

Councillor P Redstone asked how many rural properties had been built recently?

The response below has been provided by Karen Carsberg, Head of Housing: -

Cheshire East have to submit a Local Authority Statistics Data return in which we record new build additional affordable housing in settlements with a population of 3,000 or less. The following returns have been submitted, which demonstrate that whilst Cheshire East have not undertaken any direct development within rural areas, there have been a number of new affordable housing completions.
