comprises the development of 3 and 4 bed dwellings. Plot to the north east of Bollington.
Water's Edge	Disley	Persimmon Homes	£257	34 sales	Redhouse Lane, Disley. Brownfield development of 39no dwellings towards the east of Disley. Provision of 2, 3 and 4 bed dwellings.
Brooklands	Holmes Chapel	Bellway Homes	£242	33 sales	Marsh Lane, Holmes Chapel. Brownfield development of 224no dwellings. Predominantly 3 and 4 bed dwellings.
Vicarage Fields	Haslington	Elan Homes	£221	14 sales	Vicarage Road, Haslington. Greenfield development of 44 dwellings to the north west of Haslington. Mainly 4 bed detached dwellings (aside from affordable).
Chatsworth Park	Shavington	Wainhomes	£226	15 sales	Rope Lane, Crewe. Greenfield development of 63no 3, 4 and 5 bed dwellings towards the north of Shavington (to the south of Crewe).
Bollin Park	Wilmslow	David Wilson Homes	£408	11 sales	Adlington Road, Wilmslow. Development of 97 mainly 4 and 5 Bed Detached Dwellings. Affordable dwellings comprise 2/3 Bed Mews. Enclosed Greenfield Site on eastern edge of Wilmslow.
Bollin Park	Wilmslow	Jones Homes	£380	3 sales	Adlington Road, Wilmslow. Development of 106 mainly 4 Bed Detached Dwellings. Affordable dwellings comprise 3 Bed Dwellings. Enclosed Greenfield Site on eastern edge of Wilmslow.

Table 4.4 - Summary of asking prices for Recently Commenced Residential Developments in Cheshire East

Scheme	Settlement	Developer	Ave Price (per sq.ft)	Status	Comments
Other Settlements					
Oak Close	Aston	McAteer Associates	£217	18 sales	Shepenhall Lane, Aston. Greenfield development of 43 dwellings in Aston to the south west of Nantwich. Mainly detached 4 bed dwellings.
Kingfisher Park	Somerford	Bloor Homes	£246	13 sales	Holmes Chapel Road, Somerford. Greenfield development of 25 dwellings in Somerford, which is between Congleton and Holmes Chapel.

Table 4.4 - Summary of asking prices for Recently Commenced Residential Developments in Cheshire East

- 4.20 In certain locations within the Borough there have been relatively few new build schemes, or within certain areas there are a number of new build developments that are under construction with prices released, although there are no reported sales to date on Land Registry. This includes the following developments:-
 - Bloor Homes are currently developing 39no 1, 2, 3, 4 and 5 bed dwellings off New Platt Lane in Goostrey. The site is currently being marketed as 'the Woodlands'. Whilst no sales have been published on Land Registry, asking prices range between £2,896 and £3,552 per sq.m (£269 and £330 per sq.ft).
 - Redrow are currently developing 76no dwellings at their Abbeyfields site off Middlewich Road in Sandbach. Whilst no sales have been published on Land Registry, asking prices for the Oxford and Henley dwelling types are at between £2,616 and £2,627 per sq.m (£243 and £244 per sq.ft). This suggests that the pricing level is similar to Taylor Wimpey's Bramley Wood site nearby in western Sandbach, were prices of £2,646 per sq.m (£246 per sq.ft) have been achieved.
 - Taylor Wimpey are currently developing around 371no 1, 2, 3 and 4 bed dwellings on the former Albion Chemical Works (off Booth Lane) in Moston to the North West of Sandbach. Asking prices range between £2,217 and £2,422 per sq.m (£206 and £225 per sq.ft). No sales to date have been reported on Land Registry. This suggests that values in this semi-rural location (despite being developed on a Brownfield site) are higher than the developments in nearby Elworth, but below those in Sandbach (at c£2,585 per sq.m or £240 per sq.ft).
 - Morris Homes have recently released sales prices and opened a sales office at their The Cross development at Mill Pool Way in Sandbach. The development comprises 39no 3 and 4 bed dwellings, and asking prices amount to around £2,691 per sq.m (£250 per sq.ft). This suggests that the pricing level is similar to Taylor Wimpey's Bramley Wood site nearby in western Sandbach, were prices of £2,646 per sq.m (£246 per sq.ft) have been achieved.
 - Taylor Wimpey is currently developing their Willowbrook Grange site off Jack Mills Way in Shavington. Whilst no sales prices have been reported on Land Registry at the time of writing this Report, sales prices have been released and the 370 unit development is currently being built out. Asking prices for 2 storey dwellings range from between £2,217 and £2,325 per sq.m (£206 and £216 per sq.ft). This suggests that the asking prices are below the sales prices that have been achieved at Wainhomes' Chatworth Park development which is located nearby (at £2,433 per sq.m or £226 per sq.ft)

4.21 Commercial Market Commentary

4.22 **Overview**

- 4.23 According to the Office of National Statistics the UK Economy grew by 0.5% in Q3 2016 (between July and September) in the immediate aftermath of the UK electorate's decision to leave the EU following the Referendum Vote on 23 June 2016¹⁰. Whilst this is slower than the growth observed in Q2 2016 at 0.7%, this is an improvement relative to Q1 2016 at 0.3%.
- 4.24 The UK economy has exceeded most analysts' predictions following the Referendum Decision, as many commentators predicted that the UK would enter into an immediate recession. Indeed, the OECD (as of September 2016) has forecast growth at 1.8% for the UK economy which is higher than the remainder of the G7 economies. Notwithstanding this until such time as the terms of the UK's withdrawal from the EU are known it is difficult to predict the impact on the UK economy (which is particularly dependent on the UK's continued access to the common market), and the OECD is more pessimistic about growth in 2017. The OECD predicts that the UK economy will grow by 1% in 2017, which is lower than that of all of the other G7 nations with the exception of Italy and Japan.
- 4.25 The Office for Budget Responsibility remain more optimistic about the UK Economy, and within their 'Economic and fiscal outlook November 2016' paper¹². Whilst this paper has revised the growth forecast downwards from 2.2% to 1.4%, the predicted rate of growth is above the OECD equivalent figure on a like for like basis.
- 4.26 There are concerns that inflation may increase as a result of the devaluation of Sterling following the UK's decision to withdraw from the EU, which has been compounded by the decision of the Bank of England to reduce interest rates. Whilst this may immediately impact the UK economy, it is considered likely that a number of investors will adopt a wait and see approach before committing to longer term projects to assess what the immediate outlook for the UK economy is likely to be. A degree of inertia, in addition to existing uncertainty could further harm the prospects of growth in the immediate future.

https://www.ons.gov.uk/economy/grossdomesticproductgdp/bulletins/grossdomesticproductpreliminaryestimate/aprtojune2016 (ONS, 2016)

¹⁰

¹¹ https://www.oecd.org/eco/outlook/OECD-Interim-Economic-Outlook-September-2016-handout.pdf (OECD, 2016)

¹² https://www.oecd.org/eco/outlook/OECD-Interim-Economic-Outlook-September-2016-handout.pdf (OBR, 2016)

- 4.27 Whilst in the immediate aftermath of the Referendum decision a number of Commercial Property funds (operated by Standard Life, Aviva, Henderson Global Investors and M&G) restricted withdrawals following investor's decisions to try to withdraw their exposure to commercial property markets in the UK (that are particularly geared towards London and the South East), following recent economic performance such restrictions appear to have been lifted and the consensus view appears to be that the impact of Brexit will be determined over a longer-term period as opposed to an immediate shock as many commentators predicted.
- 4.28 There is a degree of concern as to whether there will be 'hard Brexit' which may restrict the UK's ability to trade openly with the EU and that could restrict the ability of London to continue to operate as the preeminent financial hub within Europe. Notwithstanding this the terms of the UK's withdrawal will only become known once the UK formally triggers Article 50 of the Lisbon Treaty and formally seeks to negotiate the terms of its withdrawal with the remaining EU member states.
- 4.29 The fortunes of the North West economy are more insulated relative to London and the South East, and the North West specialises more in manufacturing (relative to London and the South East which is heavily geared towards financial services industries). On a regional basis the NatWest bank within their 'Regional Growth Tracker' state that the North West economy is growing at a faster rate relative to the UK national average at around 2.5% per annum (as at September 2016)¹³.
- 4.30 According to CoStar¹⁴ the recent economic recovery has seen development levels and capital values recover to pre-recession levels observed in 2007, albeit this has been tempered somewhat by the potential impacts of Brexit and concern as to whether this reported growth is now slowing. The recent economic recovery has impacted different forms of commercial property in different ways, with some sectors appearing to recover more quickly than others.

¹⁴ CoStar Q3 Investment Bulletin (CoStar, 2016)

4.31 Cheshire East Characteristics

- 4.32 The northern portion of Cheshire East including the Manchester commuter settlements of Macclesfield (including Prestbury and Bollington), Wilmslow (including Alderley Edge), Knutsford and Poynton are amongst some of the most affluent locations in the North West (and indeed the UK outside of London and the South East). Whilst a significant number of residents within these locations commute into Manchester to work, a number of these locations contain key economic functions within their own right.
- 4.33 Wilmslow, Knutsford and to a lesser extent Poynton are principally commuter settlements, but each settlement retains a high-end retail and leisure offer that is geared towards the affluent local populations. Whilst Macclesfield does benefit from strong connectivity into Central Manchester, Macclesfield as a Principal Town is a service centre within its own right and contains a number of key employers that are of regional importance including AstraZeneca (in addition to retail and service functions).
- 4.34 The southern part of the Borough does not benefit from the same level of accessibility into the Greater Manchester Conurbation, and as a result the settlements within these locations are more self-sufficient with jobs located within reasonable distances from the residential areas contained therein. For example, Crewe and Middlewich in particular contain high concentrations of engineering and distribution facilities. Key employers within Crewe include Bentley Motors, Bombardier and AO/Tesco Direct, whilst the Midpoint 18 Industrial Estate contains distribution facilities operated by B&M Bargains, Kuehne & Nagel UK Limited and the Wincanton Group.
- 4.35 In addition to the above there are a number of settlements within the Borough that have re-orientated their employment bases following the closure of key industries. Both Sandbach and Congleton comprise market towns that formerly specialised in manufacture. Sandbach grew up around truck manufacture, but we understand that the Fodens plant ceased operations in 2002 and the Council (whose headquarters are located within the town) are now the largest local employer. Congleton developed as a centre for textile production, but more recently (aside from acting as a commuter settlement to Manchester, Stoke and Macclesfield) is geared towards light industry and manufacture (including the production of vehicle airbags amongst other products).
- 4.36 Alongside the above a number of settlements particularly towards the south of the Borough comprise market towns that service their respective rural hinterlands. This includes settlements such as Nantwich, which serves as a key service centre for the affluent villages located principally to the south and west of the town.

4.37 *Offices*

- 4.38 Manchester and to a lesser extent Liverpool dominate the supply of office accommodation in the North West. Prime rents in Manchester now exceed £345 per sq.m (£32 per sq.ft), which is significantly higher than other North West Centres including Liverpool at £226 per sq.m (£21 per sq.ft). 15
- 4.39 According to CoStar there is 627,228 sq.m (6,751,651 sq.ft) of office accommodation in Cheshire East. The distribution of accommodation is evenly spread throughout the major settlements within the Borough according to CoStar, and vacancy rates have reduced from around 12% in 2010 to around 5.5% at present.
- 4.40 The CoStar figures listed above include Council occupied buildings, together with former social club premises and schools, and therefore to some degree the analysis contained above is deceptive and overstates the amount of accommodation that would appeal to businesses with modern business requirements. This also impacts the average rental levels, capital values and yield levels that are reported on CoStar (which stand at around £140 per sq.m (£12.93 per sq.ft), £1,572 per sq.m (£146 per sq.ft) and at 9.6% respectively. These values are lower than we would expect for newbuild modern premises.
- 4.41 Modern office accommodation has recently let in Wilmslow from asking rents of £190 per sq.m (£17.50 per sq.ft) according to CoStar. This is evident within recent lettings within Emerson Developments' Bollin House and Kings Court where units of between 294 sq.m and 1,697 sq.m (3,168 sq.ft and 18,266 sq.ft) have let. We understand that similar modern accommodation in Wilmslow has let off the same asking rents (at £190 per sq.m (£17.50 per sq.ft)) at 40 Water Lane and at Layfield House. Details of all these transactions are contained at Appendix 2 of this Report.
- Outside of Wilmslow according to CoStar data rental levels appear to be uniformly lower across the Borough with the potential exception of Knutsford were a single letting at Booths Park 1 would suggest that rental levels are similar to those in Wilmslow (particularly given this comprised a letting of Grade B accommodation). Rental levels throughout the remainder of the Borough typically range between £129 and £183 per sq.m (£12.00 and £17.00 per sq.ft) depending on the location, size, specification and character of the accommodation. In certain circumstances this range has been exceeded (in respect of the letting at Westmere Drive in Crewe off a headline rent of around £205 per sq.ft (£19 per sq.ft) although this accommodation at 159 sq.m (1,711 sq.ft) comprises relatively small accommodation.

¹⁵ The Big Nine Quarterly Review of Regional Office Markets Q3 2016 (GVA, 2016)

In respect of capital values, we understand that modern industrial units in Cheshire East have sold at prices of between £1,550 per and £1,959 per sq.m (£144 and £182 per sq.ft), which reflect net initial yields of between 8.3% and 9.1%. Whilst we are aware of some anomalous sales including that of a unit at Morston House at Princes Court off Beam Heath Way in Nantwich for £300,000 equating to a purchase price of £667 per sq.m (£62 per sq.ft), the transactions listed above (comprising the investment freehold purchases of 1 Macclesfield Road in Wilmslow, The Box at Brooke Court in Wilmslow and Unit 1 at the Alvaston Business Park in Nantwich) provide a degree of conformity and reflect typical yield levels for new office accommodation throughout the North West.

4.44 *Industrial*

- 4.45 The main employment locations in the Borough include Midpoint 18 (in Middlewich), Weston Road Industrial Estate (including Orion Park, both in Crewe), Hurdsfield Industrial Estate (Macclesfield), Stanley Green Industrial Estate (Handforth), Radway Green (Alsager), Elworth/Springvale Industrial Estate (Sandbach) and Radnor Park/Viking Way/Eaton Bank Trading Estate (Congleton) and Parkgate Industrial Estate (Knutsford).
- 4.46 New build industrial accommodation has typically let at rents of between £43 and £65 per sq.m (£4 and £6 per sq.ft) throughout the Borough, depending on the size, specification and location of the units. Smaller units have tended to let at higher rents, although due to the popularity of larger distribution accommodation this gap has closed significantly over the past 3 years. This is clearly evident within the lettings of Crossflow 360 at Weston Road and MW180 at Midpoint 18 which are 14,562 sq.m (156,750 sq.ft) and 17,232 sq.m (185,487 sq.ft) respectively and let at rents of £55 per sq.m (£5.13 per sq.ft) and £48 per sq.m (£4.50 per sq.ft).
- 4.47 Whilst there are notable anomalies such as the letting of Units C0F at Moston Road in Sandbach which extends to 334 sq.m (3,600 sq.ft) and let from an asking rent that equated to £22.50 per sq.m (£2.08 per sq.ft), all of the other lettings save as to trade counter premises have let within this band.
- 4.48 Details of recent lettings are provided at Appendix 3 of this Report.
- 4.49 There have been relatively few industrial investment transactions within the Borough. Notwithstanding this we are aware of a number of freehold transactions that have taken place at values of between £215 and £861 per sq.m (£20 and £80 per sq.ft) depending on the age, size, condition and location of the premises.

4.50 *Retail*

4.51 <u>Supermarket Accommodation</u>

4.52 In respect of convenience retail supermarket accommodation typically lets at rental levels of between £130 per sq.m (£12 per sq.ft) and £215 per sq.m (£20 per sq.ft), which is dependent on the type of operator, location, catchment and competition. Rental levels have decreased in recent years from the upper end of the range identified above to around £162 per sq.m (£15 per sq.ft) as the larger supermarket operators have seen reduced footfall and profitability as a result of increased competition from budget retailers such as Aldi and Lidl and online retailing. This is evidenced within the lettings that are detailed below at Table 4.6 below.

Unit	Tenant	Rent	Area	Terms	Date
Manchester	Asda	£640,000 pa	4,207 sq.m	New 25 year	Aug 2014
Road,		(£152 psm or	(45,285 sq.ft)	lease.	
Stockport		£14.10 psf)		Existing	
				Unit.	
Heywood	Aldi	£160,000 pa	1,428 sq.m	New build	April 2014
Way,		(£112 psm or	(15,376 sq.ft)	Unit. 20	
Salford		£10.41 psf)		Year Lease.	
Tarvin	Aldi	£485,000 pa	3,547 sq.m	New build	Sept 2013
Bridge,		(£137 psm or	(38,178 sq.ft)	Unit. 20	
Chester		£12.70 psf)		Year Lease.	
				5 yearly	
				upward only	
				RR at 2.5%.	
London	Waitrose	£481,500 pa	3,410 sq.m	New build	Jan 2013
Road,		(£141 psm or	(36,702 sq.ft)	Unit.	
Northwich		£13.12 psf)			

Table 4.6 - Supermarket Lettings in the North West from 2013 Onwards (Source: CoStar and Land Registry)

4.53 Partly as a result of their perceived covenant strength, supermarket premises are popular amongst investors despite their performance in recent years. This is evident within the yields that are outlined at Table 4.7 below, which shows that supermarket premises have sold for yields of between 5% and 6.5% in the North West over the last 3 years. The level of yield is informed by the specific covenant strength of the operator, alongside other factors including the age, condition and performance of the specific store.

Unit	Tenant	Area	Yield	Date
Entwistle Road,	Aldi	1,300 sq.m	6.1%	July 2016
Rochdale	Alui	(13,986 sq.ft)	0.170	July 2010
School Lane,	Aldi	1,765 sq.m	5.4%	June 2015
Standish, Wigan	Alui	(18,998 sq.ft)	5.4%	Julie 2013
Crossley Street,	Tesco	2,740 sq.m	5.1%	April 2015
Little Lever, Bolton	resco	(29,500 sq.ft)	5.170	April 2013
Edgeley Road,	Morrisons	8,244 sq.m	5.9%	Dec 2014
Stockport	MOTTISOTIS	(88,745 sq.ft)	3.970	Dec 2014
Heywood Way,	Aldi	1,428 sq.m	6.5%	April 2014
Salford	Aidi	(15,376 sq.ft)	0.570	April 2014

Table 4.7 - Supermarket Investment Yields in the North West (Source: CoStar and Land Registry)

- 4.54 Comparison retail rents tend to differ more within retail locations relative to convenience retail units, and tend to vary on a street by street basis depending on footfall and accessibility. Town Centre locations that are busier and more accessible typically command higher rents relative to district centre and out of town locations, although over the past 20 years out of town retail parks featuring larger accommodation types have proved popular and competed with Town Centre locations.
- 4.55 From recent transactions involving high street national multiple retailers we estimate from the transactions that are reported on CoStar that rental levels in the following high street locations are at around the following levels:-
 - Congleton £135 to £167 per sq.m (£12.50 to £15.50 per sq.ft)
 - Wilmslow £296 to £366 per sq.m (£27.50 to £34 per sq.ft)
 - Macclesfield £108 to £210 per sq.m (£10.00 to £19.50 per sq.ft)
 - Poynton £285 per sq.m (£26.50 per sq.ft)
 - Nantwich £145 to £215 per sq.m (£13.50 to £20 per sq.ft)
 - Crewe £70 to £145 per sq.m (£6.50 to £13.50 per sq.ft)
 - Sandbach £135 per sq.m (£12.50 per sq.ft)

- 4.56 The values identified above represent prime values in high street locations. The transactions that we have analysed comprise a relatively small sample of lettings that have specifically involved national multiple retailers. It is therefore likely that rental levels will reduce very quickly away from these locations as footfall reduces as high street multiple retailers are likely to command a preferential position relative to lower order uses, which will typically be located further away from the core areas.
- 4.57 Units within the Borough have sold at yields of between 4.7% and 15.6% depending on the specific lease terms and the occupier's covenant, although high street yields have tended to be more compressed within the aforementioned centres at between 7% and 9.2% within recent sales. This includes the following transactions:-
 - We understand (from CoStar) that the Bridestones Shopping Centre in Congleton sold for £9,900,000 in June 2016. The shopping centre is anchored by a Morrison's and M&Co. The shopping centre located off Bridge Street in the centre of Congleton sold for £1,830 per sq.ft (£170 per sq.ft) and a net initial yield of around 7%.
 - We understand (from CoStar) that the Market Shopping Centre in Crewe sold for £20,300,000 in June 2016. The shopping centre is anchored by Argos and was 99% leased at the date of sale. The shopping centre comprises part town centre shopping centre retail accommodation and part retail warehouse accommodation. The shopping centre sold at a price that equated to £1,281 per sq.m (£119 per sq.ft) and a net initial yield of 8.8%.
 - 12-20 Bridge Street in Congleton which was partly let to the Nationwide Building Society sold for £430,000 in October 2014. The purchase price equated to a price of £2,013 per sq.m (£187 per sq.ft) and a net initial yield of 8.72%.
 - 64-66 Mill Street in Macclesfield which was let to Lloyds TSB (with an unexpired term of 10 years) sold for £685,000 in April 2015 according to the EIGroup. The purchase price equated to a price of £1,539 per sq.m (£143 per sq.ft) and a net initial yield of 8.16%.
 - 89 Mill Street in Macclesfield which was let to 'The Pizza Joint & Grill' (with an unexpired term of 5 years) sold for £170,000 in March 2015 according to CoStar. The purchase price equated to a price of £850 per sq.m (£79 per sq.ft) and a net initial yield of 9.16%.

- Unit 9 at 7-29 Penda Way in Congleton which was let to Sandbach Discounts (with an unexpired term of 5 years) sold for £84,000 in May 2015 according to CoStar.
 The purchase price equated to a price of £758 per sq.m (£70 per sq.ft) and a net initial yield of 8.33%.
- The Majestic Wine Warehouse at 34-42 Roe Street in Macclesfield sold for £1,120,000 in July 2015. The accommodation was occupied by Majestic Wines with an unexpired term of around 7 years. The purchase price equated to a price of £1,733 per sq.m (£161 per sq.ft) and a net initial yield of 7.59%.
- 4.58 Out of town retailing locations include the following retail parks within the Borough:-
 - Congleton Retail Park (Congleton)
 - Grand Junction Retail Park (Crewe)
 - Handforth Dean (Handforth)
 - Lyme Green Retail Park (Macclesfield)
 - West Heath Shopping Centre (Congleton)
- 4.59 We are aware of a number of lettings at the above retail parks, although some of the last known transactions are dated by virtue of limited tenant movements or limited available evidence.
- 4.60 At Congleton Retail Park a single retail unit is currently being marketed by Mason & Partners LLP. Unit G which extends to 320 sq.m (3,444 sq.ft) and we understand that the current passing rent is £55,408 which equates to £173 per sq.m (£16.08 per sq.ft) and the accommodation is available via a subletting (from Topps Tiles).
- 4.61 At the Grand Junction Retail Park in Crewe we understand from the leases that have been submitted to Land Registry that both Poundworld and Brantano Footwear agreed new leases in October 2013 and the rents that are outlined below.
 - We understand that Poundworld signed a new 10 year lease at Unit 2B (subject to a 5 year rent review provision and a 6 month rent free provision) at an initial rent of £139,780 per annum. We understand that the property extends to 447.7 sq.m (4,819 sq.ft) according to the rating list, meaning that the rent equates to around £312 per sq.m (£29 per sq.ft).

- We understand that Brantano signed a new 10 year lease at Unit 2A (subject to a 5 year rent review provision and a discounted rent within the first year at 50%) at a reserved rent of £125,000 per annum. We understand that the property extends to 463.9 sq.m (4,994 sq.ft) according to the rating list, meaning that the rent equates to around £269 per sq.m (£25 per sq.ft).
- We understand that Unit 8 is currently vacant. The unit extends to 465 sq.m (5,000 sq.ft) and is being marketed by Savills, although no information is disclosed regarding the asking rent.
- 4.62 Handforth Dean has recently expended, and tenants include Tesco, Marks and Spencer's, Outfit (Arcadia) and a recently opened Next concept store. No rental information is available either on Land Registry or CoStar.
- 4.63 At the Lyme Green Retail Park the last reported letting on Land Registry and CoStar comprises the letting of Unit 6 to Next in January 2011. The unit extended to 1,330 sq.m (14,313 sq.ft) including mezzanine accommodation. We understand that the rent that was agreed amounted to £114,352 per annum which equated to a rent of £86 per sq.m (£8 per sq.ft), or to £150 per sq.m (£14.00 per sq.ft) if the mezzanine accommodation is disregarded. We understand that the property was let subject to a 10 year lease, and a 22 month rent free period was granted (that was spread across the term).
- 4.64 We understand that Unit J at the West Heath Shopping Centre (which comprises the most recent letting reported on CoStar let at a rent of £32,000 per annum in July 2012 on a 5 year lease. The Towel Rail Limited (trading as 'The Yorkshire Linen Co') took around 315 sq.m (3,389 sq.ft) of accommodation, which equated to a rent of around £102 per sq.m (£9.44 per sq.ft).
- 4.65 Rental levels differ depending on each out of town retail location. We consider that established retail parks located close to larger populations such as at the Grand Junction Retail Park appear to command higher rents (in excess of £270 sq.m/£25 per sq.ft), whilst lower order retail parks located within less accessible locations including the Congleton Retail Park and Lyme Green Retail Park appear to command lower rents at around £160 (£15 per sq.ft). Out of town retail parks operating as 'district shopping centre level' such as the West Heath Shopping Centre appear to command lower rents at around £100 per sq.m (£9.30 per sq.ft).

- 4.66 In terms of primary yields, it is noted that the NFU Mutual Insurance Society Limited acquired the freehold interest in the Stanley Green Retail Park in Cheadle (just outside of the Borough near Handforth) for £42,600,000 in July 2016. The out of town retail park sold for a price that equated to £3,746 per sq.m (£348 per sq.ft) and a net initial yield of 6.12%. We consider that both the rents (which equated to an average of £245 per sq.m/£22.70 per sq.ft) and the yield are equivalent to what could be paid at the Handforth Dean Retail Park, and represent a yield that prime retail warehouse shopping centres could transact at within the Borough (such as Grand Junction Retail Park).
- 4.67 This is supported by individual transactions of similar out of town retail units. For example, the B&Q unit on Weston Road in Crewe was acquired by Henderson Global Investors for £24,080,000 in March 2016, which represented a price of £2,045 per sq.m (£190 per sq.ft) and sold for a net initial yield of 6.15%. Having regard to the above the passing rent for this accommodation equated to around £133 per sq.m (£12.40 per sq.ft) which indicates that rents for larger units specialising in DIY and bulky goods are often less than clothing and electronics retailers who tend to focus their retail operations in similar locations.
- 4.68 We consider that more secondary retail warehouse shopping centres (such as the Congleton Retail Park and Lyme Green Retail Park) would sell at higher yields of around 8% reflecting the reduced demand for this accommodation (that is reflected within the rents that are achieved within this location), and we consider that accommodation within more district centre locations (such as at the West Heath Shopping Centre) is more likely to achieve a yield at closer to 9%.

4.69 **Leisure**

- 4.70 The most likely form of leisure development comprises purpose built public house or restaurant accommodation. This could also include fast-food restaurant accommodation.
- 4.71 The rents and yields achievable in respect of leisure accommodation are extremely diverse, reflecting accessibility, foot fall and location. For example, rental levels in Central Liverpool and Manchester for A3 uses are reported to currently be above £50 per sq.ft per annum. Notwithstanding this, having regard to the characteristics of Cheshire East it is anticipated that new food and drink accommodation will typically comprise new 'out of town' provision at key transport interchanges, or forming parts of new leisure developments.

- 4.72 From our experience (of dealing with pubco operators in the North West), we are aware that pub operators in the North West seeking to develop new premises and will pay rents on new build properties ranging between £188 and £226 per sq.m (£17.50 and £21 per sq.ft) with yields for larger pubco operators (such as Marstons, Greene King and Mitchell and Butler) at between 6% and 7%. Given the costs of fit out, longer lease terms of upwards of 15 years are usually sought.
- 4.73 Fast food operators (such as McDonalds and Kentucky Fried Chicken) and restaurant operators (including Nandos, Pizza Hut, Frankie and Benny's) typically achieve rents in excess of public houses, which is generally to the order of £20 to £25 per sq.ft in out of town locations. Typical yields that are reported by EIGroup in relation to the auction sale of these assets range between 5.75% and 7% over the past 2 years.

5.0 FINANCIAL APPRAISAL ASSUMPTIONS

5.1 In this section, we have outlined the assumptions that have been adopted in our financial appraisals, in relation to the Residential and Commercial Development Scenarios, and also used within our Site Specific Testing.

5.2 **Base Input Land Cost**

- Land value is difficult to assess for a number of reasons. Firstly, development land value is an utterly derived value, with land being bought as a factor of production in the course of development. The price is generally determined by the development potential of the site. Secondly, the comparison of land value in terms of prices paid for sites is extremely difficult because of the large number of site specific variables that will impact upon the price paid. For example, the amount of remediation or other abnormal costs are likely to differ from site to site. Hence, any evidence of land transactions needs to be treated with a degree of subjectivity as adjustments may be necessary for factors such as abnormal site conditions, contamination and development density.
- 5.4 The National Planning Policy Framework states that viability should consider "competitive returns to a willing landowner and willing developer to enable the development to be deliverable."
- 5.5 Paragraph: 015 of the Planning Practice Guidance notes that:-

'A competitive return for the land owner is the price at which a reasonable land owner would be willing to sell their land for the development. The price will need to provide an incentive for the land owner to sell in comparison with the other options available. Those options may include the current use value of the land or its value for a realistic alternative use that complies with planning policy.'

- Building on this approach, the document 'Viability Testing in Local Plans' of the Local Housing Delivery Group 2012¹⁶ advocates the use of 'threshold land value'. This should represent the value at which a typical willing landowner is likely to release land for development, before the payment of taxes. The guidance suggests that threshold land value needs to take account of the fact that future plan Policy requirements will have an impact on land values and landowner expectations, and therefore using a market value approach as a starting point carries the risk of building in assumptions of current Policy costs rather than helping to inform the potential for future Policy. As a result it suggests that market values can be a useful 'sense check' and suggests that the threshold land value is based on a premium over current use values and credible alternative use values. The latter would be most appropriate where there is competition for land among a range of alternative uses such as in town centres.
- 5.7 The RICS Guidance Note 'Financial Viability in Planning' explains that for a development to be financially viable, any uplift from the current use value of land that arises when planning permission is granted should be able to meet the cost of planning obligations, whilst at the same time, ensuring an appropriate site value for the land owner and a risk adjusted return to the developer for delivering the project. The return to the land owner will be in the form of a land value increase in excess of current use value. The land value will be based on market value which will be risk adjusted, so it will normally be less than current market prices for development land on which planning permission has been secured and planning obligation requirements are known. The guidance note recognises that the market value will be by definition at a level at which the landowner would be willing to sell.
- In arriving at our assessments of land values in Cheshire East, we have had regard to available transactional evidence in the Borough. We have undertaken research using Land Registry data and other databases such as EGi and CoStar. We have also had regard to Valuation Office Property Market Surveys (albeit these are now fairly outdated, which has been reflected in the weighting that we have given to such studies). We have provided as part of Appendix 1 details of land transactions that we have considered.

¹⁶ Viability Testing in Local Plans (Housing Delivery Group, 2012)

5.9 Residential Land Values

- 5.10 The future residential development sites within the Borough are likely to be either previously developed sites, or greenfield sites located immediately adjacent or close to the existing settlements in the Borough. Having regard to the characteristics of Cheshire East, a typical settlement area site will have been previously developed and most likely would have been in previous commercial use.
- 5.11 Having regard to the likely characteristics of future development within the Borough, we have identified a number of possible development scenarios on both previously developed and greenfield sites. We have had regard to these classifications for the purpose of our testing.
- 5.12 In arriving at a market value for previously developed land in this case, both the land owner and the developer would have regard to a site's current use value, albeit a landowner would be seeking uplift in value above this level. Conversely, a developer would be reluctant to pay a full residential value for the site, having regard to the risk and cost involved in obtaining planning consent and the likely policy contributions being sought by the Council. In arriving at an assessment of market value for these purposes it is therefore necessary to have regard to both evidence of current use values as well as evidence from sites with residential planning permissions and then make reasonable adjustments to reflect factors such as the land owner's aspirations, the developer's concerns, risks inherent in the development process, and potential planning obligations.
- Within Cheshire East we would expect current values for previously developed land in the settlements areas with extant planning consents for commercial development to be in the range of £370,000 per hectare (£100,000 per acre) to £740,000 per hectare (£300,000 per acre). The definition of viability in the context of planning recognises the issue of a landowner receiving an appropriate site value, which whilst being less than full residential value is likely to be higher than current use value. Having regard to this we have considered the level of site value at which a landowner is likely to release a site for development in the town and settlement areas. This will also be influenced by the supply of competing residential development sites available in the area. A large number of sites will have a limiting effect on value, and conversely a more limited number of sites is likely to increase the landowners' expectations of a value uplift.

- 5.14 The landowner in making a decision regarding site value will also have regard to the likely houses prices in the area and inevitably those in higher value areas will be seeking a greater site value than those in lower house price areas. The values that we have adopted for the purpose of testing are around twice the existing use value of commercial sites within each of the respective areas that we have considered, as it is noted that commercial land values within parts of Crewe and Middlewich are towards the lower end of the range identified above. Commercial sites in higher value locations tend to be at the higher end of the range specified above as a result of competition for land from other uses and generally lower levels of land supply.
- 5.15 It is noted within the Local Plan Strategy that there are a number of Greenfield development sites on the edge of urban areas that are likely to come forward for development.
- 5.16 At the present time, these sites will normally be used for agricultural and grazing purposes or informal open space with site values on this basis typically in the region of £25,000 £50,000 per hectare (£10,000 £20,000 per acre) or less. It is probable that a number of such sites have had development expectations, since they are at the edge of or within the settlement area and in some cases may already be subject to option agreements. Naturally, any land owner is unlikely to sell such sites for agricultural values reflecting existing use, and clearly a land owner will be seeking an uplift in value if they are to consider releasing the site for development.
- 5.17 With reference to the RICS guidance and that from the Housing Delivery Group, it would be inappropriate to assume land values based on sites with full residential planning permission, and in reality the site value for viability purposes will lie somewhere between this and current value. In addition many Greenfield sites may require significant initial expenditure on services and infrastructure to enable them to be developed for residential purposes.

5.18 Having regard to these factors we have considered the range of land values based on the likely revenues that residential developments would be expected to achieve across the Borough and the availability of land for development. Table 5.1 contains details of the residential land value assumptions that we have adopted for the purpose of our testing.

Value Location	Previously Developed		Greenfield		
	£ per net £ per ne		£ per net	£ per net	
	developable	developable	developable	developable	
	ha	acre	ha	acre	
Very Low/Low Value	£495,000	£200,000	£370,000	£200,000	
Medium Value	£865,000	£250,000	£618,000	£225,000	
Higher Value	£1,235,000	£500,000	£741,000	£250,000	
Prime	£1,605,000	£650,000	£990,000	£400,000	

Table 5.1 - Residential Base Land Input Assumptions

- 5.19 The NPPF requires local authorities to provide a buffer of 5% or 20% in relation to their supply of sites to ensure choice and competition in the market for land. This is intended to ensure that the landowner will have to compete in the market to sell their site so will have to competitively price it to sell albeit will still want a return in excess of its current or alternative use value. If a landowner has unrealistic expectations of value, then the theory is that developers will then just acquire a more competitively priced site elsewhere and the overpriced site will remain undeveloped.
- 5.20 As a sense check we have also considered residential land sales based on the available evidence. From the sales listed as part of Appendix 4 it is clear that there is a range of prices that have been paid for land with residential planning permission reflecting the differing characteristics of the development sites, the landowner's expectations and the existing planning policy requirements.
- 5.21 Sites have recently sold in the Borough at prices of between £370,000 and £3,225,000 per hectare (£150,000 and £1,305,000 per acre) with planning permission. In prime locations it is considered that values significantly in excess of £2,500,000 per hectare (£1,000,000 per acre) could be achieved. In these instances we consider that the base land input sums details at Table 5.1 provide the landowner with a competitive return that is sufficiently in excess of the site's existing use value to incentivise the landowner to release their site for development. We consider that the approach that has been adopted in this instance conforms to the concept of 'threshold land value' that is introduced within 'Viability Testing in Local Plans'.

5.22 **Commercial Land Values**

- 5.23 Over the last few years, there has been limited available evidence of land sales in Cheshire East due to limited development activity in the commercial sector. Having regard to this, considered adjustments have been made in order to reach land values based on both the reported transactional evidence and our market experience within the area.
- 5.24 Potential commercial development sites are a mix of vacant Previously Developed Land, opportunity sites within or adjacent to existing industrial areas, or alternatively the extension of current industrial areas into the surrounding greenfield areas.
- 5.25 In arriving at our assessment of market value, current use values have been considered and allowances made to reflect both the land owner's aspirations and the developer's concerns.
- 5.26 In preparing our viability assessments for employment uses we have adopted the following base input land values:-

Туре	Land Value (price/hectare)	Land Value (price/acre)	Rationale
Industrial (B1b, B1c, B2, B8)	£370,000	£150,000	Located outside of Town Centre locations. Use requires fairly accessible location, although does not usually require significant frontage.
Office (A2, B1a)	£495,000	£200,000	Office land values can differ significantly depending on whether site is in Town Centre of periphery. Assumed lower land value to test viability in this instance. Accessible location with frontage required.
Small Comparison and Convenience Retail in Town Centre Location 279 sq.m (3,000 sq.ft)	£3,706,500	£1,500,000	Plots comprise small site areas, together with an accessible location within the Town Centre. Plots are therefore likely to command a significant premium over and above that of the majority of commercial uses.
Medium Convenience and Comparison Retail, All areas 929 sq.m (10,000 sq.ft)	£1,855,000	£750,000	Use requires highly accessible location in close proximity to key public transport routes.
Large Convenience and Comparison Retail, All areas 2786 sq.m (30,000 sq.ft)	£2,470,000	£1,000,000	Use requires highly accessible location in close proximity to key public transport routes. Requires significant plot sizes and often built in conjunction with a number of units on Retail Parks. Competition for land from Supermarkets.
Leisure	£740,500	£300,000	Located outside of Town Centre within close proximity to key public transport interchanges or main arterial routes.

Table 5.2 - Commercial Base Land Input Assumptions

5.27 **Acquisition Costs**

5.28 In addition to the land values detailed above, we have also assumed land acquisition costs based on 1% of purchase price for agent's fees and legal fees at 0.8%. This is in line with normal market practice and rates. We have also assumed payment of stamp duty in accordance with HMRC thresholds and rates which are summarised in table 5.3.

Property or lease premium or transfer value	SDLT rate
Up to £150,000	Zero
The next £100,000 (the portion from £150,001 to £250,000)	2%
The remaining amount (the portion above £250,000)	5%

Table 5.3 - HMRC Stamp Duty Rates

5.29 Timing of Land Acquisition

- 5.30 Our viability appraisals assume that the land is acquired on day 1 of the development programme and hence the purchase carries finance costs from the outset. For most of the small allocations considered this would be usual practice. However, it should be noted that for the larger residential developments typically above 100 units it would be unusual for a developer to acquire the entirety of such large sites from day 1. A large development site would normally be the subject of a phased acquisition programme, with the land only being drawn down by the developer as required. As a result, land acquisition costs are more likely to be phased over the development period and so the cost of finance would be reduced with a corresponding increase in the amount of development surplus. Whilst each development will depend on its own circumstances inevitably a landowner would expect and accept a phased draw down of land from a developer. Hence for the purposes of our assessments the landowner is benefitting from the entire land receipt at the outset.
- 5.31 It is noted that within this Report we have specifically focused on the delivery of smaller sites, and as detailed earlier within this Report strategic sites will be tested at a later date. To this end, we reserve the right to amend these assumptions on site specific testing of strategic sites, as in this instances it is considered unrealistic that a large strategic site that is delivered in multiple phases would be paid for in a single upfront lump sum payment.

5.32 **Residential Appraisal Assumptions**

5.33 **Development Programme**

- 5.34 In our experience a developer would seek to construct and sell around 30-40 dwellings per annum. For the purpose of the assessments we have assumed an average sales rate for each site of between 2 and 3 per month, depending on the size of the development, with the first sales typically taking place around 8 months after a start on site.
- 5.35 Sales rates tend to increase in respect of larger sites as developers seek to 'double up' and develop out a site in tandem. This may take the form of affiliated developers (such as Barratt and David Wilson Homes) or separate house builders. We have factored this into the sales rates assumed within the testing parameters for the larger schemes tested, and we have adopted sales rates of 4 per month for 250 dwellings and 5 per month for the development of 500 dwellings and 1,000 dwellings respectively.

5.36 Sales Values

5.37 Market Housing

- 5.38 Having regard to the market commentary contained at Section 4 and the detailed comparable sales evidence at Appendices 3 and 4 we have applied the ranges of net sales values detailed at table 5.3 below. The prices reflect the values that we would expect to be paid for new houses in these locations.
- 5.39 Justification is provided below at Table 5.4 in relation to why the different sales values have been adopted within each location. Please note that the sales prices listed on new build developments do not allow for non-cash incentives, which partly explains why lower sales values have been adopted on a generalised basis. In respect of Poynton given the lack of new build development within this particular location we have looked at sales in nearby Woodford and Hazel Grove (both in Stockport).
- 5.40 Redrow have commenced development at Woodford Garden Village were asking prices range between £322 and £367 per sq.ft depending on the dwelling type. These prices are therefore subject to negotiation and do not allow for non-sales price incentives, although these values are significantly above the £275 per sq.ft that we have allowed for in prime value areas.

Zone	Ward	Net Sales Price (per sq.m)	Net Sales Price (per sq.ft)
Very	Inner Crewe.	£1,615	£150
Low			
Low	Outer Crewe. Middlewich and	£2,045	£190
	Elworth		
Medium	Urban Areas of Congleton.	£2,260	£210
	Haslington and Shavington		
High	Macclesfield. Alsager, Outer	£2,422	£225
	Congleton, Handforth, Holmes		
	Chapel, Nantwich and Sandbach		
	(excluding Elworth). Audlem,		
	Bollington, Bunbury, Chelford,		
	Disley, Goostrey, Holmes		
	Chapel and Wrenbury.		
Prime	Knutsford, Poynton and	£2,960	£275
	Wilmslow. Alderley Edge,		
	Mobberley and Prestbury.		

Table 5.4 - Residential Sales Prices Adopted

- 5.41 Sales prices to date at Taylor Wimpey's 'The Heath at Hampton Wood' development which is located off Bramhall Moor Lane in Hazel Grove have been at around £256 per sq.ft before incentives are allowed for. Bellway, who are developing the site in conjunction with Taylor Wimpey have achieved slightly higher revenues that average around £261 per sq.ft. Sales values in Hazel Grove are below the £275 per sq.ft that we have allowed for in prime value areas.
- 5.42 The average dwelling price in Hazel Grove over the past 12 months according to Land Registry was £226,435. In Woodford the average sales price was £517,500. Sales prices in Poynton (which average £294,715) are between those in Hazel Grove and Woodford, and as a result of this and following an analysis of secondary sales within the area we consider that new build developments in Poynton would achieve sales values of upwards of £300 per sq.ft. We therefore consider that it is appropriate that Poynton should be considered a prime value location.

Zone	Location	Schemes Considered	Sales Price (per sq.ft)	Sales Prices Adopted (per sq.ft)	Comments
Very Low	Inner Crewe	The Carriages (Countryside)	£145	£150	There are higher and lower value areas in Inner
		College Green (Redrow)	£193		Crewe. On the balance of the above, consider that
					£150 per sq.ft is reasonable.
Low	Outer Crewe	Saxon Gate (Bloor)	£198	£190	For majority of Outer Crewe locations £190 per sq.ft
		The Rookery (Taylor Wimpey)	£201		is appropriate.
		Stoneley Park (Taylor Wimpey)	£199		
		Meadow View (David Wilson	£190		
		Homes)			
	Middlewich	Jubilee Pastures (Persimmon)	£192		Consider that all of the Middlewich development
		Oak Meadow (McAteer)	£196		values are supportive of the £190 per sq.ft that has
		Abbey Fields (Jones Homes)	£247		been adopted, although it is noted that some
		Jersey Fields (Stuart Milne)	£205		developments may perform better (such as Abbey
		*			Fields)
	Elworth	Elworth Gardens (Barratt)	£208		For Brownfield sites around Elworth at the former
		Gilberts Cross (David Wilson)	£207		Fodens factory and on surrounding plots consider
		Elworth Park (Persimmon)	£199		that the sales values of between £200 and £210 per
		Canal Fields (Bellway)	£198		sq.ft are applicable, which once discounted to
					reflect

Table 5.5 – Analysis of House Price Data that is presented at Table 4.4 above

Zone	Location	Schemes Considered	Sales Price (per sq.ft)	Sales Prices Adopted (per sq.ft)	Comments
Medium	Congleton	Astbury Place (Morris Homes)	£227	£210	Values are dispersed. Sites within affluent parts of
		Vicarage Gardens (Pembroke	£195		Congleton have achieved sales values over £220
		Homes)			per sq.ft. Brook Valley is an anomaly and has been
		Brook Valley (Bovis Homes)	£165		discounted as it contains a high proportion of 2.5
					and 3 storey dwellings, and Vicarage Gardens is not
					considered to be reflective of sales values in this
					location.
	Haslington	Vicarage Green (Elan Homes)	£221		Consider that the sales values are reflective of this
					area and support Haslington's inclusion within this
					particular band.
	Shavington	Chatsworth Park (Wainhomes)	£226		Consider that the sales values are reflective of this
					area and support Shavington's inclusion within this
		*			particular band.

Table 5.5 – Analysis of House Price Data that is presented at Table 4.4 above

Zone	Location	Schemes Considered	Sales Price (per sq.ft)	Sales Prices Adopted (per sq.ft)	Comments
High	Alsager	Limeacre (Seddon Homes)	£245	£225	Consider that the sales values support Alsager's
		The Paddocks (Stuart Milne)	£244		inclusion within this particular band.
		The Coppice (Miller Homes)	£222		
	Outer	Loachbrook Meadow (Bovis)	£239		Consider that the sales values support Congleton's
	Congleton	Kingfisher Park (Bloor)	£246		inclusion within this particular band.
	Holmes	Brooklands (Bellway)	£242		Consider that the sales values support Holmes
	Chapel				Chapel's inclusion within this particular band.
	Macclesfield	Leat Way (Bellway)	£246		All of the Macclesfield schemes are located to the
	(including	Mulberry Park (Redrow)	£269		North of the Town. Lower value areas to the South.
	Bollington)	Kingsfield Park (Jones Homes)	£268		Consider that the proposed value band is reflective
					the wider area but note that towards the North of
					Macclesfield are upwards of £250 per sq.ft.
	Nantwich	St Annes Court (Jones Homes)	£230		Consider that the developments that are located in
		Stapley Gardens (David Wilson)	£247		Nantwich are considered supportive of the sales
		Malbank Waters (Bovis/Barratt)	£240		price that we have adopted.
	Sandbach	Saxon Lea (Bovis Homes)	£237		Consider that the developments that are located in
		Bramley Wood (Taylor	£246		outer Sandbach are considered supportive of the
		Wimpey/Seddon Homes)			sales price that we have adopted.

Table 5.5 – Analysis of House Price Data that is presented at Table 4.4 above

Zone	Location	Schemes Considered	Net Sales Price (per sq.ft)	Sales Prices Adopted (per sq.ft)	Comments
Prime	Alderley	Greenlines (PH Homes)	£357	£275	Considered reflective of the values that will be
	Edge				achieved on new build dwellings in Alderley Edge
	Knutsford	See Comments to the r	ight.		Similar value area to Wilmslow/Alderley Edge.
	Prestbury	See Comments to the r	ight.		Therefore consider that the values that have been
					adopted are reasonable when assessed in this
					context.
	Poynton	See Comments to the r	ight.		Please see commentary above at Paragraphs 5.38
					to 5.41 above.
	Wilmslow	Bollin Park (David Wilson)	£408		Sales values are in Wilmslow are in excess of £275
		Bollin Park (Jones Homes)	£380		per sq.ft. Notwithstanding this on balance consider
					that this sum is a reasonable allowance given
					potential fluctuations in values within these value
		*			areas.

Table 5.5 – Analysis of House Price Data that is presented at Table 4.4 above

5.43 Affordable Housing

5.44 The values that have been assumed for the affordable homes are based on the likely bid by a Registered Provider. In this respect we have assumed bid prices for the different tenure options based on a percentage of market value. The bid prices adopted for our testing are as follows:

Affordable Rent

40% of market value

Intermediate

67.5% of market value

5.45 The pricing adopted above reflects the data that has been made available to us to date by RPs who are active within the area. As outlined earlier within this Report, this Report comprises an Initial Report and further testing may be undertaken at a later date. In this regard we will continue to monitor the amounts paid for affordable dwellings, and we may seek to revise these proportions based on the appropriate evidence that is made available to us throughout the different consultation processes.

5.46 **Construction Costs**

- 5.47 The construction costs that have been adopted are derived from the BCIS median rate of £1,055 per sq.m for estate housing in Cheshire in January 2016. For completeness a copy of the BCIS Report is provided at Appendix 5 of this Report within WYG's Report.
- 5.48 We understand from an interrogative analysis of the BCIS dataset that the average size of scheme within the database is around 20 dwellings. We have therefore taken advice from WYG and adjusted construction costs accordingly to allow for economies and diseconomies of scale. For completeness these assumptions are set out below at Table 5.4 below (and further details are provided within WYG's Report).
- 5.49 External works have been allowed for at 15% of construction costs, which is considered industry standard assumptions (when BCIS construction costs are adopted for the purpose of assessment).
- 5.50 Professional fees of between 6% and 10% have been adopted depending on the size of the development.

- 5.51 In addition to the above, we have also allowed for contractors profit at 7%. This has been deducted from the BCIS costs, as in the majority of instances house-builders have their own in-house construction expertise and as a result such sums are not payable (and we have allowed for a developers profit requirement elsewhere within these calculations).
- 5.52 For completeness the assumptions set out above are detailed at Table 5.6 below.

Ref	Units	Adjustment	External	Professional	Contingencies	Adopted
		for Scale	Works	Fees		Cost
1	5	+10%	15%	10%	5%	£1,434
2	10	+5%	15%	8%	5%	£1,343
3	25	0	15%	7%	5%	£1,256
4	50	-2.50%	15%	6%	5%	£1,224
5	75	-3.50%	15%	6%	5%	£1,212
6	150	-5%	15%	6%	5%	£1,193
7	250	-6.50%	15%	6%	5%	£1,174
8	500	-7.50%	15%	6%	5%	£1,162
9	1000	-8%	15%	6%	5%	£1,155

Table 5.6 - Construction Cost Assumptions

5.53 In addition in the generic testing undertaken we have also included an additional amount per dwelling for 'site opening up' costs on Greenfield sites to cover for example service reinforcement and increased access costs. These allowances are summarised in Table 5.7 below.

No Dwellings	Cost per Dwelling
25-50	£2,750
75	£4,000
150	£5,000
250	£7,500
500	£11,000
1,000	£11,000

Table 5.7 - Greenfield Site Opening Up Costs.

- 5.54 In respect of Strategic infrastructure and Utility Costs, the Harman Guidance states (at Appendix B) that:-
 - "Cost indices rarely provide data on the costs associated with providing serviced housing parcels, i.e. strategic infrastructure costs which are typically in the order of £17,000 £23,000 per plot for larger scale schemes."
- 5.55 Having regard to the external works allowances that we have adopted (at 15%) in addition to the professional fees and contingencies that we have allowed for on these costs, and to the opening up costs detailed above at Table 5.5 for schemes of 75no dwellings and above, external works costs of between £22,350 and £28,550 per dwelling have been adopted within the testing that we have prepared (that are above the range detailed within the Harman Guidance).
- 5.56 We have assumed that specific costs associated with the provision of on-site public open space and play areas as appropriate together with the capitalised cost of future maintenance and included within the external works costs.
- 5.57 To account for future development on previously developed sites, some of which may be subject to significant contamination WYG have made an additional allowance of £59 per sq.m for dealing with the additional costs associated with these matters. Further details are provided in their report.
- 5.58 As set out at Section 1 of this Report, this Report comprises an initial viability assessment to inform the Council about the levels of CIL that could be supported within the Borough. Whilst we have used a BCIS adjusted sum to assess the viability of development within the Borough. Whilst we consider that this is useful with a view to further work will be undertaken by WYG in due course to look at development costs in the future as part of future viability work. Further justification for the levels of discount that have been adopted will also be provided, or the rates amended, depending on consultation feedback that is received.
- 5.59 Within the testing, we have assumed that by adopting BCIS at a rate that reflects development within the local area, and discounting this accordingly to allow for the BCIS dataset, that the development costs are sufficient to meet the planning policy obligations that are set out at Table 2.4. Notwithstanding this, further work will be required by WYG in due course to verify that this is the case.

5.60 Section 106/Section 278 and Emerging Planning Policy Requirements

- 5.61 The testing that we have undertaken assumes that a policy compliant 30% affordable housing provision is delivered as part of the respective development in compliance with Policy SC5. We have assumed that 50% of the affordable provision comprises 2 bed units and the remaining 50% 3 bed dwellings, which is in line with RPs requirements for smaller dwellings (which is identified within the 2013 SHMA update also).
- 5.62 We understand that following the adoption of the Local Plan Strategy the Council will be seeking similar obligations to those that have been demanded in the past. In this instance we have reviewed the s106 monies that the Council have collected over the course of the past 3 years. The average contribution amounts to around £4,000 per dwelling, although there are large variations in the contributions that have been collected.
- 5.63 Having regard to the average contributions that have been collected over the last 3 years, we have allowed for S106 payments of £4,000 per dwelling.

5.64 **Sales and Marketing Costs**

5.65 Disposal costs, including sales and marketing expenses, have been assumed at a rate of 3.5% of the Gross Development Value of the market housing. This is in line with typical development industry rates for housing development. We have included an allowance of £500 per unit for the costs associated with the transfer of the affordable homes to a registered provider.

5.66 Finance

5.67 For all of the residential viability testing we have assumed a finance rate of 7% inclusive of arrangement and monitoring fees. This reflects the cost of finance currently available in the development market for residential developments of the type contained in our viability assessments.

5.68 **Developer's Profit and Overhead**

- 5.69 In assessing the appropriate level of developer's profit, we have had regard to both the size and form of the proposed development and the likely risk associated with the development as a result. The level of profit requirement will principally reflect the risk of constructing a particular development site and as a result a developer will typically require different levels of profit as reward for risk across different sites.
- 5.70 Many factors will govern risk in relation to a development site; these include location, the local property market, the size and scale of the development, potential contamination and other abnormal costs and the type of accommodation being provided. Other considerations affecting risk could include the planning status of the site, and specifically whether a planning consent is in place for the proposed scheme.
- 5.71 In terms of residential development, a smaller residential development would be considered less risky than a large scale strategic residential development site. On a larger site it may take many years for the developer to build out and complete the sale of all of the houses. There could be significant changes (for better or worse) in the property market during the lifetime of the development. Therefore, the risk associated with having capital tied up in the development is carried for many years. As a result, a developer would require a higher profit return than on the smaller development site.
- 5.72 The industry standard measure of profit return is typically based on a percentage of either Gross Development Value (GDV) or cost. In certain instances developers may use an internal rate of return as an additional check measure. In our experience profit based on GDV is more commonly used for residential developments although not exclusively, whilst a return based on cost is more typical for commercial development.
- 5.73 From our development market experience, residential developments would tend to command a profit return of 15-20% GDV, inclusive of a developer's overhead.

- 5.74 The HCA Guidance Note 'Investment and Planning Obligations: Responding to the Downturn' suggests that a figure of 16% of values rather than cost may be targeted for private residential sales. The HCA's User Manual 18 accompanying their Development Appraisal Tool suggests a typical figure at that time (July 2009) of 17.5-20% GDV, but this is given as a guide only as the manual suggests that profit will depend on the state of the market and the size and complexity of the scheme. It is notable that the manual, to accompany the new HCA Development Appraisal Tool, refrains from giving any form of guidance on the measure of any appraisal variables.
- 5.75 Looking at planning decisions, Planning Inspectors in certain instances have made reference in decisions to the level of profit adopted and what is typical, including the following examples:
- 5.76 <u>Flambard Way, Godalming¹⁹</u> (a mixed development of 225 flats and commercial accommodation): the inspector refers to an industry norm of 15-20% profit and although not explicitly stated this seems to be based on cost;
- 5.77 <u>Flemingate, Beverly²⁰</u> (a mixed use development): Here the Inspector accepted 15% of cost;
- 5.78 <u>Clay Farm²¹</u> (2,300 dwellings and retail, health centre, education): Here the Local Planning Authority suggested a profit return based on 20% of cost or 16% of GDV. 16% GDV was considered by the Council to be consistent with the profit based on GDV in the HCA document detailed above. The Inspector appears to accept the LPA's approach albeit the key point at issue related to whether the scheme should be assessed on a residual land value basis, or based on the actual historic purchase price.
- 5.79 <u>Former Royal Hotel, Newbury²²</u> (35 sheltered apartments): The Inspector here decided that the profit range of 17.5%-20% of GDV detailed in the HCA EAT user manual was the correct level of profit for this development.

 $^{^{17}}$ HCA Guidance Note 'Investment and Planning Obligations: Responding to the Downturn' (HCA, 2009)

Planning Inspectorate Decision in relation to 'Waverley Borough Council appeal by Flambard Development Limited' APP/R3650/A/08/2063055 (Planning Inspectorate 2008)
 Planning Inspectorate Decision in relation to Application by CP Group, Wykeland Group and Quintain Estates & Development PLC, LPA: East Riding of Yorkshire' APP/E2001/V/08/1203215 (Planning Inspectorate 2008)

²¹ Planning Inspectorate Decision in relation to 'Applications by Countryside Properties PLC & Countryside Properties (UK) Ltd to Cambridge City Council' APP/Q0505/A/09/2103599 and APP/ Q0505/A/09/2103592 (Planning Inspectorate, 2009)

²² Planning Inspectorate Decision in relation to 'Former Royal Hotel, Newbury, Gillingham, Dorset SP8 4QJ' APP/N1215/A/09/2117195 (Planning Inspectorate, 2009)

- 5.80 <u>Shinfield, Reading²³</u> (residential development comprising 126 dwellings and a sports pavilion): The inspector determined that a figure of 20% profit on GDV was appropriate for this development.
- 5.81 As the above demonstrates, the profit return requirement is not at a fixed level and will vary from site to site, depending upon the risk profile which is driven by many factors.
- 5.82 On the basis of the above and having regard to the nature of the site typologies and allocated sites, a profit level based on 15% of GDV (inclusive of overheads) has been applied for the smaller housing schemes of 5 and 10 homes. For all other sites a developer's return (inclusive of overheads) of 20% of GDV has been adopted. In each case these profit returns are factored into the residual appraisal together with a fixed land value to generate a development surplus.

5.83 Non-Residential Appraisal Assumptions

5.84 **Development Programme**

5.85 The development programme for non-residential sites will vary depending on the specific characteristics of each scheme. Table 5.8 contains details of the development programmes that we have assumed.

Use	Floor Area (sq.m)	Construction Period
Industrial B2/B8	465	5 months
Industrial B2/B8	1,858	8 months
Industrial B2/B8	4,645	9 months
Industrial B2/B8	9,290	11 months
Industrial B2/B8	27,780	18 months
Offices	464	7 months
Offices	1,857	12 months
Retail	279	6 months
Retail	929	8 months
Retail	2,787	10 months
Food & Drink	557	6 months
Hotel (50 Bed)	1,672	12 months

5.86 Sales Values

5.87 Having regard to the comparable evidence contained in the market commentary at Section 4, Table 5.9 contains details of the sales values that have been adopted for the non-residential uses forming the hypothetical development scenarios. These values have also been applied to the respective parts of the employment allocations that we have tested.

Property	Rent £/sq.m (£/sq.ft)	Investment Yield (%)		
Industrial – 465 sq.m	£65	8%		
(Whole of Cheshire East)	(£6)	0 70		
Industrial – 1,858 sq.m	£59	7%		
(Whole of Cheshire East)	(£5.50)	7 70		
Industrial – 4,645 sq.m	£59	6.5%		
(Whole of Cheshire East)	(£5.50)	0.5 70		
Industrial – 9,290 sq.m	£48	6%		
(Whole of Cheshire East)	(£4.50)	0%		
Industrial – 27,870 sq.m	£48	6%		
(Whole of Cheshire East)	(£4.50)	0%		
Office Accommodation	£188	8%		
(Whole of Cheshire East)	(£17.50)	6 70

Food & Drink - 557 sq.m	£215	7%		
(Whole of Cheshire East)	(£20)	7 70		
Hotel (Whole of Cheshire East)	Capital Value of £50,000 per room adopted			

Table 5.9 - Rents and Capital Values for Commercial Generic Testing

5.88 **Construction Costs**

5.89 The construction costs that have been adopted in the viability appraisals have been prepared by WYG Quantity Surveyors and their methodology is included in their report at Appendix 5. For ease of reference Appendix 5 of WYGs report summarises the construction costs that we have adopted within the generic testing. These costs are calculated on a cost/sq.m basis, and are inclusive of substructures, super structures, all external works, incoming services and drainage, preliminaries, fees and a contingency.

5.90 Sales and Marketing

5.91 We have assumed marketing and disposal fees on lettings of the units based on 20% of rental value. Sales disposal fees have been included at a rate of 1.8% (1% agent's fees and 0.8% legal fees). Such fees are considered reasonable at the present time and comprise the standard market charges. Stamp Duty Land Tax has been included as appropriate at usual HMRC rates.

5.92 Finance

5.93 A finance rate of 7% has been uniformly applied across all commercial development, which is inclusive of arrangement and monitoring fees.

5.94 **Developer's Profit and Overhead**

- 5.95 In assessing the appropriate level of developer's profit, we have had regard to both the size and form of the proposed development and the likely risk associated with the development as a result. As identified above in reference to the assumptions made in relation to developers profit in the residential appraisals, the level of profit requirement will principally reflect the risk associated with a particular development site and as a result a developer will typically require different levels of profit as reward for risk across different sites.
- 5.96 In the context of most forms of commercial development, the developer will typically seek a profit requirement of approximately 15% on cost. The figure is widely used, and has been applied to all forms of non-residential development that we have tested.

6.0 VIABILITY TESTING RESULTS

6.1 This section sets out the results from the viability assessments that we have prepared, and identify the maximum development surpluses that can be supported once planning policy obligations have been accounted for.

6.2 **Residential Results**

- 6.3 In each case the results tables are presented to show the scheme reference and the number of dwellings. The 'Development Surplus' is the residual sum that is left once the gross costs (inclusive of developers profit and base input land cost) are deducted from gross revenues. The development surplus is presented on the basis of an amount per sq.m of market floor space, and comprises the maximum amount of CIL that can be supported.
- The testing that we have undertaken assumes the payment of S106 monies of £4,000 per dwelling alongside a 30% affordable housing provision (in line with Policy SC5).
- 6.5 For ease of reference and presentation the table cells have been coloured to demonstrate development viability. Where development is not viable the cells are shaded red for ease of reference, and where development is viable the cells are coloured green.
- 6.6 Schemes 1 and 2 comprise the development of 5 and 10 dwellings. We understand from the Council that in line with the Government's Ministerial Statement (dated 28 November 2014) on the 'Support for small scale developers, custom and self-builders' and Policy SC5 of the Local Plan Strategy that they will not be seeking affordable housing provisions or contributions on developments of 10 units or less.

6.7 **Generic Residential Testing**

6.8 The results tables are presented with reference to each of the five differing value zones, so for each zone in turn we have provided the results tables for our testing at densities of 30 for Greenfield sites, 36 dwellings per hectare on previously developed sites, and also for apartments. The relevant tables relating to each zone are as follows:-

Zone	Ward	Greenfield	Previously Developed Land	Apartments
Very Low	Inner Crewe.	Table 6.2	Table 6.3	
Low	Outer Crewe. Middlewich and Elworth	Table 6.4	Table 6.5	
Medium	Urban Areas of Congleton. Haslington and Shavington	Table 6.6	Table 6.7	
High	Macclesfield. Alsager, Outer Congleton, Handforth, Holmes Chapel, Nantwich and Sandbach (excluding Elworth). Audlem, Bollington, Bunbury, Chelford, Disley, Goostrey, Holmes Chapel and Wrenbury.	Table 6.8	Table 6.9	Table 6.12
Prime	Knutsford, Poynton and Wilmslow. Alderley Edge, Mobberley and Prestbury.	Table 6.10	Table 6.11	

Table 6.1 – Index of Table Numbers for Information on the Residential Sales Prices Adopted

6.9 <u>Very Low Value Areas</u>

6.10 The testing results outlined below at Tables 6.2 and 6.3 show deficits of between - £181 and -£415 per sq.m on Greenfield sites, and -£239 and -£463 per sq.m on Brownfield sites.

Ref	Units	Gross Area Market Housing (sq.m)	Surplus	Surplus (per sq.m)	%GDV
1	5	358	-£109,200	-£325	-20.13%
2	10	831	-£204,188	-£181	-8.86%
3	25	2,123	-£708,223	-£415	-22.44%
4	50	4,232	-£1,367,248	-£385	-21.05%
5	75	6,294	-£1,977,748	-£381	-20.74%
6	150	12,732	-£3,703,020	-£354	-19.32%
7	250	21,232	-£6,411,755	-£360	-19.68%
8	500	42,502	-£13,965,711	-£386	-21.10%

Table 6.11 – Prime Value Area – Brownfield Testing Results

6.19 Apartment Testing Results

- 6.20 The testing results outlined below at Tables 6.12 provide development surpluses of between -£627 and £151 per sq.m for the development of apartments on Brownfield sites. We have assumed that apartments will only be developed in higher density locations on Brownfield sites that are located within the existing urban form within close proximity to existing transport links and amenities.
- 6.21 The development of apartments is unviable within the very low, low and medium value areas that we have tested at values of up to £2,260 per sq.m (£210 per sq.ft). Whilst the development of larger apartment dwellings remains unviable in higher value locations (at £2,422 per sq.m/£225 per sq.m), the development of smaller apartment accommodation is marginally viable and provides a relatively low development surplus of £13 per sq.m.
- 6.22 Apartment dwellings are viable within Prime areas, and provide development surpluses of between £85 and £151 per sq.m within the testing that we have undertaken.

Value Area	Units	Gross Area Market Housing (sq.m)	Surplus	Surplus (per sq.m)	%GDV

Hotel	1,672	-£851,948	-£509	-29.38%

Table 6.13 - Non-Residential Testing Results

- 6.25 Industrial development provides deficits for each of the development typologies that we have tested. Surpluses of between -£245 and -£757 per sq.m are provided if we assume that development is provided on a speculative basis. The testing that we have undertaken suggests that the development of smaller units is more unviable relative to the development of larger distribution type units.
- 6.26 Office development within the Borough if developed on a speculative basis is also unviable, and provides deficits of between -£502 and -£731 per sq.m in respect of the different development typologies that we have tested.
- 6.27 The testing results for retail development is more variable, and the results suggest that town centre development is unviable. As set out at Table 5.6 rents at £15 per sq.ft have been adopted, which reflects the typical rental values obtained in a number of high street locations from the sample of transactions that are assessed at Paragraph 4.62. A rental level at the rate we have adopted is above the range of rental levels that have been achieved on a £/sq.m basis that have taken place in Crewe and Sandbach, and within the range of rents observed in high street locations in Macclesfield, Congleton and Nantwich. At these rental levels development is unviable, and provides a deficit of £840 per sq.m.

- 6.28 The development of retail warehouse accommodation within the Borough is viable, and provides a development surplus of £70 per sq.m. This is based on the rents that have been achieved at Lyme Green and Congleton Retail Park. Higher rental values have been obtained on accommodation at the Grand Junction Retail Park and we suspect at Handforth Dean (having regard to rental levels at the Stanley Green Retail Park). The viability of development would improve as a result of these increased rents at Grand Junction Retail Park and Handforth Dean, although we have not undertaken further testing for two reasons. In the first instance the Grand Junction Retail Park is geographically constrained and cannot be extended. In the second instance, we do not have specific rental information for accommodation at Handforth Dean (despite utilising CoStar and Land Registry resources) and whilst we can speculate as to the performance of this specific retail area based on the rental levels that have been achieved nearby, further evidence is required to undertake further testing if CIL is to be considered on an area specific basis.
- 6.29 The development of larger supermarket/retail warehouse accommodation within the Borough is viable but provides a surplus of £0 per sq.m. This indicates that whilst development is viable based on the testing parameters that we have adopted, this form of development is marginal and cannot support potential additional development costs.
- 6.30 The development of food and drink accommodation is viable and provides a development surplus of £117 per sq.m based on the testing that we have undertaken. Notwithstanding this, the testing that we have undertaken assumes the development of a fast-food type unit. If lower rents are adopted in line with public house accommodation at £194 per sq.m (£18 per sq.ft) then this surplus is eroded and a deficit provided.
- 6.31 From the testing that we have prepared the speculative development of hotel accommodation is unviable, and provides a deficit of £509 per sq.m. The testing results suggest that hotel development cannot support potential additional development costs. It is noted in this instance that we have tested a budget hotel, and it is acknowledged that higher revenues could be achieved for more exclusive hotels within higher value locations. Notwithstanding this, for the purposes of implementing a CIL charge it is very difficult to distinguish between lower and higher value facilities, and on this basis based on the testing that we consider that a CIL charge cannot be implemented.

7.0 PROSPECTS FOR THE INTRODUCTION OF A COMMUNITY INFRASTRUCTURE LEVY

7.1. Purpose of this Section

- 7.2 The section provides further analysis of the results of the study in order to assess the extent to which a Community Infrastructure Levy (CIL) charge could be introduced in Cheshire East without prejudicing future development in the Borough. Based on this analysis we then draw conclusions about the types of use that could support a CIL charge and any variations in viability and hence the likely charge that may arise due to location or the scale of development.
- 7.3 CIL is a charge levied on buildings and extensions to buildings according to their floor area, and is a mechanism where money is raised from development to help a Council pay for schools, leisure centres, aged care accommodation, roads and other facilities to ensure the borough grows sustainably. The introduction of CIL is designed to largely replace the section 106 "tariff" approaches, which have previously been used for this purpose.
- 7.4 Taking the results of our study we make recommendations that the Charging Authority may wish to consider when setting its Preliminary Draft Charging Schedule (PDCS).
- 7.5 When taking the following recommendations into consideration, we would caution that in accordance with the relevant guidance the viability testing undertaken is at a high level based on the generic testing scenarios tested. Each development site will be different and hence true viability can only be established on a site by site basis. It is not possible in the generic testing that has been undertaken to fully reflect all site specific factors, and as a result, a degree of caution is required when interpreting the results.
- As detailed above this testing is based on the assumptions specified earlier within this report and does not test the viability of a number of the strategic allocations that are identified within the Local Plan Strategy. This testing will be undertaken at a later date as part of subsequent testing, and is reliant on the collection of additional information from developers. It is should be noted that the testing contained within this report comprises initial testing, and if further information is made available to us then this will be considered within subsequent testing if it is considered appropriate to do so.

7.7 Variation by Use and Location

- 7.8 The evidence of our research and the results of the viability appraisals shows that there are significant differences in the values, costs and hence viability, between residential and non-residential developments.
- 7.9 Therefore, we recommend that the Council as Charging Authority should consider introducing CIL on the basis of varying its charge by use, as a minimum between the broad categories of residential and non-residential development. The extent to which we recommend this variation could be taken further within these categories is discussed under the relevant headings below.
- 7.10 Our research also indicated differences in value by location for residential development. As a result of this you may also wish to consider a variable charging schedule with respect to location for residential development.
- 7.11 Following a review of the results data from the study, we have drawn conclusions about the prospects for the introduction of CIL and the possible charging rates that could be introduced without undermining the delivery of future development within the Borough.
- 7.12 Having regard to the identified variations in viability between residential and non-residential development, we have provided below separate conclusions for each use type.

7.13 Residential Recommendations

- 7.14 The results of our assessment show that varying the CIL charge for residential development on a spatial basis might be appropriate in Cheshire East.
- 7.15 The analysis of sales values in Section 5 shows the existence of spatial variations in residential values in certain parts of the Borough. In summary, values are lowest within inner urban areas of Crewe. The values for new housing development increase in the suburban locations of Crewe, Middlewich and Elworth, and are higher still within the urban areas of Congleton, Haslington and Shavington. Higher value areas of the Borough include Alsager, Outer Congleton, Handforth, Holmes Chapel, Macclesfield, Nantwich and Sandbach (excluding Elworth), whilst prime areas include Knutsford, Wilmslow, Alderley Edge, Prestbury and Poynton. Consequently we have adopted five residential value zones for the purpose of our appraisals, as illustrated by Table 5.4.

- 7.16 The Local Plan Strategy and SHLAA indicate that potential future development in Cheshire East is likely to come forward across all areas of the Borough. More detail is provided at Table 2.1 in respect of the potential locations of development.
- 7.17 From the evidence, there is a justification for introducing a Charging Schedule which varies on a spatial basis, according with the value tiers that have been adopted for our testing.
- 7.18 The Council, as Charging Authority could therefore consider introducing a CIL charge on the basis of varying its residential charge, by spatial zone based on the geographical areas contained within the different value bands that we have adopted.
- 7.19 In addition, the results indicate differences in viability between development on Brownfield sites which are generally within the urban/settlement boundaries, and on Greenfield sites mainly beyond the main settlement boundaries. This is something that also needs to be considered in preparing any charging schedule.
- 7.20 The requirement to provide affordable housing is one of the Local Plan Strategy's policy requirements with the greatest impact on viability. The results demonstrate that it will not be possible to achieve the 30% target in all cases together with CIL.

7.21 Interpretation of Testing Results

- 7.22 Tables 6.2 to 6.12 contain the testing results assuming the policy compliant Affordable Housing requirement. The figures within the tables are the maximum CIL rates that could be supported based on the floor area of the market housing only, as affordable housing is exempt from the charge.
- 7.23 The CLG guidance advices that Charging Authorities should not set their CIL tariffs at the margins of viability. Typically Charging Authorities that have already implemented a CIL charge have implemented a buffer; this varies but is typically in a range of 25% and 50% to account for site specific circumstances. In considering an appropriate buffer for Cheshire East we need to be mindful not only of property market changes and site specific characteristics such as abnormal costs but also requirements for aspirational and higher design requirements.
- 7.24 In relation to Very Low Value Areas (Inner Crewe), all of the tested options are unviable. This suggests that development in this location is not sufficiently viable to support a CIL charge. We would recommend a zero charge is introduced for residential development in Crewe.

- 7.25 The results for Low Value Areas (Outer Crewe, Elworth and Middlewich) show that development remains unviable in Brownfield locations. Whilst development is viable in some of the Greenfield sites that we have tested, the results are mixed and with the exception of small scale development is general cannot support additional planning policy obligations. Having regard to these results we therefore recommend a zero charge is introduced for residential development in Low Value Area locations.
- 7.26 In Medium Value Areas (Urban Areas of Congleton, Haslington and Shavington) Brownfield development remains unviable. The results indicate that in the majority of scenarios tested Greenfield development is viable, and we therefore consider that a CIL rate could be supported. The surpluses provided range from -£6 and £268 per sq.m, with lower surpluses obtained on the larger development typologies tested (500 and 1,000 dwellings). Higher development surpluses are provided on the remainder of the schemes considered, with the lowest surplus provided comprising £50 per sq.m. If we adopt a 30% buffer to this lowest surplus, a CIL rate of £35 per sq.m could be supported on Greenfield sites within Medium Value Areas.
- 7.27 Having regard to the above, it is acknowledged that larger sites could not support CIL at the proposed rate. Notwithstanding this, it is acknowledged that limited numbers of larger Greenfield sites will come forward for development within these locations. It is important to note that we will undertaken further testing on strategic sites, and as a result we will test the viability of larger strategic sites in more detail at a later date in order to determine whether key sites should be included within the proposed CIL charging zones.
- 7.28 Within High Value locations (Alsager, Outer Congleton, Handforth, Holmes Chapel, Macclesfield, Nantwich and Sandbach (excluding Elworth)) Brownfield sites remain unviable, and as a result we consider that a CIL cannot be charged on Brownfield areas. Notwithstanding this as per Medium Value areas, Greenfield development is viable. For the reasons detailed above, if we discount the surpluses that are provided in respect of the larger development typologies tested (500 and 1,000 dwellings that provide surpluses of between £62 and £120 per sq.m) higher surpluses of between £160 and £376 per sq.m are provided. Again, if a 30% buffer is adopted we consider that a CIL rate of £112 per sq.m could be supported.
- 7.29 Within Prime Value areas (Alderley Edge, Knutsford, Poynton, Prestbury and Wilmslow) Brownfield development is viable, and provides development surpluses of between £126 and £452 per sq.m (if the development of 500 dwellings is excluded which provides a surplus of £119 per sq.m for the reasons identified above) and a buffer of 30% is applied, a CIL rate at £88 per sq.m could be supported.

- 7.30 In Prime Value locations Greenfield development is more viable than Brownfield development, and provides development surpluses of between £213 and £678 per sq.m. The lowest development surpluses provided increases to £337 per sq.m if largest development scenario is excluded (1,000 dwellings). If a 50% buffer is adopted we consider that a CIL charge of £168 per sq.m can be supported. Given the potential scale of the proposed tariff, we consider that a higher buffer is justified.
- 7.31 In the case of apartment developments the results of our testing indicate that the results are generally unviable. The development of apartments is unviable within the Very Low, Low and Medium value areas that we have tested at values of up to £2,260 per sq.m (£210 per sq.ft). Whilst the development of larger apartment dwellings remains unviable in higher value locations (at £2,422 per sq.m/£225 per sq.m), the development of smaller apartment accommodation is marginally viable and provides a relatively low development surplus of £13 per sq.m.
- 7.32 Apartment dwellings are viable within Prime Value areas, and provide development surpluses of between £85 and £151 per sq.m within the testing that we have undertaken. If we adopt a buffer of 30% as a proportion of the lowest surplus provided (£85 per sq.m), we consider that a CIL rate of £60 per sq.m can be supported in Prime Value areas. For completeness details of the workings for assessing the proposed CIL rates are outlined below at Table 9.1.
- 7.33 Assuming residential development based on a policy compliant position of 30% affordable housing Table 9.2 below contains our recommendations as to appropriate PDCS for residential development. In preparing the suggested PDCS, we have had regard to the likely form of development that will be provided within the Local Plan period and in particular the extent of new development that will be provided throughout the Borough (as detailed specifically within the Local Plan Strategy).
- 7.34 In the context of residential development, sales values and development costs vary at a much lower level relative to commercial development. This can be noted by the conformity of the sales values within each specific location as detailed at Table 5.4 of this Report. In these circumstances a 30% buffer is considered to be reasonable.

Value Area	Scheme	Lowest Surplus (Per sq.m)*	Buffer	Potential CIL Rate
Very Low - Inner Crewe	Brownfield		30%	
	Greenfield		30%	
Low - Outer Crewe, Elworth	Brownfield		30%	
and Middlewich	Greenfield		30%	
Medium - Urban Areas of	Brownfield		30%	
Congleton. Haslington and Shavington	Greenfield	£50	30%	£35

Table 7.2 - Recommended CIL Tariffs, Residential Development

7.35 Non-Residential Recommendations

- 7.36 Having regard to the results of the appraisals which have been undertaken across all forms of commercial development in Cheshire East, most forms of development within the Borough are not economically viable at the current time on a speculative basis. From the results (contained within Section 6) the only forms of development which are demonstrated to be viable include certain types of retail development in higher value locations.
- 7.37 In reviewing the viability of commercial development, we have had regard to the spatial variations observed within the Borough both in terms of rent and price. The rents and yields adopted within both the industrial and office development appraisals are very much a Cheshire East 'prime' rate, and therefore we have tested a 'best case' scenario whereby development was assumed to be within the higher value locations. We have adopted a buffer rate of 50% for commercial accommodation types, which reflects the increase risks associated with this form of development.
- 7.38 Notwithstanding the above, even the 'prime sites' tested with marginally increased revenues were not financially viable (for either the office developments or industrial units tested). Given that the development of industrial units and office accommodation is unviable on a speculative basis, we would not recommend implementing any form of CIL charge on B1, B2 or B8 uses.
- 7.39 The testing of new retail development considered a range of options from small units constructed within the existing Town Centres, to new mid-size supermarkets and retail warehousing. In Town Centre locations the development of smaller units is unviable in the majority of instances, although it is noted that higher rental levels have been achieved in Wilmslow and Poynton in particular. A maximum specific charge of up to £46 per sq.m could be supported within both of these town centre locations (once rent free allowances and void costs at 18 months are accounted for and an increased profit sum to account for greater risk at 20% of cost). Adopting a buffer at 50% we consider that a CIL charge of up to £23 per sq.m could be supported. Notwithstanding this, high street retail charges are difficult to implement given variations in values across a small area. Rental levels at £258 per sq.m (£24 per sq.ft) are required. Whilst we consider that CIL could be introduced within the majority of town centre locations in Wilmslow and Poynton, secondary retail units may not be viable. As a result of this, and given the difficulties of encapsulating higher value retail locations within these two localities we would provisionally advise against the implementation of a CIL charge for retail accommodation in these two locations, at least until such time as further work has been carried out to assess the local variations in rental levels.

- 7.40 The development of smaller retail warehouse accommodation is viable, and provides a surplus of £70 per sq.m. CIL could therefore be supported at around £35 per sq.m if a 50% buffer is adopted that reflects the additional perceived risks that we associate with non-residential development. The development of larger retail warehouse accommodation and supermarket accommodation is viable, although a surplus of £0 is provided meaning that there is no prospect for the introduction of CIL.
- 7.41 Having regard to the above, it is considered that it would be difficult to introduce a limited CIL charge on smaller retail warehouse accommodation within the Borough, and as a result whilst it is accepted that based on our initial testing a limited CIL tariff of up to £35 per sq.m could be supported on smaller forms of development we would recommend against a CIL charge.
- 7.42 Notwithstanding this as detailed above higher rental levels have been achieved at the Junction Retail Park in Crewe and on the retail park immediately surrounding the Handforth Dean Retail Park. If increased rental levels of £215 per sq.m (£20 per sq.ft) are adopted within these locations (alongside a profit of 20% of cost and 18 month rent free and void allowances), a development surplus of up to £333 per sq.m can be supported for the development of 929 sq.m (10,000 sq.ft) retail warehouse units in these locations. If a 50% buffer is adopted, a CIL rate of £166 per sq.m could be supported for the extension of the above retail parks if smaller units are provided.
- 7.43 Notwithstanding the above, larger retail warehouse units could be provided alongside smaller units. We have therefore tested the viability of a 2.787 sq.m (30,000 sq.ft) unit at increased rents that reflect the rental premiums that are paid at Handforth Dean and at the Junction Retail Park. If rental levels of £172 per sq.m (£16 per sq.ft) are adopted (alongside a profit of 20% of cost and 18 month rent free and void allowances) then a surplus of £132 per sq.m can be supported. If a 50% buffer is adopted, then a CIL charge of up to £66 per sq.m could be implemented. On the basis that larger units may come forward at Hanforth Dean or at the Junction Retail Park, it is considered prudent that any potential CIL charge should reflect the development of larger units (which provide lower surpluses). We therefore consider that if the Council are able to identify specific areas where these two retail parks could expand, that a CIL charge of up to £66 per sq.m could be implemented.

7.44 The non-residential testing results at Table 6.13 identify a development surplus of £117 per sq.m in respect of food and drink accommodation. We consider that caution is required when assessing these results, as rental levels for food and drink accommodation are particularly variable. For the purpose of this exercise we have assumed that a fast-food type premises is developed. Notwithstanding this at Paragraph 4.38 it is noted that we accept that the main public house operators pay rents at between £188 and £226 per sq.m (£17.50 and £21 per sq.ft). If rents towards the lower end of this range are adopted, the development surplus that is available for CIL is effectively wiped out. Having regard to these variations, we therefore consider that it would be prudent to adopt a nil tariff in respect of the development of food and drink accommodation within the Borough.

7.45 **Instalments Policy**

- 7.46 Our results assume that the tariff is payable at the commencement of the development. This is obviously the worst-case scenario for any developer as they would need to fund the CIL payment and associated interest payment from the outset of the development.
- 7.47 CIL Regulations 69B, 70, 71 and 72 deal with the payment of the tariff. Regulation 69B provides that where an authority wishes to allow payment by instalments they must also have published an instalments policy on their web site. The authority has freedom to decide the number of payments, the amount and the time due. It can revise or withdraw its policy as appropriate.
- 7.48 With this in mind, the Charging Authority may also wish to consider allowing phased payments of the tariff at certain points in the development process. By introducing an instalments policy, this would help to improve the cash flow position, and hence viability. Any instalments policy is likely to be most relevant to and have the greatest effect on the largest developments undertaken, given the likely length of the development programme, and the implications of this for financing the CIL payment. For example, in the case of the development scenarios we have tested, residential Scheme 9 (1,000 units) in particular would likely benefit from an instalments policy.

- 7.49 To illustrate the effect that an instalments policy may have, we have prepared further viability assessments for residential scheme the development of 1,000 dwellings on a Greenfield site in a high value location. We have considered the effect of three instalments options as follows and presented the results in Table 7.3, which compares the maximum development surplus (all figures are rounded to the nearest £):-
 - 1. A single payment at the outset (no instalments);
 - 2. 2 equal payments, one at commencement, the second mid-way through the development programme;
 - 3. 3 equal payments, at commencement, mid-point and completion.

Instalments Option	Development Surplus (per sq.m)
1	£62
2	£114
3	£130

Table 7.3 - Impact of an Instalments Policy on Development Surplus (£/sq.m)

7.50 The results demonstrate that based on the larger development schemes, the introduction of an instalments policy does increase the development surplus that is available and hence by implication the level of CIL charge which could be set. However, this would need to be balanced against the increased resource and costs to the charging authority to administer an instalments policy. There are clearly a number of options in terms of the timing of the payments, although instalment policies that are weighted to taking payments later in the development programme will have a greater impact on the level of surplus that could be made available.

7.51 Conclusions

7.52 As set out within the Introduction of this Report at Section 1, this Report comprises an initial viability study to inform the Council's decisions in respect of the potential adoption of a Community Charge in the Borough. It is acknowledged that further testing will be required in the future in order to assess the viability of strategic sites (on which the Local Plan Strategy relies), and further testing may be required to pick up any modifications that are imposed by the Examiner throughout the Local Plan Examination Process.

- 7.53 The testing that we have undertaken is provided on an open book basis, and care has been given to set out the different inputs that we have adopted within the testing and the rationale and thought processes that sit behind the decision making that we have adopted. This is designed to enable stakeholders to comment on the appropriateness of these inputs from the outset to facilitate the flow of information between parties. It is also acknowledged that further revised testing may be required depending on the receipt of additional appropriate evidence (whether received from Stakeholders or through our own enquiries).
- 7.54 The testing that we have undertaken reflects the form of development that has previously taken place in the Borough, and the testing inputs that we have adopted are based on the appropriate available evidence that we currently hold. Care has been given to publish as much of our workings as possible to enable stakeholders to critically assess the approach that we have adopted.
- 7.55 In certain instances we have sought to adopt a prudent approach, and this Report does not intend to 'push the limits' in respect of what CIL charges development could support within the Borough. For example, it is noted that within some of the Prime areas potentially higher CIL rates could be adopted as the revenues that we have adopted at £2,960 per sq.m (£275 per sq.ft) is not fully representative of the potential revenues that could be achieved in parts of Alderley Edge, Knutsford, Prestbury and Wilmslow.
- 7.56 In addition to the above, the CIL rates that are proposed are based on the lowest development surplus that is provided. This means that the majority of developments that we have tested can support CIL at a higher rate relative to the proposed CIL charge that we have adopted.
- 7.57 We have also sought to adopt a robust position in respect of the commercial development typologies. Whilst it is acknowledged that the Council could implement a town centre retail charge in Wilmslow and Poynton, it is noted that due to variations in rents and issues in identifying higher value locations that this could prove problematic and as a result we have advised against the implementation of a CIL charge in these areas. This is also the case in respect of retail warehouse development within areas excluding the Handforth Dean and the Junction Retail Parks, were variable levels of rents mean that a potential CIL charge if introduced would be problematic and may prejudice development (unless the charge was geographically confined to the extension of the two aforementioned retail parks).

- 7.58 Similarly, whilst the development of Food and Drink accommodation is viable we have advised against a potential CIL charge on the basis that rental levels vary significantly between uses, and on this basis the introduction of a charge could prejudice the delivery of lower value food and drink uses (such as the development of public house/restaurant accommodation relative to higher value fast food outlets).
- 7.59 On the basis of the evidence that we have considered within this Report, the CIL charges proposed are considered to be robust. Notwithstanding this, as detailed earlier within this Report these recommendations are based on the information that we currently hold, and if further information is made available to us at a later date throughout the consultation process then this evidence will be considered on its own merits. This may lead to further testing, and lead to revised recommendations concerning the levels of CIL that could be charged.

APPENDIX 5

WYG REPORT

CHESHIRE EAST COUNCIL

Brief report concerning the effect of scale on building costs in the assessment of viability for Community Infrastructure Levy

1 Introduction

WYG have been requested by Keppie Massie to give consideration to the matter of applying a factor reflecting the scale of developments being assessed, to costs assessed using data published by Building Cost Information Service, for use within the Economic Viability Appraisals that are being prepared for the assessment of Community Infrastructure Levy. We have also been asked to advise on separate allowances that need to be accounted for when using BCIS Buildling Costs.

For completeness a copy of the BCIS Summary rebased to Chester is attached to this document. We recommend the use of the Median Cost for Estate Housing (at £1,055 per sq.m) for the purpose of assessing the viability of generic schemes within the Borough when the dwelling typologies are not known (whether terraced, semi-detached or detached dwellings will be provided).

WYG do not consider that BCIS costs fairly reflect the costs of open market developments as the BCIS costs are largely derived from small housing projects that have been let by Registered Providers or Housing Associations. To help account for this fact we consider that scale adjustments have to be made to the costs.

WYG have analysed a large number of schemes (c 150 no) included within the BCIS suite of analyses and have assessed that, for schemes that are predominantly for houses, as distinct from flats, the average size of development is 19 dwellings. It is to be anticipated that most, although probably not all, developments will exceed this number and substantially so.

There are other anomalies that lie within the BCIS costs when used for assessing viability but they are beyond the scope of this report.

2 Scale Adjustments

WYG consider that the following adjustments are reasonable:

Number of Dwellings	Adjustment for scale
5 No	+10%
10 No	+5%
25 No	0
50 No	-2.50%
75 No	-3.50%
150 No	-5%
250 No	-6.50%
500 No	-7.50%
1000 No	-8%

These adjustments are not easy to evidence as Developer's cost details are never published but WYG have recently agreed costs for a very large development with a 15% discount for scale, both the of the Developers and the development size.

3 Contractors Profit

The data from BCIS is based on rates and prices for Contractors acting under a conventional construction contract and thus include a profit and overhead return to the contractor.

Many developers will assume both construction and development risks and the return based on revenues would reflect this. As a result, there would be a double counting of construction profit and deductions need to be made from BCIS based costs to avoid this.

In this instance a deduction of 7% to allow for contractors profit based on the headline BCIS construction costs is considered appropriate.

4 Other Inputs

As detailed earlier within this Report, WYG do not consider that BCIS costs fairly reflect the costs of open market developments.

Notwithstanding this, BCIS Building Costs means the cost of the building, exclusive of external works, preliminaries, fees and contingencies. Allowances for external works, fees and contingencies therefore need to be applied.

We understand that External Works are typically accounted for at 15% of construction costs, and that this comprises an 'industry standard' assumption. WYG consider that this is basic form of analysis, and note that such costs typically vary significantly on a scheme by scheme basis depending on the scale and quality of the works that are required (in addition to Public Open Space requirements). Notwithstanding this, we consider the use of a 15% allowance for external works is appropriate for the purpose of high level viability testing.

Professional fees differ depending on the complexity and scale of the scheme. From the schemes that we see professional fee rates typically range from between 5% and 10% as a proportion of construction costs. Professional fee rates are generally lower for larger schemes. We recommend that the following rates are adopted for the purpose of high level viability testing, although in reality the rates of the larger schemes in particular may well be lower.

Number of Dwellings	Recommended Professional Fee Allowances
5 No	10%
10 No	8%
25 No	7%
50 No	6%
75 No	6%
150 No	6%
250 No	6%
500 No	6%
1000 No	6%

We would recommend that an allowance of 5% for contingencies is included within viability assessments at this stage. This level of contingency is that generally used when assessing the viability of schemes such as those costed here, at this stage of development.
