

3. Danger to Life.

- a. There is a dangerous pond – children and others may fall in and drown. Due to the muddy bottom and banks it is hard to get out or rescue anyone in the pond.
- b. An 11,000 volt High voltage **lethal** power line crosses the field with very limited ground clearance: a 2 metre minimum clearance is required for safety. A wooden stick, child's balloon, or kite near the line would result in immediate death. Normally the presence of such a line would **automatically** render a site as unsuitable for **public** events. As an EXPERT I cannot too strongly emphasise the danger this poses – over 1000 times more dangerous than the normal 230 v mains, and twice that used in the electric chair in the USA. There are reported deaths in similar circumstances elsewhere in the UK.

4. Danger of Criminal activities affecting ourselves and other immediate neighbours directly.

- a. Break-ins.
- b. Theft from gardens and outbuildings.
- c. Damage to garden, plants,
- d. Casing properties under cover of the activities.
- e. Inevitable incursions into these properties.
- f. Need to stay in the property to guard against incursions, dumping rubbish, broken bottles.
- g. Additional protection required.
- h. Increased insurance costs.
- i. Video surveillance required.
- j. Personal stress caused by any activities.
- k. Danger of damage to our cars and caravan in the garden, increasing insurance costs here as well.

5. The site too small for such events inevitably leading to overflow into adjacent properties including my home and garden. People will attempt access and leaving the site through our garden, especially in the event of an emergency. This 7 acre site is inadequate for the proposed parking and the event. Parking will overflow along the lane which is not wide enough for parked vehicles due to passing large farm vehicles and tractors, school buses, milk lorries, and large green waste vehicles.

6. Protection of the Countryside

- a. Farm Land: This is farm land in a quite rural location which should not be despoiled by this kind of regular activity, as stated in the local and county plans.
- b. The application would allow for multiple events of various kinds and future escalation over which the authorities would have little control.
