

RAAG rating for actuals against targets (it is not appropriate to have targets for all indicators)	On target	Within 15% of target	More than 15% from target
Direction of travel shown between current and previous month (green indicates an improvement and amber indicates a decline)	▲	▼	

Indicators of Success

The indicators below will demonstrate change achieved

Rates are calculated using the 2023 ONS mid year population estimate 0-17 of 81,634 (Office of National Statistics) and are calculated as a rate per 10,000 children aged 0-17.

Narrative:
ID 7: There has been a drop in the number of contacts resulting in a referral where the decision was within one working day. These will be srutinised to understand what led to the delay in decision making and to ensure there was no risk to individuals as a result.
ID 9b: There is a significant improvement in the timeliness of visits within 10 days of referral and being evidenced on the young persons record promptly.
ID 13: There has been a drop in the % of Strategy discussions being held within 48hrs where an immediate strategy discussion is required from referral. Again we need to ensure that this isn't putting individuals at additional risk.

Narrative:

ID 19a: There is a considerable improvement in the timeliness of assessments in the month of February. Timely assessments is the first indication that individuals are having their needs addressed quickly and that plans can be put in place to support.

ID 21: Initial Child Protection Conference timescales continue to be variable. This can result in delays in the right plans being put in place to support vulnerable families. We need to be confident that appropriate safety plans are in place to mitigate any escalating risks.

ID 22: There is a positive reduction in the % of children with a repeat Child Protection Plan. This is an indicator that previous work has either resulted in lasting improvements or alternatively that where necessary appropriate care proceedings have taken place.

ID 26: It is too early to see the impact of the court team however this will continued to be monitored to hopefully see an improvement in PLO timescales within the next 4-6mths.

Narrative:

ID 29 & 30: As at the end February the 5 unregistered placements were all specialist provision inspected by CQC and had been notified to Ofsted.

ID 36&37: The short term placement stability has shown a slight improvement with the long term stability remaining steady. This is important to ensure that young people are in a stable home enviroment which improves opportunities for improved education and life outcomes.

ID39: There is a continued improvement in the % of our cared for young people having received an annual health check. Again good health support is cruical for improved life chances.

ID	Quality Assurance and Audit (safeguarding) - All of CYPFS	Apr-24	May-24	Jun-24	Jul-24	Aug-24	Sep-24	Oct-24	Nov-24	Dec-24	Jan-25	Feb-25	Target	SN av	Direction of travel

53	Number of good pratice alerts	13	10	0	4	10	3	8	9	5	4	7	Monitor		▲

Narrative:
ID 49: Although a small dip, timeliness of Child protection plan reviews remains in the 90% + bracket for the 5th consecutive month
ID 51&52: Whilst there has been a further increase in informal practice alerts we are not seeing an increase in formal alerts, suggesting that challenge is being addressed and resolved. It is important to highlight where there are issues in order to ensure practice can improve and young people are properly supported.

Narrative:

ID 69-72: Average case loads continues to be a fine balance as one busy week can result in short tem increases. The slight increase has also had an adverse impact on ID 74 with more workers having a case load of more than 20 young people.

ID 75-81: Supervision timeliness continues to remain variable and remains a key focus of the CSLT Performance board

ID 82-83: There has been an increase in both turnover and vacancy rate for Social Workers in Feb, which will require close monitoring to ensure this doesn't result in continued increase of case loads together with undue pressure on remaining worker.

ID 84: The sickness days lost reports were rebuilt in October as it was identified the reports only included episodes opened and closed in a period and excluded any ongoing absense episodes. As a result from October we are reporting a truer picture.
