

Questions to the Commissioner – June 2025

One of your key focuses in your Police and Crime Plan was modernisation and recently you secured £300,000 from the Police, Science, Technology, Analysis and Research Fund to fund AI capabilities to analyse incoming incident reports to help identify stalking behaviours.

AI does offer huge opportunities for policing. How will this technology you have championed ensure automated decision making is accurate and avoid bias from unrepresentative data used in algorithms, as they can inherit bias from historical crime data?
