Key Plan not to scale

<u>NOTES</u>

Removal of cementicious pointing of brickwork with reponting with Lime Mortar

- 1. Removal of existing cementious mortar and cement patch repairs
- Where facades are to be repointed, rake out motar joints well to a depth of 25mm minimum using chisels or hacksaw blades of appropriate width so as not to damage existing arises and flush out with water. Remove cement pointing by using hand tools such as quirks or narrow chisels. Remove loose particles to make a good key for the new mortar. Clean out joints using dry air sprays and non ferrous or stiff bristle brushes.
- Remove cement patch repairs using hand tools only. This is best achieved by continual gentle tapping with a hammer at the centre of the repair until the different mechanical properties between the brick and the cementitious mix causes the two to part without damage. The process is lengthy and time should be allowed for it.
- Care is to be taken to avoid damage to the substrate, particularly where the repairs are deep and well-adhered. Avoid damage to edges of sound material.
- 2. Repointing in Lime mortar
- Careful and sympathetic repointing is of the utmost importance in preserving the colour, texture and general character of old brickwork. Strong cement mortars are dark and harsh in colour; also they shrink and pull away the edges of the bricks. Flush pointing is unsuited to the irregularly shaped edges and faces of early brickwork and any form of struck pointing gives a hard and mechanical appearance to the wall. The following instructions are to be brought to the notice of every bricklayer and mason employed on the work and are to be carefully and fully carried out. Press the new mortar well into the joints to assist adhesion and to ensure that no voids are left. When the joints are filled the mortar is to finish slightly recessed from the general face of the brickwork so that the mortar
- does not encroach upon the irregular arrisses or spread over any worn or rounded edges of the bricks or stone. As soon as the mortar has taken the initial set it is to be stippled with a stiff

bristle brush to produce a slightly rough surface.

<u>3. Lime Mortar Spec mix spec</u>

- 1. Mix
- 1 part Hydraulic Lime, 3.5 NHL
- 1 part pit sand sieved to <2.36 mm. (Nosterfield or similar approved) 1/2 part fine red sand sieved to <600 microns
- 1 parts silica quartz sand sieved to <1000 microns (Leighton Buzzard or similar approved)
- 2. Additives:

Add to the mix crushed chalk reference: "CKC", obtained from Lime Green Products Ltd

4. Lime Mortar Spec mix Photo

EXISTING PHOTO REFERENCE SCHEDULE

Photographs in the schedule below act as a reference for 'like for like' replacements, where the proposal is required to match the existing fabric. Proposals should be submitted to the Local Planning Authority for approval prior to the ordering of any materials and commencement of works.

Items	Description	Photo Reference
Chimney Pots	Replacement chimney pots are to be cream clay and match the existing in size. Cream clay pepper pot ventilators are advisable where appropriate to keep the weather out of redundant flues.	
Coping to Chimney Stacks	Replacement buff stone copings are to match existing in size, profile and geology. Where original stone coping has been previously been replaced with brick. Renewal of is to be on a like for like basis as the existing.	

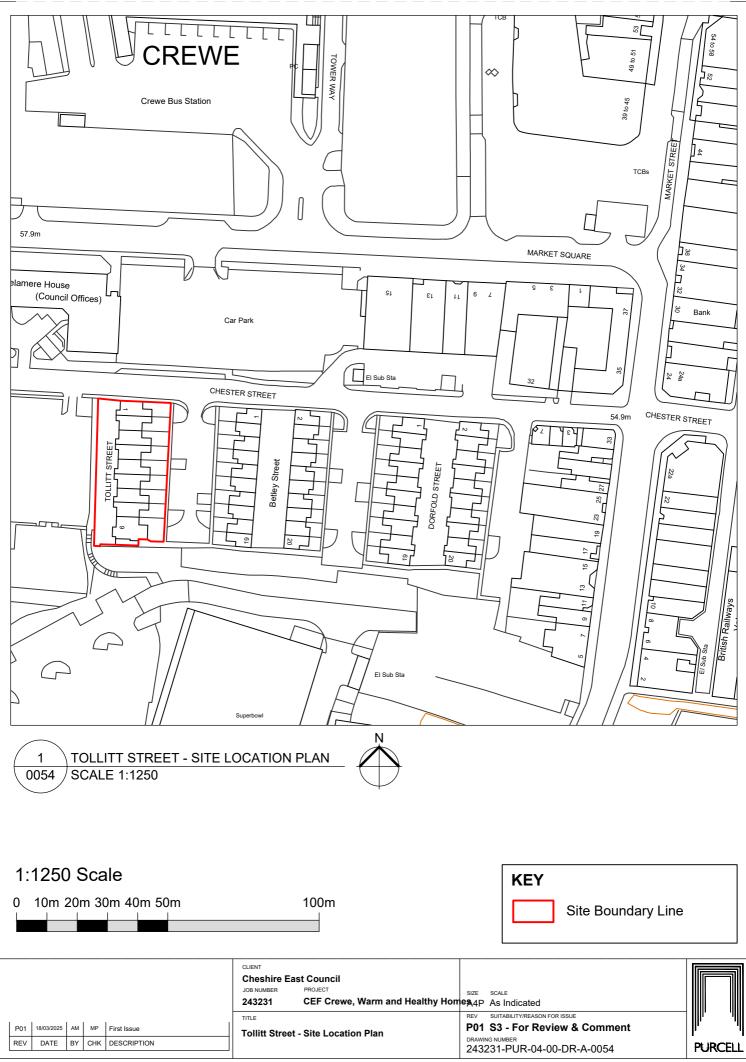

APPENDIX B - 03 BETLEY STREE	T	
		<image/>
Blue Clay Ridge Tiles	These may be new or salvaged, plain or flaunched but must match the existing in colour, size/profile and finish of the existing.	<image/>

APPENDIX B - 03 BETLEY STREE	Wrot softwood timber boards to	
Replacement Joinery for Barge boards to Gable ends	match the size, moulded profile and decorative features of the existing.	
Replacement Joinery for Barge boards to projecting rear gable	Wrot softwood timber boards to match the size, moulded profile and decorative features of the existing.	
Replacement blue clay pitched wall coping on the rear boundary.	New or salvaged blue clay triangular coping bricks to match the colour, size and finish of the existing.	

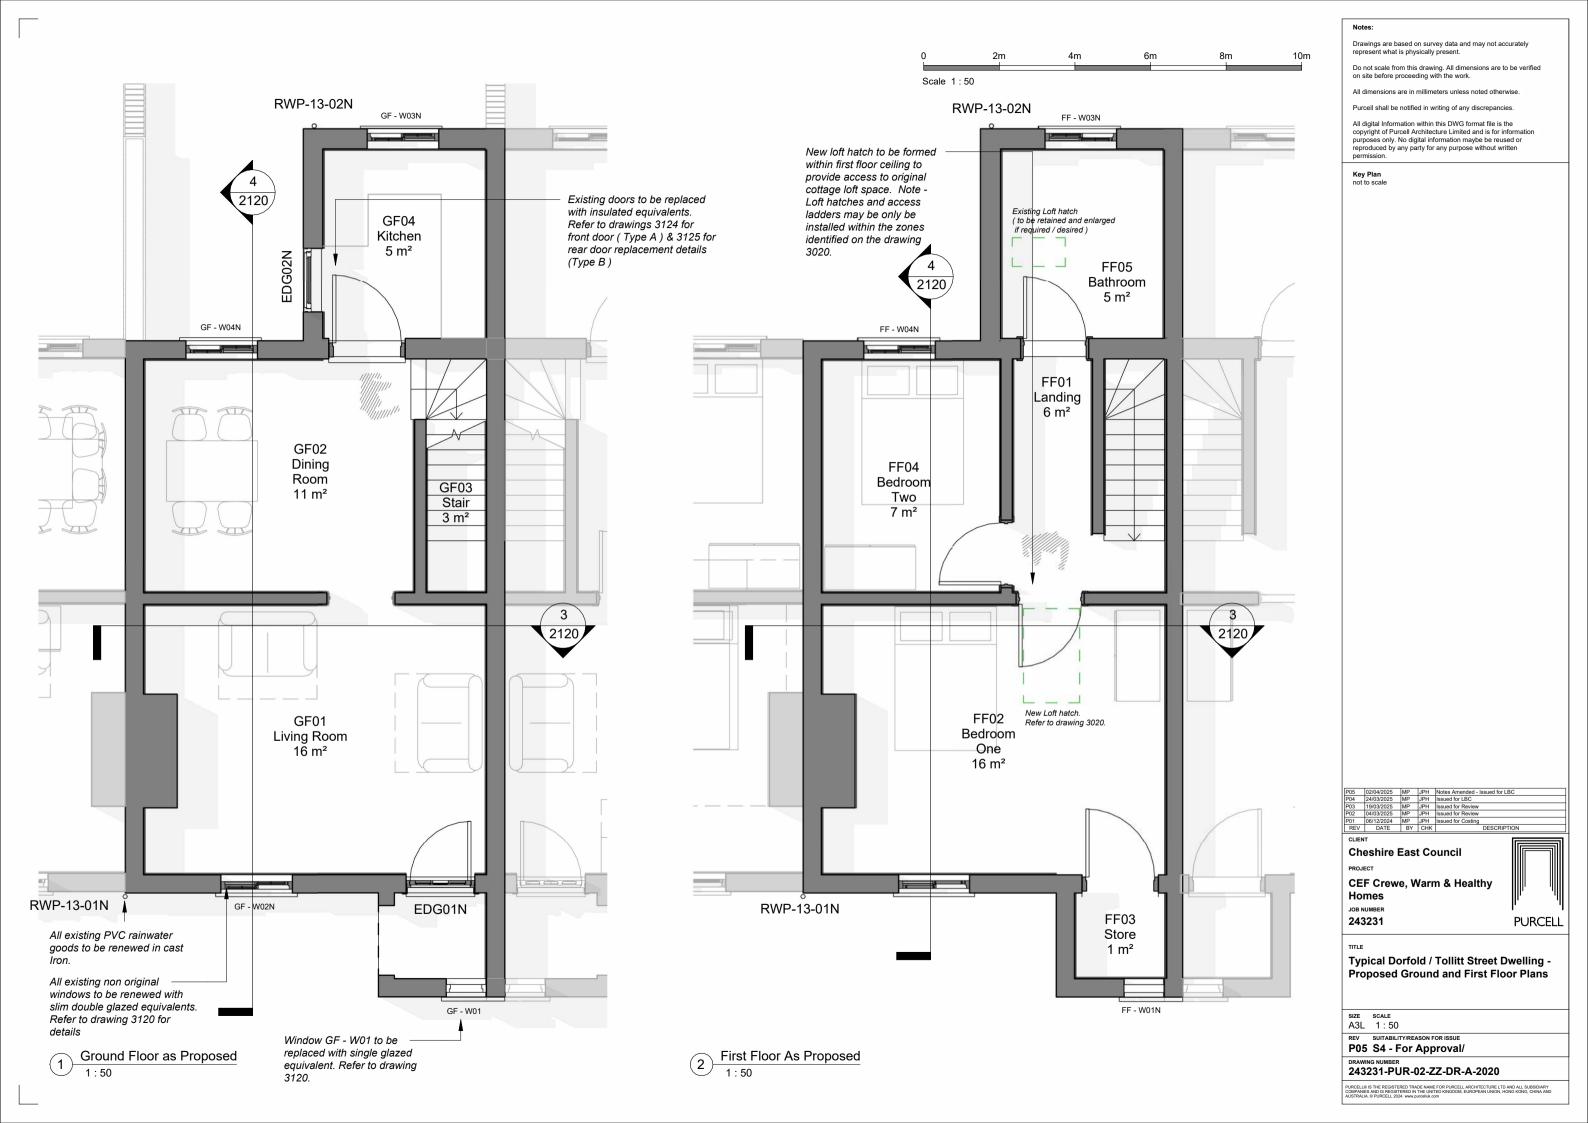

APPENDIX B - 03 BETLEY STREE		
Replacement of blue engineering brick copings to side/ party yard walls	New or salvaged blue clay engineering brick to form a coping on side walls and act as a DPC. To match the colour size and texture of the existing. Refer to drawing 3201 for coping detail.	
Replacement yard gates	Treated softwood ledged and braced gate with tongue and grooved boarding over and a pitched hardwood capping, fitting with a Suffolk latch to match the existing height (to the underside of the adjacent wall coping), to match the existing. Refer to drawing 3201
