March 2023 - Children and Families Outcomes Framework Scorecard - This contains a rolling 4 quarters for comparison

Notes: The boxes that are grayed out are where national data is not applicable or data isn't available, for example the schools data is available termly which doesn't always coincide with quarterly reporting

Notes: The column highlighted in blue reflects the most recent quarter being reported on

Notes: Rates are calculated using the 2020 ONS mid year population estimate 0-17 of 78,068 (Office of National Statistics) and are calculated as a rate per 10,000 children aged 0-17. This enables the local authority to be compared on a like for like basis with different local authorities or groups of authorities. The exception is the EHCP rate which we have shown as the rate of 0-25 yr olds in line with the number
