

Strategic Planning Board

Agenda

Date: Wednesday, 23rd October, 2019
Time: 10.00 am
Venue: The Capesthorne Room - Town Hall, Macclesfield SK10 1EA

Membership

Chairman: M Hunter (Labour)
Vice Chairman: S Gardiner (Conservative)
Conservative Councillors: S Edgar, P Groves, P Redstone and J Weatherill
Labour Councillors: A Farrall, S Hogben and B Roberts
Independent Group Councillors: D Jefferay and R Moreton
Liberal Democrat Councillor: P Williams

Please note that members of the public are requested to check the Council's website the week the Strategic Planning Board meeting is due to take place as Officers produce updates for some or all of the applications prior to the commencement of the meeting and after the agenda has been published.

The agenda is divided into 2 parts. Part 1 is taken in the presence of the public and press. Part 2 items will be considered in the absence of the public and press for the reasons indicated on the agenda and at the top of each report.

It should be noted that Part 1 items of Cheshire East Council decision meetings are audio recorded and the recordings are uploaded to the Council's website.

PART 1 – MATTERS TO BE CONSIDERED WITH THE PUBLIC AND PRESS PRESENT

1. **Apologies for Absence**
2. **Declarations of Interest/Pre Determination**

To provide an opportunity for Members and Officers to declare any disclosable pecuniary and non-pecuniary interests and for Members to declare if they have a pre-determination in respect of any item on the agenda.

Please Contact: Sarah Baxter on 01270 686462
E-Mail: sarah.baxter@cheshireeast.gov.uk with any apologies or request for further information
Speakingatplanning@cheshireeast.gov.uk to arrange to speak at the meeting

3. **Minutes of the Previous Meeting** (Pages 3 - 6)

To approve the minutes of the meeting held on 25 September 2019 as a correct record.

4. **Public Speaking**

A total period of 5 minutes is allocated for each of the planning applications for the following:

- Ward Councillors who are not members of the Strategic Planning Board
- The relevant Town/Parish Council

A period of 3 minutes is allocated for each of the planning applications for the following individuals/groups:

- Members who are not members of the Strategic Planning Board and are not the Ward Member
- Objectors
- Supporters
- Applicants

5. **17/6471M Land off Hazelbadge Road, Poynton, Cheshire: Full planning application for 134 dwellings on land off Hazelbadge Road with associated access improvements, landscaping and public open space for Mr Sean McBride, Persimmon Homes (North West)** (Pages 7 - 54)

To consider the above application.

6. **19/1392M Land North of Northwich Road, Knutsford: Reserved Matters in relation to scale, appearance, landscape and layout for the erection of 190 dwellings including allotments, community orchard, playing pitch, landscaping, open space, car and cycle parking, drainage and associated works pursuant to outline application 17/3853M for Michael Blackhurst, Redrow** (Pages 55 - 74)

To consider the above application.

7. **19/3420M Land East Of Royal London House, Alderley Road, Wilmslow: Outline planning application for up to 17,000sqm of new office development (Use Class B1) and up to 1,100 associated car parking spaces; access improvements for vehicles and creation of new pedestrian and cycle routes; and the enhancement of existing and provision of new landscaping (Renewal of 16/2314M) for The Royal London, Mutual Insurance Society Limited** (Pages 75 - 98)

To consider the above application.

THERE ARE NO PART 2 ITEMS

CHESHIRE EAST COUNCIL

Minutes of a meeting of the **Strategic Planning Board**
held on Wednesday, 25th September, 2019 at Council Chamber, Municipal
Buildings, Earle Street, Crewe CW1 2BJ

PRESENT

Councillor M Hunter (Chairman)
Councillor S Gardiner (Vice-Chairman)

Councillors S Edgar, A Farrall, P Groves, S Hogben, D Jefferay, R Moreton,
P Redstone, B Roberts, J Weatherill and P Williams

OFFICERS IN ATTENDANCE

Ms S Dillon (Senior Lawyer), Mr P Hurdus (Principal Development Manager),
Mr D Malcolm (Acting Head of Planning), Mr R Taylor (Principal Planning
Officer) and Mr P Wakefield (Principal Planning Officer)

29 APOLOGIES FOR ABSENCE

None.

30 DECLARATIONS OF INTEREST/PRE DETERMINATION

In the interest of openness in respect of application 19/2489N, Councillor
S Edgar declared that he was the Ward Councillor and was also a Parish
Councillor for Weston & Basford Parish Council, however he had not
discussed the application and had come to the meeting with an open mind.

In the interest of openness in respect of application 17/6471M, Councillor
S Hogben declared that he was a Director of ANSA who were a consultee
on the application, however he had not made any comments nor
discussed the application.

In the interest of openness Councillor M Hunter declared that he had
received email correspondence and had replied to acknowledge the
correspondence but he had not given any indications as to how he was
thinking.

31 MINUTES OF THE PREVIOUS MEETING**RESOLVED**

That the minutes of the meeting held on 28 August 2019 be approved as a
correct record and signed by the Chairman.

32 PUBLIC SPEAKING

RESOLVED

That the public speaking procedure be noted.

- 33 **17/6471M-FULL PLANNING APPLICATION FOR 134 DWELLINGS ON LAND OFF HAZELBADGE ROAD WITH ASSOCIATED ACCESS IMPROVEMENTS, LANDSCAPING AND PUBLIC OPEN SPACE, LAND OFF HAZELBADGE ROAD, POYNTON, CHESHIRE FOR MR SEAN MCBRIDE, PERSIMMON HOMES (NORTH WEST)**

Consideration was given to the above application.

(Councillor M Beanland, the Ward Councillor, Town Councillor Laurence Clarke, representing Poynton Town Council, Mr Coulson, an objector, Vanessa Brook, an objector and Adele Jacques, representing the applicant attended the meeting and spoke in respect of the application).

RESOLVED

That the application be deferred for further information on the flooding situation and that the issue relating to the additional parking / drop off area for the school is resolved, in consultation with the school.

(During consideration of the application the meeting was adjourned for a short break. Prior to consideration of the following item, Councillor S Gardiner left the meeting and did not return).

- 34 **17/4497M-OUTLINE APPLICATION FOR EXTENSION TO THE EXISTING MARKS AND SPENCER UNIT AND AMENDMENTS TO THE CAR PARK LAYOUT, MARKS AND SPENCER PLC, COPPICE WAY, HANDFORTH FOR MRS ANDREA MAC-GREGOR BARBOUR, MARKS AND SPENCER PLC**

Consideration was given to the above application.

(Dan Brown, representing the applicant attended the meeting and spoke in respect of the application).

RESOLVED

That for the reasons set out in the report and in the written update to the Board, the application be approved subject to the following conditions:-

1. Submission of reserved matters
2. Time limit for submission of reserved matters
3. Commencement of development
4. Development in accord with approved plans
5. No subdivision of retail unit (as extended) - only to be occupied by one retailer

6. Floorspace shall not exceed 2450sqm, and shall be used for the sale of comparison goods only
7. Footway/cycleway improvements to be carried out
8. Detailed strategy / design and associated management / maintenance plan of surface water drainage to be submitted
9. Development to be carried out in accordance with submitted FRA
10. Electric vehicle infrastructure to be provided
11. Phase II ground investigation and risk assessment to be submitted
12. Verification Report prepared in accordance with the approved Remediation Strategy to be submitted
13. Imported soil tested for contamination
14. Procedures in event of unidentified contamination
15. At least 10% of predicted energy requirements from decentralised and renewable or low carbon sources

35 19/2489N-FULL APPLICATION FOR THE ERECTION OF TWO UNITS TOTALING 12,615 SQM (135,784 SQFT) FOR USE WITHIN B1(B) (RESEARCH AND DEVELOPMENT), B1(C) (LIGHT INDUSTRY), B2 (GENERAL INDUSTRIAL) AND B8 (STORAGE AND DISTRIBUTION), WITH ANCILLARY OFFICE USE, ASSOCIATED CAR PARKING, SERVICE AREAS, FENCING AND LANDSCAPING AT BASFORD WEST STRATEGIC SITE AT JACK MILLS WAY, CREWE, BASFORD WEST DEVELOPMENT SITE, PLOT 1 CREWE COMMERCIAL PARK, JACK MILLS WAY, SHAVINGTON FOR CREWE LAND UNIT TRUST

Consideration was given to the above application.

(Keith Wilson, the applicant attended the meeting and spoke in respect of the application).

RESOLVED

That for the reasons set out in the report the application be approved subject to the following conditions:-

- 1 Standard 3yr start
- 2 Development in accordance with approved plans
- 3 Submission of materials
- 4 Implementation of landscaping
- 5 Implementation of electric vehicle infrastructure
- 6 Implementation of cycle parking provision
- 7 Submission of Travel Plan
- 8 Implementation of Drainage scheme
- 9 Installation of Low Emission NOX boilers
- 10 Contaminated Land - Works to stop if unexpected contamination is discovered
- 11 Submission of Construction & Environmental Management Plan
- 12 Submission of Habitat and Landscape Plan
- 13 Protection of breeding birds

14 Incorporation of features into the scheme suitable for use by breeding birds

In the event of any changes being needed to the wording of the Board's decision (such as to delete, vary or add Conditions/informatives/planning obligations or reasons for approval/refusal) prior to the decision being issued, the Head of Development Management has delegated authority to do so in consultation with the Chairman of the Strategic Planning Board, provided that the changes do not exceed the substantive nature of the Board's decision.

- 36 **WITHDRAWN-19/3162C-OUTLINE PLANNING APPLICATION FOR THE ERECTION OF UP TO 98 DWELLINGS WITH PUBLIC OPEN SPACE, LANDSCAPING, AND SUSTAINABLE DRAINAGE SYSTEM (SUDS) AND VEHICULAR ACCESS POINT FROM WAGGS ROAD. FOOTPATH AND CARRIAGEWAY IMPROVEMENTS ALONG WAGGS ROAD FRONTING PROPERTIES BETWEEN 75 AND 89 WAGGS ROAD. ALL MATTERS RESERVED EXCEPT FOR MEANS OF ACCESS, LAND SOUTH OF, WAGGS ROAD, CONGLETON FOR GLADMAN**

This application was withdrawn by officers prior to the meeting.

The meeting commenced at 10.00 am and concluded at 1.39 pm

Councillor M Hunter (Chairman)

Application No: 17/6471M

Location: Land off Hazelbadge Road, Poynton, Cheshire

Proposal: Full planning application for 134 dwellings on land off Hazelbadge Road with associated access improvements, landscaping and public open space

Applicant: Mr Sean McBride, Persimmon Homes (North West)

Expiry Date: 28-Jun-2019

SUMMARY

The proposal seeks to provide 134 dwellings on a site allocated within the CELPS for around 150 dwellings. Some conflict with the site specific principles of development listed under LPS 48 of the CELPS in terms of the bus service contribution, the railway car park contribution and the retention of habitats on the site has been identified. However, whilst the contributions towards the bus service to the town centre and the railway car park are not being secured, significant contributions are being made towards the Council's strategic project of the Poynton Relief Road to mitigate for the impact of the development. Similarly, whilst LPS 48 requires the retention of habitats, again for the reasons stated this cannot be achieved if the primary policy objective of delivering housing is to be realised on the site. Adequate off site mitigation is being provided.

The applicant has now provided a car park comprising 14 spaces for use by the school in an attempt to address the concerns raised by Members, which is considered to meet the relevant requirement of LPS 48 within the CELPS.

The proposed drainage scheme seeks to ensure that there will be no increase in the flow of water discharging to Poynton Brook through the use of hydrobrake manhole chambers, oversized pipes and cellular storage. Despite the recent flooding event in Poynton, the LLFA has confirmed that the flood risk impact of the development is acceptable and appropriate drainage and flood risk are recommended.

The comments received in representation are acknowledged, and whilst some limited conflict with LPS 48 has been identified, the proposal is considered to comply with the development plan as a whole and is therefore a sustainable form of development. In accordance with policy MP1 of the CELPS, the proposals should therefore be approved without delay.

RECOMMENDATION

Approve subject to s106 agreement and conditions

REASON FOR DEFERRAL

The application was deferred from the Strategic Planning Board on 25 September for further information on the flooding situation and that the issue relating to the additional parking / drop off area for the school is resolved, in consultation with the school.

POLICIES

Since the deferral of the application from the September SPB meeting, the Poynton Neighbourhood Plan (PNP) has been formally made. The following relevant policies within the PNP can now be afforded full weight in the assessment of the application. A summary of how the requirements of each policy are addressed in the application is provided below:

EGB 1 Surface Water Management

This policy identifies that Poynton is at risk of flooding, and states that a local Flood Risk Mitigation Plan should be coordinated by the relevant authorities.

The LLFA and the EA would be the appropriate authorities to be involved in a Flood Risk Mitigation Plan as and when it is prepared. Both these organisations have been consulted on the application and are satisfied that the flood risk can be managed on site, as explained further below.

EGB 4 Access to the countryside

EGB 5 Improving access to the countryside

The requirements of these policies relate to retaining and enhancing existing footpaths and cycle ways, and diversions of PROWs should demonstrate benefits for wider community.

In this case, a contribution towards the upgrading of the existing cycle way on Chester Road is being secured through the s106 agreement. The public footpaths running through the site extend from Hazelbadge Road through the main site access and would have needed to be along the main estate road if retained on their current alignment. As noted below, the use of estate roads for public rights of way should be avoided and wherever possible preference should be given to the use of made up estate paths through landscaped or open space areas away from vehicular traffic. The diversion of footpaths 43 and 46 through the green infrastructure to the east of the site, away from estate roads is considered to represent a clear public benefit as an amenity feature for the wider community.

EGB 7 Landscape Enhancement

EGB 8 Protection of Rural Landscapes

These policies require the diverse landscape, and landscape features of Poynton to be conserved and enhanced.

The proposed development provides a very low density of built form along the northern Green Belt boundary, together with a 5 metre wide landscape buffer. Taken with the retention of trees (many of which are formally protected by TPO) within the site, the requirements of these conditions are considered to be met.

EGB 9 Nature Conservation

EGB 10 Wildlife Corridor

These policies expect development to avoid adverse impact on the nature conservation value of sites, or if this is not possible minimise such impact and seek mitigation of any residual impacts, and also seek to protect the biodiversity of the identified wildlife corridor.

The area along Poynton Brook within the application site falls within the designated wildlife corridor. The 8m buffer of green infrastructure to the Brook serves to satisfy policy EGB 10. In terms of EGB 9 and the impact of the development upon the nature conservation value of the site, the wooded area and ponds to the west of the site are being retained, which supports the objectives of this policy. As noted below, many of the habitats across the site do have to be removed in order to accommodate the proposed development, however appropriate off-site mitigation is being provided in accordance with policy EGB 9.

EGB 11 Development of Additional Facilities

This policy seeks the provision of small pocket parks, picnic areas and informal open spaces, in particular when new housing areas are being proposed and developed.

The current application includes a formal and informal play area, and informal amenity spaces along the eastern boundary and in the centre of the site around the protected trees, which satisfies the requirements of this policy.

EGB 15 Heritage Assets

This policy states that any development should aim to conserve and enhance the heritage assets of Poynton, including their setting.

The heritage aspects of the proposal relate to the western part of the application site, which includes brick works and brick kilns and to the south west a gas works, which are located within the area proposed for landscaping, where no development is proposed. As such, the level of impact on these areas of archaeological potential is considered to be acceptable.

HOU 2 Infrastructure for Strategic Housing Sites

The development of the three strategic housing sites in Poynton (including the current application site) allocated through the Cheshire East Local Plan should include appropriate provision for the infrastructure consequences of the development. Such provision may include either on or off site provision.

In this case open space infrastructure is provided on site, with all other contributions towards off site infrastructure in accordance with relevant policies of the CELPS listed within the schedule of planning obligations at the end of this report, which addressed the requirements of this policy.

HOU 6 Housing Mix

This policy seeks to ensure the delivery of a mix of housing types and tenures which meet the needs of current and future residents of Poynton, including young families and elderly people.

As noted below, in the Residential Mix section of the original report, a good range of 1, 2, 3, 4 and 5-bed properties are being provided with a variety of tenures, in accordance with this policy.

HOU 7 Environmental Considerations

This is a general policy that seeks to protect heritage assets, landscape and biodiversity, recreational areas and open space, and to ensure surface water flooding is not exacerbated.

Compliance with CELPS policies SE3, SE4, SE5, SE6 and SE13 as detailed below demonstrate compliance with this policy.

HOU 8 Density and Site Coverage

This policy requires proposals for new dwellings to reflect the height, form, extent and pattern of surrounding development and character of the local area including site coverage by hard surfaced areas.

The site is allocated within the CELPS for 150 houses, and the current proposal provides for 133 dwellings, well below the allocated number. As outlined below, the proposed density is considered to be consistent with the local character of the area.

HOU 9 Affordable Housing

This policy requires 30% affordable housing to be provided, and should be indistinguishable from open market housing.

The affordable housing section below explains how policy SC5 of the CELPS and this policy is addressed.

HOU 11 Design

This policy lists criteria for any new housing development to meet in order to achieve a high standard of design and new development should be compatible with the existing character of Poynton.

Again, the Design section below provides a detailed assessment against the Cheshire East Design Guide, which in turn results in compliance with policy HOU 11.

TAC 1 Walking & Cycling

This policy expects new housing development to provide new footpath and cycle routes and prioritise safe accessibility considerations.

As noted above, the proposal is considered to accord with this policy by providing a diverted public footpath through an area of green infrastructure to the east of the site, providing links to footpaths beyond the application site, and also providing a financial contribution towards improving the cycle lanes on Chester Road. No additional cycles lanes can be provided due to the restrictions of third party land ownership.

The proposal is therefore considered to comply with the relevant policies of the Poynton Neighbourhood Plan.

CONSULTEES

Lead Local Flood Authority (LLFA) – No objections subject to conditions

REPRESENTATIONS

One additional letter of representation has been received from a local resident since the deferral noting:

- That there has been further flooding in Poynton.
- The Environment Agency actually noted that part of the site was at risk of flooding on their website.
- The water courses cannot cope with the amount of rain and run-off from current built up areas.
- The field in front of Lower Park School is shown "at risk".
- The flood alert was rescinded with the proviso that heavy rain forecast might reverse this decision.
- This area IS at risk of flooding.
- To use this site for building is a risk and Persimmon's mitigation factors (primarily two large underground tanks) would be insufficient, is untested and frankly ineffective for the amount of water, as the water would still ultimately be discharged into Poynton Brook, causing flooding either on site or further down. The banks cannot be raised as this would just lead to flooding on the housing estate on the other side of the brook.

APPLICANTS SUBMISSION

The applicant has submitted a revised site layout plan to show a parking area for the school comprising 14 parking spaces.

KEY ISSUES

Parking / drop off area

One of the site specific principles of development for Site LPS 48 within the CELPS is:

“Improvements to Hazelbadge Road and its junction with Chester Road, including provision of improved turning/parking facilities linked to Lower Park School and access improvements to Lower Park School.”

The improvements to Hazelbadge Road and its junction with Chester Road include the widening of the junction and the provision of short stay parking bays (for drop-off purposes) and the introduction of double and single yellow lines. This will lead to access improvements to Lower Park School. Similarly, the turning areas in the form of the roundabout for parents and the junction further north for coaches also remain as previously proposed. In terms of car parking, the loss of the unrestricted car parking for school staff along Hazelbadge Road was a significant concern for Members during the last SPB meeting. Accordingly, the applicant has sought to provide a parking area for the school immediately adjacent to the school playing field. This parking area provides space for 14 vehicles. This plan has been presented to, and

discussed with, the School Headmaster and one of the School Governors at a meeting with the applicant and the case officer.

Railway station parking

The matter of contributions towards car parking for Poynton Railway Station was also raised during the last SPB meeting. The original report (below) outlines that since the station has introduced charging for their car park, it is underused, with vehicles being displaced to surrounding residential streets including, as many of the representations note, Hazelbadge Road. The case officer has visited the railway station car park on 3 separate occasions prior to the June SPB meeting and several times since, and every time spaces have been available. In addition given the proximity of the application site to the station, it is unlikely that residents would drive to the station. Consequently, a contribution or additional land for car parking is not considered to be necessary to make the development acceptable in planning terms, and this conflict with LPS 48 is considered to be acceptable.

Flood Risk

The proposed drainage scheme seeks to ensure that there will be no increase in the flow of water discharging to Poynton Brook through the use of hydrobrake manhole chambers, oversized pipes and cellular storage. The Flood Risk Assessment (FRA) states that the detailed drainage design will identify the specific requirements for the storm water storage. The LLFA has further considered the flood risk information submitted with the application, including the FRA, and stand by their previous response, which confirms that they have no objection to the proposal subject to conditions relating to carrying the development out in accordance with the submitted FRA, and the submission of a detailed surface water drainage strategy.

Conclusion

As in the original report a recommendation of approval is made.

FIRST DEFERRAL REPORT PUBLISHED 17 SEPTEMBER 2019

REASON FOR DEFERRAL

The application was deferred from the Strategic Planning Board on 26 June 2019 *“in order for further consideration to be given to a revised parking/drop off area for the school”*

POLICIES

Since the deferral of the application, the stage of the Poynton Neighbourhood Plan (PNP) has advanced from Regulation 17 to the Referendum Stage. The referendum on the PNP is due to be held on 10 October 2019. This increases the weight that can be attached to the draft policies within the PNP. However, this increased weight does not affect the assessment of the proposal and recommendation.

CONSULTEES

Consultation with ANSA and Sport England was undertaken to establish their views on the principle of utilising an area of playing field for the parking / drop off area given the policy issues this raises.

ANSA – Object on the grounds that the use of the playing fields is contrary to CELPS policies which seek to protect outdoor sports facilities

Sport England – Holding objection, which may be addressed when the following is received:

- A ball strike risk assessment including details of any required ball stop mitigation and how this will be managed and maintained should be submitted. This should take into account any of the mitigation package required by the loss of the playing field due to the proposed car park, such as community use.
- A mitigation package for the loss of the playing field brought about by the proposed car park is required.

In light of recent flooding events in Poynton, the further consultation has been carried out with the Environment Agency and the Lead Local Flood Authority (LLFA).

Environment Agency – No objections subject to conditions (as previously recommended)

LLFA – No objections subject to conditions (as previously recommended)

The Town Council have also provided further comments on flooding matters.

Poynton Town Council - This site is bordered entirely to the east by Poynton Brook, which experienced very significant flooding on 31 July 2019. While this site just avoided being flooded, there was serious flooding and damage to houses and commercial premises upstream along Poynton Brook, and downstream in Bramhall, Stockport.

The plans submitted by the developers show that the surface water drainage from the site will be discharged into Poynton Brook, so increasing the flow of water in wet weather compared to the current use as agricultural land.

Poynton Town Council requests that consideration of this planning application cease with immediate effect until the full investigations into the recent floods have been completed.

In no case should any run-off from the new houses be discharged into either Poynton Brook or the foul water sewer. The current 8 metre gap between Poynton Brook and the development should be increased. The developer should be required to provide sustainable drainage solutions wholly contained within the site, at their expense.

In addition, Cheshire East should conduct a review of all drainage and culverts to assess whether the system can cope with all three of the strategic sites in extreme (but now regular) events. This should be reviewed holistically and not each site in isolation.

REPRESENTATIONS

Since the deferral 7 letters of representation have been received from local residents and former residents of Poynton objecting to the proposal on the following grounds:

- Flood risk
- Review of recent flooding events should be undertaken before application is determined
- Recent flooding increased level of Poynton Brook by about 10 foot.
- Long term maintenance of easement to river
- Contamination from former brickworks and gasworks site
- Need for the development?
- If genuine need for housing, must be safer sites than this.
- Impact on wildlife
- Damage adjacent to footpath 43 through erosion from recent flooding
- Car park proposal would reduce provision of playing fields
- Hazelbadge Road unsuitable for the access to the site
- Provision of alternative access
- Drainage system in Poynton deeply flawed – flood risk assessments obsolete
- Increased volume of water will be washed into Brook
- Any new car park proposal should be within application site
- loss of valuable playing field open space, in stark contrast to the Council's commitment to the preservation of open spaces

APPLICANTS SUBMISSION

The applicant has investigated the potential for providing the parking/ drop off area on the playing field and provided two options for how this could be provided on a site area of around 2,000sqm; one option showing 56 parking/drop off spaces, and the other showing 32 spaces.

They have also undertaken a costing exercise for these proposals and identified that it would cost between £60,000 and £70,000 to provide either of these options on the site. The applicant has stated that they would be make a £70,000 contribution towards the provision of the car park on the school playing field, and would like the application to proceed to a decision on this basis.

They do however wish to make clear that the application does not seek consent for the proposed car park, and therefore the issue of whether it is acceptable is not one for committee members when determining the application. The applicant also points to the views of the Council's Highways team that have confirmed that the car park is not necessary to mitigate for the impact of the development.

The provision of additional car parking either on the school site or on land within their control would be to alleviate an existing problem and not problems arising from their development, and therefore the applicant considers that additional car parking should not have to be provided on their site.

A supplementary drainage statement has also been submitted reiterating that there will be no increase in the flow of water discharging into Poynton Brook. The drainage strategy for the site is designed to mimic current greenfield flow rates, with the proposed strategy providing a

betterment during 30 and 100 year storm events through the use of hydrobrake manhole chambers, oversized pipes and cellular storage.

KEY ISSUES

Green Belt

The application site was removed from the Green Belt under the allocation of LPS 48 when the CELPS was adopted in July 2017. However, the Green Belt boundary extended up to the southern boundary of the application, and included the school site and the site of the adjacent playing field, where Members have requested the parking / drop off area is located. As the justification to policy PG 3 of the CELPS explains, the extent of the existing Green Belt remains unchanged, apart from the removal of land from the Green Belt associated with the identified Strategic / Safeguarded Sites identified in the CELPS. As such the proposed location of the parking / drop off area on the existing playing field remains in the Green Belt.

Paragraph 146 of the Framework and policy PG3 of the CELPS identify engineering operations and local transport infrastructure which can demonstrate a requirement for a Green Belt location as forms of development that are not inappropriate development in the Green Belt, subject to them preserving the openness of the Green Belt and not conflicting with the purposes of including land within it.

It could be said that by deferring the application to investigate the provision of the parking/drop off area on the school field Members acknowledge a need for a Green Belt location for this transport infrastructure.

The parking/drop off area would cover an area of around 2,000sqm on what is a very open playing field, and as such it would not preserve the openness of the Green Belt. It can also be said that the parking / turning area proposal would conflict with two of the purposes of Green Belts, namely safeguarding the countryside from encroachment and checking the unrestricted sprawl of large built up areas. The proposal is therefore considered to be inappropriate development in the Green Belt.

Inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Paragraph 144 of the Framework advises that when considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. 'Very special circumstances' will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations.

Protection of Open Space

CELPS policy SC2 seeks to protect existing indoor and outdoor sports facilities, unless they are proven surplus to need or improved alternative provision is provided and would not result in the loss of an area important for its amenity. CELPS policy SE6 4. i. seeks to protect and enhance existing open spaces and sport and recreation facilities. Similar policy requirements exist at paragraph 97 of the National Planning Policy Framework. The provision of a parking/drop off area on this playing field would conflict with these local and national policies.

ANSA have commented on the application and noted that the site is identified in the CEC Open Spaces Assessment as outdoor sports facilities. It is also identified within the more

recently updated CEC Playing Pitch Strategy (PPS). Policy SC2 of the CELPS states that any proposal affecting an outdoor sports facility will be judged in relation to any emerging or adopted PPS.

Aim 1 of the Council's PPS is

- To protect the existing supply of playing pitches and ancillary facilities where it is needed for meeting current and future needs.

Recommendations:

- a. Ensure, through the use of the Playing Pitch Strategy, that playing pitches are protected through the implementation of local planning policy.
- b. Secure tenure and access to sites for high quality, development minded clubs, through a range of solutions and partnership agreements.
- c. Maximise community use of education facilities where needed

ANSA note that the Poynton area analysis has current and predicted shortages in youth grass football pitches. The proposed site has previously hosted youth football games but is now in need of some remedial work to manage the water on site.

Aim 2 of the Council's PPS is

- To enhance playing fields, pitches and ancillary facilities through improving quality and management of sites

The proposed development is already required to make an offsite contribution for the provision of ROS facilities in lieu of any on site provision. The playing fields form part of a wider network of playing field provision in an area with recognised shortfalls and deficiencies; as such it is an important community facility for existing and future residents and is protected under CELPS policy.

Sport England also raise similar concerns noting that the proposed development would not, in its current form, accord with any of the exceptions to Sport England's playing fields policy. However, they advise that their concerns may be addressed if the loss of part of the playing field is satisfactorily mitigated. They note that the most appropriate form of mitigation will depend on local circumstances, but suggestions based on experience from elsewhere would include:

- Improving the quality of the remaining playing field (e.g. through potential improvements to drainage, ground levels and/or maintenance);
- Formally securing the community use of the school's playing field through a community use agreement (unless there are already secured community access to the playing field);
- Marking out additional playing pitches on the playing field;
- Providing changing facilities as part of the development;

On this occasion, a package of mitigation measures would need to be proposed due to the extent of the impact of the proposed development.

Whilst the applicant has confirmed that they are willing to provide a financial contribution towards the provision of the car park, no mitigation measures are proposed. (As noted above, the applicant is not seeking consent for the car park). Accordingly, the proposal for a

parking/drop off area on the school playing field would be contrary to policies SC2 and SE6 of the CELPS, and paragraph 97 of the Framework.

Sport England initially also raised concern that the proposed residential development gives rise to a potential conflict with the use of the playing field for football, however they have since confirmed that the ball stop netting is not required for the development.

Flood Risk

The comments from the Town Council and local residents regarding flood risk concerns are acknowledged. Further consultation has been carried out with the Environment Agency and the LLFA and both parties have confirmed that their positions on the development remain unchanged from their previous responses.

Conclusion

The harm arising from the loss of the open space would also need to be added to the identified harm to the Green Belt, which as noted above, attracts substantial weight. The applicant has offered a financial contribution towards the provision of this parking/drop off area, which could be secured and retained for future use within a defined period.

However, the delivery of the car park, the additional mitigation measures, and (if required) the securing of other consents such as ensuring the Council achieves best value for the site as an asset, and a possible application to the Secretary of State for Education under Section 77 of the School Standards and Framework Act seeking to dispose of land which is defined as school playing field, will all fall to the Council to provide / address. Given the significant planning policy issues highlighted above, it is not considered to be likely that the policy issues can be satisfactorily addressed, and the provision of a parking/drop off area on the site is unlikely to be realised in a timely manner. It is therefore considered that the financial contribution offered by the applicants cannot be accepted, as the requirements of the CIL regulations would not be met.

The advice from the Highways Authority is that the turning and short stay parking provision within the application is satisfactory.

Despite the recent flooding event in Poynton, the flood risk issues remain as they were at the time of the previous report. Appropriate drainage and flood risk conditions are recommended.

Accordingly, as in the original report below a recommendation of approval is made, without the requirement for additional parking/drop off areas within the playing field.

ORIGINAL REPORT PUBLISHED 18 JUNE 2019

DESCRIPTION OF SITE AND CONTEXT

The site is an 8.28 hectare greenfield site lying to the west Poynton. The site is located at the northern end of Hazelbadge Road, which is a residential cul-de-sac. Lower Park Primary School and its playing field is currently located at the end of Hazelbadge Road, and the

application site borders the east, west and northern boundaries of the school. Hazelbadge Road runs between the school's eastern boundary and the application site. Poynton Brook runs along the eastern boundary of the site and the railway line runs along the western boundary beyond existing woodland on the western side of the site. The woodland is formally protected by Tree Preservation Order and there is also a linear group of protected trees in the centre of the site. A number of public rights of way also cross the site. The site is allocated for housing development under policy LPS 48 in the CELPS, which allows for the delivery of around 150 new homes.

DETAILS OF PROPOSAL

This application seeks full planning permission for the erection of 134 dwellings with associated access improvements, landscaping and public open space.

CONSULTATIONS (External to Planning)

There have been two rounds of consultation on the application, one in January 2018 and one in February 2019. The responses below are the most up to date from each consultee.

Environment Agency – No objection subject to conditions relating to groundwater and contaminated land

United Utilities – No objection subject to drainage conditions

Network Rail – Provide comments on the following: S106 funds should be sought for improvements to Poynton Railway Station; requirements for open space; risk assessment for works close to railway; safety of railway; scaffolding; vibro-compaction machinery / piling machinery; drainage; excavation and earthworks; gaps to railway boundary; noise mitigation; trees; roads / hardstanding

Housing Strategy & Needs Manager – No objection

Flood Risk Manager – No objection subject to conditions relating to FRA and surface water drainage

Environmental Health – No objection subject to conditions relating to noise mitigation, electric vehicle infrastructure, ultra low emission boilers, anti-idling signage and contaminated land

Education – No objection subject to a financial contribution towards local primary and secondary schools

Public Rights of Way – Initially objected due to obstruction of 2 rights of way. Revised plan showing diversion is a welcome amendment.

Head of Strategic Infrastructure – No objections subject to conditions relating to a revised travel plan, a construction management plan, and implementation of highway improvements, and financial contributions towards the Poynton Relief Road, Traffic Regulation Order along Hazelbadge Road, provision of a new bus stop opposite Hilton Grove and bus service improvements to be secured through a s106 agreement.

ANSA – No objections subject to confirmation of play space equipment

CEC Leisure – No objection subject to a financial contribution of £22,500 for health & fitness equipment at Poynton Leisure Centre

Cheshire Archaeology Planning Advisory Service – No objection

NHS Eastern Cheshire Clinical Commissioning Group – Request financial contribution to support the development of the two GP practices in Poynton.

Poynton Town Council –
January 2018

Recommend refusal on the following grounds:

- Overdevelopment and over intensification of use causing harm to character and appearance of area
- Adverse impact on Green Belt
- Unsustainable - fails to address key matters of infrastructure, impact on local and site amenities and flood risk and mitigation
- Unacceptable increase in traffic at the junction of Hazelbadge Road and Chester Road and creates highway safety risk
- A6MARR and PRR should be completed prior to the site being considered for development
- Access along Hazelbadge Road will have detrimental impact on adjacent properties
- Contrary to sustainable environment policies SE3, SE4 and SE5 concerning matters of biodiversity and geodiversity, landscape and trees, hedgerows and woodland
- Application submission makes no attempt to assess social and community infrastructure needs to be generated from this development
- Risk of surface water run-off from the site which would drain towards Poynton Brook which has suffered serious flooding in recent years.
- Fails to comply with the Borough Council's Statement of Community Involvement
- Adverse impact on the Poynton Brook wildlife corridor
- Insufficient and contradictory information to allow a full and informed assessment of the development now being proposed
- Public Footpaths, Poynton with Worth numbers 43 and 46, will be obstructed by the proposed development
- Inadequate visibility at the point of access onto Chester Road
- Contrary to the interests of highway safety due to the fact that a number of turning movements into and out of the site

- Contrary to the interests of highway safety as it would result in additional traffic using Hazelbadge Road and Chester Road which are already used at unacceptable levels.
- The development would adversely affect the free flow of traffic on Chester Road.
- By reason of its design, in particular the 3 storey mews and apartment blocks, would adversely affect the character and appearance of the area which it is located
- The apartments and to some extent the mews houses, the scale and form of these are totally out of keeping with the surrounding buildings
- Identified by Cheshire Wildlife Trust as having medium and high values on the habitat distinctiveness score as well as a wildlife corridor. The mitigation plan only focuses on Great Crested Newts and not the other variety of wildlife such as badgers and bats
- Contamination of site in area of former gas works and brick works
- Proposals do not adequately address the impact the construction works will have on the school, in terms of noise and dust

February 2019

- Overdevelopment and over intensification of use causing harm to character and appearance of area
- Adverse impact on Green Belt
- Unsustainable - fails to address key matters of infrastructure, impact on local and site amenities and flood risk and mitigation
- Do not adequately address the adverse impact that the construction works will have on the school, in terms of noise, dust or the danger from construction traffic
- Unacceptable increase in traffic at the junction of Hazelbadge Road and Chester Road into the proposed new estate and would create highway safety risk
- A6MARR and PRR should be completed prior to the site being considered for development
- The application is unneighbourly in that the access road will have a serious detrimental impact on adjacent properties.
- The proposed development is contrary to sustainable environment policies SE3, SE4 and SE5 concerning matters of biodiversity and geodiversity, landscape and trees, hedgerows and woodland.
- The application submission makes no attempt to assess social and community infrastructure needs to be generated from this development
- There is some risk about run-off of surface water from the site which would drain towards Poynton Brook which has suffered serious flooding in recent years.
- The application fails to comply with the Borough Council's Statement of Community Involvement
- The development would have an adverse impact on the Poynton Brook wildlife corridor as identified by the Cheshire Wildlife Trust in the submitted Poynton Neighbourhood Plan
- The planning application provides both insufficient and contradictory information to allow a full and informed assessment of the development now being proposed

March 2019

- Support concern raised by parents of children attending the primary school about the highway and personal safety
- Support the assessment of the Council's Design Officer

- Cheshire East Public Right of Way team continues to object to the development as the applicants have to date failed to commence the process for the diversion of appropriate footpaths
- The Borough Council is requested to ensure that site investigative works to enable this development to progress are undertaken by the developer and their advisors and prior to the grant of any planning permission
- Highway authority approach is very limited and fails to assess the impact of the development on the local community as national planning policy requires
- The Town Council endorses the concerns expressed by the Headteacher in the published letter and would request that if planning permission is granted for the development being proposed, the council should seek to meet the Headteacher's requests through an appropriate planning agreement or condition.

OTHER REPRESENTATIONS

Letters have been received from local residents, the neighbouring school, interested parties and the local MP.

January 2018

99 letters of representation were received objecting to the proposal on the following grounds:

- Impact on local school
- Exacerbate existing issues on Hazelbadge Road
- Impact on other local services, doctors etc.
- Impact on highway safety
- No additional infrastructure planned
- Inadequate infrastructure in Poynton
- Increased congestion
- Allocation in local plan does not validate proposal to build 147 houses
- Hazelbadge Road too narrow to accommodate additional vehicles
- Safe and suitable access cannot be provided
- Service vehicle access is impossible and will not be improved by increased traffic flows
- Plans show road up to boundary with GB - contract to site specific principles of development
- No land for railway station parking and no contribution towards public transport links
- Measures need to be put in place to ensure site is built out
- Risk of injury to school pupils
- Loss of open space
- Impact on wildlife
- Effects on drainage of the area
- Disruption to residents during construction
- Existing school traffic blocks access to properties
- Little consideration given to pedestrians and cyclists
- Increased flood risk
- Allotments planned on contaminated land
- Impact on protected trees
- Visibility at Chester Road inadequate
- Double yellow lines will be ignored by parents
- Second access via Glastonbury Drive should be considered

- Loss of grassland habitats and wildlife
- Station traffic already parks on Hazelbadge Road
- 22/01/18 between 8 & 9am 84 cars delivered children to school
- 24/01/18 between 8 & 9am 109 cars delivered children
- Car park promised by Persimmon on the school playing field not provided
- Mini roundabout inadequate for coaches to turn around
- Improvements to public footpaths should be made
- Contamination to western part of site
- Loss of biodiversity
- Who will be responsible for cost of management of open spaces
- Parking will be displaced to other nearby roads
- How will yellow lines be policed
- Increased noise and pollution
- Plans do not account for public rights of way
- Riverside walk and community orchard should be provided
- Traffic survey carried out at the end of term - false results
- Negative impact on character of Poynton
- No need for site to be released from GB as other sites can meet housing targets for Poynton
- No bungalows and starter homes provided
- Inadequate traffic modelling
- Cul-de-sac exceeds guideline maximum distance of 350m
- Height of some of the dwellings is out of keeping
- Impact of dust and noise on school children
- Access to train station should be provided
- A6 MARR and PRR will not reduce traffic to this site
- Roadwork should be done during the night
- Loss of pavement opposite school - should be reinstated to maintain safe walking route
- Housing mix incorrect - 5 bed houses not required, smaller 2 & 3 bed houses needed
- 3 storey apartments are an overbearing form of building in an area of predominantly 2 storey housing contrary to design guide
- Over development
- D&A indicates density to parcels 1, 2, 3, 5 & 6 will be between 33 & 60 units per hectare - 30 units per hectare proposed in neighbourhood plan
- Garages do not appear wide enough to accommodate a car
- Biodiversity is more extensive than applicants reports suggest
- Unacceptable impact on Poynton Brook Wildlife Corridor as identified in PNP
- Access along Hazelbadge Road will have detrimental impact on adjacent properties
- Contribution required to support local infrastructure, improve pedestrian and cycle access to station, secure cycle parking
- Derelict bridge over brook should be reinstated
- Construction management plan required to protect school
- Vehicles exceed 30mph along Chester Road mean visibility should be greater
- Nearby Woodford development traffic excluded from TA
- Inadequate parking for staff on school site
- Waiting restriction will prevent availability problem of parking for staff. The school needs a car park

- Lower Park Primary will not benefit from SC06 money - should be used to address specific issues of the school. e.g. new windows of cost f £80,000, boundary fencing for privacy
- Piled foundations will cause disturbance
- Main access should be re-routed along old railway embankment route away from school
- Inadequate air quality data (start from 7/2)
- Health Impact of building phase
- Traffic modelling software struggles to reproduce current peak hour conductors and is inadequate
- Land is on a flood plain
- Impact on GB
- Over development is over intensification
- 4 years of construction will have an impact children's education
- Site plan does not include highways works
- No construction management plan submitted
- No energy statements submitted
- Highways works not clear
- No swept path analysis for larger vehicles at Hazelbadge Road / Chester Road junction
- Safety audit should be carried out
- Any fence needs to be agreed with school
- Noise assessment incorrect and impact on school not considered
- Air quality assessment does not identify school as sensitive receptor
- Details of construction process should be considered prior to determination in consultation with school
- Play area should be moved away from existing residences
- Retirement accommodation is needed
- Many other housing developments taking place to address Poynton's housing needs
- Site previously refused PP due to access

February 2019

159 letters of representation were received objecting to the proposal reiterating the points above and on the following grounds:

- Any site visit should be done during term time at peak hours
- Site specific principles of development in LPS should be adhered to
- Impact on Poynton Brook
- Risk to health of pupils and homeowners
- Impact on highway safety
- All previous comments should be considered
- Road no wide enough to cope with additional traffic
- Bee bricks and bat boxes should be incorporated into buildings
- No public access recreation provision
- Double yellow lines should only be implemented following discussion with residents
- Yellow lines must not be considered
- Land is Green Belt
- Hazelbadge / Chester Road junction is dangerous
- Does not mitigate school traffic

- Still no car park provided on playing fields
- Old bridge should be replaced
- Impact on wildlife
- Loss of greenspace
- Homes not needed
- Details of improvement works should be available for review
- Increased noise and air pollution
- Bin lorries and fire engines cannot access properties
- Impact of construction traffic
- Inadequate parking
- Impact on village infrastructure
- Increased flood risk
- Enhancement works at Kerridge Hill do not mitigate for impact of development in Poynton
- Impact on infrastructure
- Poynton Relief Road must be completed before this site should be considered for development
- Loss of trees, hedgerows and woodland
- Damage to Poynton Brook Wildlife Corridor
- Does not respond to comments of the local community
- Impact of three-storey buildings on Green Belt
- Conclusions within LVIA are worthless
- No provision of housing for the elderly or bungalows
- Discrepancies in numbers of dwellings proposed in application documents
- Concur with all 13 points raised by Town Council
- Lack of thought shown to the school and protection of its pupils
- Land should not have been removed from the Green Belt
- Yellow lines will displace parking to other roads
- Road spur to north is unnecessary and suggests boundary will not endure
- Little provision for cyclists or pedestrians
- Brownfield sites should be used
- Concern over safety and welfare of children
- School will not directly benefit from the proposal
- Additional zig-zag lines should be put into place between the two existing zig-zag lines to help prevent cars from double parking at this most critical and busiest section of Hazelbadge Road.
- Impact of construction traffic / process
- Poynton has limited employment opportunities so more people will travel out of Poynton to work, which means more traffic
- A residents survey of the traffic on Chester Road on Monday 11th February 2019 between 08.00 am and 09.00am produced the following information:
841 Vehicles traveling westwards away from Poynton centre, including 24 lorries, 5 buses and 7 bikes
693 vehicles traveling eastwards towards Poynton centre including 23 lorries and 15 bikes
202 vehicles emerging from Clifford Road to travel west.
66 uses of the Pedestrian Crossing

These figures exceed those in a previous survey taken before the opening of the bypass and it is clear that traffic has increased along Chester Road rather than decreased as residents were promised.

- Revised submission is technically deficient
- No Construction Environment Management Plan submitted
- Increased congestion
- Unneighbourly
- Might contaminate the water supply to Poynton
- Community should be fully involved
- Housing type
- Application documents refer to width of road as 5.5m wide, when it is 6.1m wide
- Fencing off contaminated land is inappropriate

OFFICER APPRAISAL

PRINCIPLE OF DEVELOPMENT

The application site is an allocated Strategic Site for housing in the CELPS. Site LPS 48 states that the development of Land adjacent to Hazelbadge Road over the Local Plan Strategy period will be achieved through:

1. The delivery of around 150 new homes;
2. Incorporation of green infrastructure including:
 - i. An appropriate level of amenity open space and children's play space;
 - ii. The creation of links with footpaths to the north and east; and
 - iii. Pedestrian and cycle links to new and existing residential areas, employment areas, shops, schools and health facilities including improved pedestrian links to the town centre and the railway station.
3. Open space provision to accommodate the need for enhanced or new indoor and outdoor sports facilities to accommodate the additional demand from the housing. Provision should be in accordance with an adopted up to date and robust Playing Pitch Strategy and Indoor Sports Strategy.

The proposal for 134 dwellings is considered to meet the definition of "around 150 new homes" and is therefore considered to be acceptable in principle. The delivery of the site for residential development will contribute towards the Council's housing land supply and assist in meeting the development requirements of Poynton and the wider Borough. The further requirements of policy LPS 48 are considered further below.

HOUSING

Affordable Housing

Policy SC5 of the CELPS states that "in developments of 15 or more dwellings (or 0.4 hectares) in the Principal Towns and Key Service Centres at least 30% of all units are to be affordable." As a full application for 134 dwellings, in order to meet the Council's Policy on Affordable Housing there is a requirement for 40 dwellings to be provided as affordable units. 26 units should be provided as Affordable rent and 14 units as Intermediate tenure.

The current number of those on the Cheshire Homechoice waiting list with Poynton as their first choice is 114. This can be broken down to 58x 1 bedroom, 36x 2 bedroom, 15x 3

bedroom and 5 x 4+ bedroom dwellings. The majority of the need in this area is therefore for smaller dwellings.

The applicant's Affordable Housing Statement explains that they are providing the full policy requirement in Affordable housing. The proposal will provide:

Intermediate tenure

3 x 1 bed three-storey "F4" apartments

3 x 2 bed three-storey "F4" apartments

8 x 3 bed two-storey semi-detached "Hanbury" dwellings

Rent

4 x 1 bed two-storey "Beadnell" apartments

3 x 3 bed two and a half storey "Moseley" mews dwellings

7 x 2 bed two-storey "Alnwick" terraced dwellings

6 x 1 bed three-storey "F4" apartments

6 x 2 bed three-storey "F4" apartments

The Housing Strategy and Needs Manager is satisfied that the submitted Affordable Housing Statement and the Affordable Housing Plan are meeting the identified housing need. The units are adequately pepper potted across the site, and as such the proposal is in accordance with policy SC5 of the Local Plan. A query was raised by the Housing Strategy & Needs Manager seeking confirmation that Registered Providers will take the apartments with the extra communal service charges that can be associated with them. Confirmation has been received from a Registered Provider (MSV Housing) that they are willing to take the affordable housing as proposed, which satisfies this query. The affordable housing provision should be secured as part of the s106 agreement.

Residential Mix

Policy SC4 of the CELPS states that new residential development should maintain, provide or contribute to a mix of housing tenures, types and sizes to help support the creation of mixed, balanced and inclusive communities.

This is reflected in draft policies HOU 9 and HOU 15 of the Draft PNP. HOU 9 states that given the size and location of the Hazelbadge Road site, a mixture of 2, 3, and 4 bedroom properties should be achievable.

The proposed development comprises:

16 x 5 bed units

32 x 4 bed units

22 x 3 bed units

9 x 2 bed units

15 x 1 bed units

Taken together with the affordable provision outlined above, the proposed residential mix is considered to meet the requirements of policy SC4 of the CELPS, and the draft policies of the PNP.

OPEN SPACE

The local plan allocation (LPS 48) states that the development of this site should include “*an appropriate level of amenity open space and children’s play space*” and “*Open space provision to accommodate the need for enhanced or new indoor and outdoor sports facilities to accommodate the additional demand from the housing. Provision should be in accordance with an adopted up to date and robust Playing Pitch Strategy and Indoor Sports Strategy.*”

Public Open Space

Policy SE6 of the CELPS sets out the open space requirements for housing development which are (per dwelling):

- Children’s play space – 20sqm
- Amenity Green Space – 20sqm
- Allotments – 5sqm
- Green Infrastructure connectivity 20sqm

This policy states that it is likely that the total amount of 65sqm per home (plus developer contributions for outdoor sports) would be required on major greenfield and brownfield development sites.

The proposal for 134 dwellings triggers a requirement for 2,680sqm of formal and informal play provision in line with policy SE6 of the CELPS. A play area is now proposed on the northern boundary, which meets the size requirement for the children’s play space provision. The formal play area, which will include 8 items of equipment in a combined LAP and LEAP, is now located alongside an area of free-play amenity grass, to provide a comprehensive opportunity for formal and informal, imaginative and social play and activity. A gate will need to be provided between the fenced play area and amenity space, which can be dealt with as part of recommended landscape conditions.

2680sqm of amenity greenspace is also required, and the site plan indicates that over 6,000sqm of amenity greenspace will be provided, including over 3,000sqm around the protected trees in the centre of the site.

The same amount (2680sqm) is required for green infrastructure, and again provision of this type of open space exceeds the amount required by policy SE6, with over 9,000sqm being provided across the site.

In terms of allotments, the requirement is 5sqm per family dwelling. It was initially proposed to include allotments to the west of the site close to the woodland, however, due to the contamination issues associated with this part of the site (explained further below), a financial contribution for offsite provision will be required. The contribution is calculated on the basis of £562.50 per family home and £281.25 per apartment and will be used to expand, enhance and improve allotment and community garden provision in Poynton, on existing sites and new opportunities in line with policy EGB 20 of the draft Poynton Neighbourhood Plan.

There are 46 apartments and 88 family dwellings which results in a required allotment and community garden contribution of £61,937.50 (£49,500 for the family dwellings and £12,937.50 for the apartments).

Policy SC2 of the CELPS requires major residential developments to contribute, through land assembly and / or financial contributions, to new or improved sports facilities where

development will increase demand and / or there is a recognised shortage in the locality that would be exacerbated by the increase in demand arising from the development.

Outdoor sports facilities

In terms of outdoor sports facilities, the proposal will increase demand on existing facilities and as such a financial contribution towards off site provision will be required. The financial contribution is required at a rate of £1,000 per family [2+bed] dwelling and £500 per 2+ bed apartment. There are 88 family dwellings and 18 2 bed apartments within the proposed development. This results in a required contribution of £97,000 (£88,000 for the dwellings and £9,000 for the apartments). The funds would be required on commencement of development and would be used in line with the Council's adopted Playing Pitch Strategy and the FA's Local Football Facilities Plan at Deva Close Playing Fields Poynton.

Indoor sports facilities

The Indoor Built Facility Strategy has identified that any existing shortfalls for Poynton should look to focus on improvement of provision at Poynton Leisure Centre. Whilst new developments should not be required to address an existing shortfall of provision, they should ensure that this situation is not worsened by fully addressing its own impact in terms of the additional demand for indoor leisure provision that it directly gives rise to. Furthermore, whilst the strategy acknowledges that the increased demand is not sufficient to require substantial indoor facility investment through capital build there is currently a need to improve the quality and number of health and fitness stations at Poynton Leisure Centre to accommodate localised demand for indoor physical activity.

A contribution of £22,500 is therefore sought to address this increased demand. This has been calculated as follows:

134 dwellings at 1.61 people per residence = a population increase of 216

- The annual Sport England Active People Survey Results for 2016 showed 42.7% participation rate for Cheshire East = 92 additional "active population" due to the new development in Poynton
- Based on an industry average of 25 users per piece of health & fitness equipment this equates to an additional four (4) stations. Requirement for:
x 3 running machines (£6,500 per treadmill), x 1 resistance / weight pieces (£3,000 per piece). Total £22,500

For the above reasons the proposal is considered to comply with the open space and sport and recreation requirements of LPS 48 and policies SC2 and SE6 of the CELPS.

EDUCATION

One of the site specific principles of LPS 48 in the CELPS is "contributions to education and health infrastructure".

In the case of the current proposal for 134 dwellings, this is expected to generate:

25 primary children (134 x 0.19) – 1 SEN
20 secondary children (134 x 0.15) – 1 SEN
2 SEN children (134 x 0.51 x 0.023%)

The development is expected to impact on secondary school and SEN places in the locality. Contributions which have been negotiated on other developments are factored into the forecasts both in terms of the increased pupil numbers and the increased capacity at schools in the area as a result of agreed financial contributions. The analysis undertaken has identified that a shortfall of school places still remains.

Special Education provision within Cheshire East Council currently has a shortage of places available with at present over 47% of pupils educated outside of the Borough. It is acknowledged that this is an existing concern, however the 2 children expected from the proposed development will exacerbate the shortfall. The 2 SEN children, who are thought to be of mainstream education age, have been removed from the calculations above to avoid double counting.

To alleviate forecast pressures, the following contributions would be required:

$24 \times £11,919 \times 0.91 = £260,311$ (primary)

$19 \times £17,959 \times 0.91 = £310,511$ (secondary)

$2 \times £50,000 \times 0.91 = £91,000.00$ (SEN)

Total education contribution: £661,822

Without a secured contribution of £661,822 Children's Services would raise an objection to this application. This position is on the grounds that the proposed development would have a detrimental impact upon local education provision as a direct cause from the development. Without the mitigation, 24 primary children, 19 secondary children and 2 SEN children would not have a school place in Poynton, and the proposal would not comply with LPS 48 in the CELPS.

HEALTHCARE

The NHS Eastern Cheshire Clinical Commissioning Group (CCG) has commented on the application noting that Poynton is serviced by two GP practices with a combined patient population of 17,551. As a Key Service Area (identified in the CELPS), there are a number of sites identified for housing development within Poynton and surrounding geographical areas. Additional growth in patient numbers will add pressures to the GP practices, with an increase in clinical and non-clinical staff required in order to meet these future patient needs.

The two GP practices in Poynton - Priorsleigh Medical Centre and McIlvride Medical Centre - had 17,551 registered patients in January 2018. The predicted number of patients in 2028 (based on annual 1% growth plus known planned housing developments) is 20,390.

Priorsleigh Medical Centre operates from a purpose built, GP owned premises, which opened in 1995 and is situated in the centre of Poynton. Increases in the local ageing population, along with a vision to transform the way in which Primary Care is delivered has given rise for further development and expansion of the Medical Centre going forward. Expansion of the building has been supported by the CCG via the NHS England Estates & Technology Transformation Fund (ETTF), however it is acknowledged that this NHS funding source will not be sufficient to cover 100% of any planned expansion costs.

Mcllvride Medical Practice operates from GP owned premises in the centre of Poynton. The GP practice consists of a single building which is now at capacity. Due to the location of the building, expansion options are limited. Development to restructure the internal layout of the GP practice would be supported by the CCG in order to optimise existing space.

Additional growth in patient numbers will add further pressures to the two GP practices, with an increase in clinical and non-clinical staffing numbers will require expansion or redevelopment of the Priorsleigh site and internal structural changes at the Mcllvride sites. Both Priorsleigh Medical Centre and Mcllvride Medical Centre are open to further development of their sites for the benefit of the local patient population, and there is an expectation that further development will be needed in order to meet the projected increase in local population over the next 5-10 years. Both GP practices are therefore actively engaged with the CCG in investigating potential primary care estates development opportunities. Both GP practices have identified estates development work which, if funding can be sourced, would allow for further expansion and greater utilisation of the buildings.

A financial contribution is therefore sought as part of this application, which is based on a calculation consisting of occupancy x number of units in the development x £360. This is based on guidance provided to other CCG areas by NHS Property Services.

Size of Unit	Occupancy Based on Size of Unit	Assumptions Health Requested per unit	Need/Sum
1 bed unit	1.4 persons	£504 per 1 bed unit	
2 bed unit	2.0 persons	£720 per 2 bed unit	
3 bed unit	2.8 persons	£1008 per 3 bed unit	
4 bed unit	3.5 persons	£1260 per 4 bed unit	
5 bed unit	4.8 persons	£1728 per 5 bed unit	

The proposed development comprises:

16 x 5 bed units
32 x 4 bed units
33 x 3 bed units
25 x 2 bed units
28 x 1 bed units

As such the CCG requests a contribution to health infrastructure via Section 106 of £133,344 based on the proposed 134 dwellings, and the occupancy stated above. This would comply with policy LPS 57 of the CELPS.

LIVING CONDITIONS

Saved policy DC38 of the MBLP states that new residential developments should generally achieve a distance of between 21m and 25m between principal windows and 14m between a principal window and a blank elevation. This is required to maintain an adequate standard of privacy and amenity between residential properties, unless the design and layout of the scheme and its relationship to the site and its characteristics provide a commensurate degree of light and privacy between buildings.

However the CE Design Guide states separation distances should be seen as guide rather than a hard and fast rule. The Design Guide does however acknowledge that the distance between rear facing habitable room windows should not drop below 21m. 18m front to front will also provide a good level of privacy, but if this applied too rigidly it will lead to uniformity and limit the potential to create strong streetscenes and variety, and so this distance could go down as low as 12m in some cases.

The nearest existing residential properties are located along the eastern spur of Hazelbadge Road and a separation distance of over 30 metres is achieved between these existing dwellings and the proposed development. Properties to the east on Kirkstall Close, Furness Close, Whitby Close and Easby Close are over 50 metres from the nearest of the proposed dwellings on the opposite side of the vegetated Brook corridor. These relationships with the nearest existing dwellings are considered to result in acceptable standards of amenity for existing and proposed residents having regard to the distance guidelines set out above.

Similarly the layout within the site ensures the relationships between the new dwellings result in acceptable standards of space, light and privacy for future occupants. The development is therefore considered to be in accordance with policies DC3 and DC38 of the MBLP.

NOISE

Policy SE12 of the CELPS seeks to ensure all development is located and designed so as not to result in a harmful or cumulative impact upon air quality, surface water and groundwater, noise, smell, dust, vibration, soil contamination, light pollution or any other pollution which would unacceptably affect the natural and built environment, or detrimentally affect amenity or cause harm. Developers will be expected to minimise, and mitigate the effects of possible pollution arising from the development itself, or as a result of the development (including additional traffic) during both the construction and the life of the development. Where adequate mitigation cannot be provided, development will not normally be permitted.

Policy DC14 of the MBLP states that development may be permitted provided that the effects of noise can be mitigated by soundproofing measures.

The applicant has submitted an acoustic report which considers the impact of the noise from the nearby road, rail and school on the proposed development in accordance with BS8233:2014 Guidance on Sound Insulation and Noise Reduction for Buildings Department of Transports (1988) Calculation of Road Traffic Noise (CRTN). This is an agreed methodology for assessing noise of this nature.

The noise report identifies that railway noise is sufficiently low, and no mitigation measures are necessary in respect of railway noise. However, acoustic fencing is recommended for the gardens of houses that will be nearest to the school and its playing field. The assessment of noise impact from the use of Hazelbadge Road to access the development concluded that traffic generated by the proposed development would not result in any significant noise impact upon existing dwellings on Hazelbadge Road. Environmental Health advises that the conclusions of the report and methodology used are acceptable. The proposed mitigation can be secured by condition.

A number of the letters of representation raise concern about the impact of the development upon the adjacent school particularly during the construction phase in terms of noise, as well as vibration, dust etc. Impacts during the construction phase are a temporary manifestation of the development process, and as such will be temporary in nature. A residential development itself does not raise any significant concerns in this regard and it is considered that a construction environmental management plan (CEMP) can ensure that any such impacts upon existing development are minimised. The submission and implementation of a CEMP can be secured by condition.

Subject to the conditions referred to above, the proposal will comply with policy SE12 of the CELPS and DC14 of the MBLP.

AIR QUALITY

As noted above, policy SE12 of the Local Plan states that the Council will seek to ensure all development is located and designed so as not to result in a harmful or cumulative impact upon air quality. This is in accordance with paragraph 181 of the NPPF and the Government's Air Quality Strategy.

When assessing the impact of a development on local air quality, it is necessary to have regard to (amongst other things) the Council's Air Quality Strategy, the Air Quality Action Plan, Local Monitoring Data and the EPUK Guidance "Land Use Planning & Development Control: Planning for Air Quality May 2017).

Air quality impacts have been considered within the air quality assessment submitted in support of the application. The report considers whether the development will result in increased exposure to airborne pollutants, particularly as a result of additional traffic and changes to traffic flows. The assessment uses ADMS Roads to model Nitrogen Dioxide (NO₂) and Particulate Matter (PM₁₀) impacts from additional traffic associated with this development and the cumulative impact of committed development within the area.

A number of modelled scenarios have been considered within the assessment. These were:

- Scenario 1 (S1): '2016 Baseline' representing the 'existing' air quality situation in 2016
- Scenario 2 (S2): '2022 Without Development' (without the proposed development in place, but with the A6 Manchester Airport Relief Road (A6MARR) and the Poynton Relief Road (PRR) in place);
- Scenario 3 (S3): '2022 With Development' (with the proposed development, the A6MARR and the PRR in place

The assessment concludes that the impact of the future development on the chosen receptors will be negligible with regards to NO₂, PM₁₀ and PM_{2.5} concentrations, with none of the receptors experiencing greater than a 1% increase.

However, it is necessary to consider the cumulative impact of a large number of developments in a particular area. Particularly, the impact of transport related emissions on Local Air Quality. Taking account of the uncertainties with modelling, the impacts of the development could be significantly worse than predicted.

Poor air quality is detrimental to the health and wellbeing of the public and also has a negative impact on the quality of life for sensitive individuals. It is therefore considered appropriate that mitigation should be sought in the form of direct measures to reduce the adverse air quality impact.

A travel plan will be implemented for this site, which will help to promote alternatives to the private car, in the interests of air quality. However, further mitigation measures are recommended to reduce the impact on sensitive receptors in the area. Therefore, conditions are recommended relating to the provision of electric vehicle infrastructure across the site, and the provision of anti-idling signage in order to prevent accumulations of poor air quality in the area around the school, particularly where the designated short stay parking bays will be. Subject to these conditions, the proposal will comply with the air quality aspects policy SE12 of the CELPS.

Environmental Health also recommended a condition relating to the provision of ultra low emission boilers; however such a condition is not considered to be necessary or reasonable.

PUBLIC RIGHTS OF WAY

There are three public rights of way within the site, and the original layout showed that Public Footpaths Poynton with Worth nos. 43 & 46 (which head north east and north west respectively) will be obstructed by the proposed development. As there was no mention of the legal alignments requiring a diversion order under s. 257 of the TCPA 1990 or being appropriately accommodated (not along the principal streets) within the site layout the Public Rights Way team objected to the proposal.

The application documents originally showed the Public Right of Way running along the estate roads. It should be noted that national guidance on Rights Of ways states that any alternative alignment [of a Public Right of Way] should avoid the use of estate roads for the purpose wherever possible and preference should be given to the use of made up estate paths through landscaped or open space areas away from vehicular traffic.

Revised plans have been received that now divert footpaths 43 and 46 through the green infrastructure to the east of the site, away from estate roads. The Rights of Way team have confirmed that the revised plans achieve the requirement to seek off road diversion routes for the public footpaths affected by development, and are therefore a welcome amendment. They also note that there would be a number of details to iron out when an application to divert under s.257 TCPA is made.

The other public right of way Footpaths Poynton with Worth no. 88 is unaffected by the proposal.

ACCESSIBILITY

Pedestrian and cycle access will be provided from the same location as the vehicular access off Hazelbadge Road. Foot and cycle access will be available to nearby facilities, namely the primary school, railway station and shops/local services in Poynton centre, which is less than 700m from the application site. The development will also provide a footpath link from the north of the site onto the existing public right of way network north of the site boundary.

Poynton railway station, which provides frequent rail services to Stockport/Manchester and Macclesfield is less than 400m from the application site and is within walking distance along existing footways.

Bus services are accessed via nearby bus stops which have services to Macclesfield and Poynton/Stockport. Further details on this service are discussed in the Highways section below.

The local plan allocation for this site (LPS 48) requires *“the creation of links with footpaths to the north and east; and pedestrian and cycle links to new and existing residential areas, employment areas, shops, schools and health facilities, including improved pedestrian links to the town centre, and the railway station.”*

In this regard, the Public Rights of Way team originally requested that the applicant delivers improvements such as:

- a) Provide a fenced surfaced path for Poynton Footpath No. 43 which runs northwards from the site along the edge of an agricultural field to Lower Park Road for pedestrians and potentially cyclists.
- b) Widen Poynton Footpath No. 88 to a minimum 3m usable width, including the bridge structure, as a shared use pedestrian/cyclist route.
- c) The improvement of the permissive path within Cheshire East land on the east side of the brook – complaints are received from the public about the condition of this path: under the development proposals the footfall would increase and therefore worsen the condition.

The development as proposed provides links with footpaths to the north and east. As such, a fenced 3m wide surfaced path for FP No. 43 running from the north of the site is not considered to be necessary to make the development acceptable in planning terms. This would also require encroachment into the Green Belt and require land that is outside of the control of the applicant or the Council. Footpath 88 leads eastwards from the site over the Brook, but opportunities for widening are restricted between two residential properties on Kirkstall Close, which prevents the widening of its full length from the site to Kirkstall Close. The PROW team have since confirmed that due to the constraints of the path width at its eastern end, and the limitations of the trajectory into the housing estate, rather than the town centre, it is recognised that the quality and width of the bridge structure is considered to be adequate for present and future footfall.

As noted above, pedestrian and cycle access will be provided from the same location as the vehicular access off Hazelbadge Road, which will provide suitable links to those facilities specified in LPS 48. With regard to the permissive path, it appears that there is an existing issue with the surface of this path, and it is considered to be unreasonable to expect the developer to address a pre-existing issue. In addition to this the development includes diverted public rights of way routes through the green infrastructure within the site, which connect into the wider PROW network.

There are existing cycle lanes along Chester Road which start to the east of the pedestrian crossing on Chester Road and lead to the shared surface in the town centre. These lanes have faded over time and do require re-painting. Given that this will be the main route to the town centre for cyclists, and having regard to the requirements for cycle lane provision in

policy LPS 48, it is considered that in order to promote cycling as a viable option for travel to and from the site, the developer should fund the painting of these lanes, which can be secured as part of the s106.

Subject to this improvement scheme, in terms of the accessibility of the site for pedestrians and cyclists, the proposal is considered to comply with the relevant requirements of LPS 48.

HIGHWAYS

Hazelbadge Road runs in a north-south direction and provides access to the existing primary school as well as other small residential roads. Along the length of Hazelbadge Road, the carriageway measures 6.1m in width with footways between 1.8m and 2m wide on either side of the carriageway. There is a kerbed build-out in the vicinity of the school which acts as traffic calming and provides a shorter pedestrian crossing point. The carriageway width in this location is effectively narrowed as on-street parking takes place in this location.

Access to Hazelbadge Road is currently achieved through a simple priority controlled T junction with the A5149 Chester Road forming the major arm. The nearby A6 extension to Manchester Airport, also known as the A6 MARR, is now operational having opened in October 2018.

To the east of the junction of Hazelbadge Road and Chester Road there is a signalised pedestrian crossing. To the east of this crossing there is a cycle lane between the footway and carriageway on both the north and south sides of the road. This runs towards Poynton town centre and terminates immediately prior to the shared surface arrangement at the A5149 Chester Road / A523 London Road / Park Lane double mini roundabout.

Along Chester Road there are bus stops as well as an eastbound bus stop with shelter and timetable information to the west of the railway line

Public Transport

Pedestrian and cycle matters have been considered above. In terms of public transport LPS 48 requires *“Contributions to existing and the provision of new, public transport links to the town centre or contributions towards or the provision of land for additional car parking for Poynton Railway Station”*. CEC Highways have requested a financial contribution of £100,000 towards bus service improvements.

The policy refers to public transport links to the town centre. The town centre is less than 700m from the application site, and is approximately 300m from the nearest bus stop at Hilton Grove. Contributions are usually sought to mitigate for the impact of a development. Having regard to the distances involved, it is considered to be very unlikely that new residents from the application site would walk to the bus stop and then get on a bus for the last 300m (approximately) of the journey to the town centre. Whilst this might happen, it would not be at a level that would place additional pressure on bus services to justify a financial contribution. This does mean that there would be some conflict with LPS 48, however given the circumstances outlined above and other contributions the applicant is making towards strategic highways projects of the Council (the Poynton Relief Road), this conflict is considered to be acceptable.

CEC Highways have also requested £5,000 to facilitate the provision of a bus stop opposite Hilton Grove, incorporating a flag pole, timetable information and appropriate kerbing. This is considered to be justified as it does help to increase the sustainability of the site by providing a bus stop for services to wider areas outside of Poynton.

With regard to the railway station car park, it is understood that since the station has started to charge to park here, it is underused, with vehicles being displaced to surrounding residential streets including, as many of the representations note, Hazelbadge Road. The case officer has visited the railway station on 3 separate occasions and every time spaces have been available. In addition given the proximity of the application site to the station, it is unlikely that residents would drive to the station. Once again a contribution or additional land for car parking is not considered to be necessary to make the development acceptable in planning terms, and again for the same reasons as the bus service contribution, this conflict with LPS 48 is considered to be acceptable.

Network Rail has provided extensive comments on the application, which include a request for financial contributions towards:

- *Level access to the ticket office area – Currently access is via the gate adjacent to the station building, this would require mods to the door & potentially ramps - £15k*
- *Cycle hoops adding to both sides of the station – £10k*
- *Resurfacing of the road leading up to the station building with additional car parking & traffic management - £30k*
- *Improve platform surfaces - £30k*
- *Store room to be converted for community use - £10k*
- *Overall cosmetic investment in the station facilities (painting, glazing in windows, new fencing etc) - £25k*

These appear to be existing issues that are not necessary to make the development acceptable in planning terms; not directly related to the development; and not fairly and reasonably related in scale and kind to the development. Accordingly they cannot be sought from the applicant. The other comments raised by network rail can be addressed by an informative / note on the decision notice to make the applicant aware of their obligations towards the railway.

Safe and suitable access and parking provision

Vehicular access to the development will be provided from Hazelbadge Road through the continuation of the existing carriageway into the site. The access road within the site will provide a standard 5.5m wide carriageway and 2m wide footways on both sides of the access road.

Immediately north of the current adopted highway boundary a mini-roundabout will provide access to the eastern and western sides of the site. This mini-roundabout will also assist with turning movements associated with the nearby school.

To assist the movement of vehicular traffic the widening of Hazelbadge Road on the eastern side of the carriageway to provide on-street parking lay-bys is proposed by the applicant. This will consist of a row of short-stay parking bays and will be located adjacent to the existing primary school. As part of the development it is proposed to introduce waiting restrictions to assist the free-flow of traffic, particularly at busy school drop off / pick up times. It is also

proposed that Hazelbadge Road and the entirety of the site are subject to a 20mph speed limit. A contribution to fund the required traffic regulation order will be secured as part of the s106 agreement.

In addition to the above, the priority T junction of Hazelbadge Road / A5149 Chester Road will be widened to create a 'one lane plus flare' exit onto A5149 Chester Road. This will enable left and right-turning traffic to queue at the junction simultaneously, thereby assisting capacity. The improvements at this junction utilise land currently forming part of the residential gardens of 80 and 82 Chester Road, which is within the developer's control as demonstrated in the submitted documentation. The widening also allows an increase in the radii at the junction and widens the footway from 1.8m to 2.0m on the eastern side of Hazelbadge Road. The effect of this is that visibility splays of 2.4m x 43m are achievable in both directions along the A5149 Chester Road, which are in accordance with the current posted speed limit of 30mph.

The internal road network has been assessed and the principle of the design is acceptable subject to: service strips of 2.0m being provided on both sides of roads to become part of the adopted highway; the carriageway serving plots 123 to 132 shall be a minimum width of 4.5m, and; the proposed block material must comply the pallet of materials detailed within the Cheshire East Design Guide (May 2017). Amendments to the plans have been made to address these issues.

The movements of service vehicles including a refuse vehicle have been undertaken by means of a swept path analysis demonstrating a large refuse vehicle can be satisfactorily accommodated.

Parking within the site is compliant with current Cheshire East parking standards which state that for a principal town or key service centre, the following apply:

- 1 parking space per 1 bedroom dwelling
- 2 parking spaces per 2/3/more bedroom dwelling

Network Capacity

The capacity of the Hazelbadge Road junction with Chester Road has been tested using junction modelling for various traffic flow scenarios in both the morning and evening peak hours. The traffic flows utilised in these models have been informed by agreed (between Highway Authority and the applicant) traffic generation figures resulting from the proposed development.

The assessments have been carried out to include base traffic flows as predicted with the A6MARR (opened in 2018) and the Poynton Relief Road due to open in 2022.

These results demonstrate that the traffic capacity and associated queueing will remain broadly the same as the scenario with no improvements and no development traffic. This illustrates that the proposed improvements to the junction mitigate the impact of the proposed development traffic and are therefore acceptable.

This analysis does highlight some queuing and delay which is demonstrated by the highest demand showing to be on Hazelbadge Road during the early afternoon, which is the peak hour for the school. Delays of up to 22 seconds are experienced on average for cars leaving Hazelbadge Road at this time.

The effect of the opening of the A6MARR on Chester Road has resulted in a slight increase in traffic flows which have a small negative effect on capacity on the Hazelbadge Road junction. However the opening of the Poynton Relief Road (PRR) scheme will reduce traffic flow along Chester Road hence creating an improvement in the operation of the Hazelbadge Road/Chester Road junction. For this reason a financial contribution of £5,500 per dwelling towards the implementation of the PRR scheme is requested by CEC Highways.

The proposal therefore raises no significant highway safety or traffic generation issues, in accordance with policy DC6 of the MBLP. Conditions relating to the implementation of the highway improvement works, provision of an amended travel plan and a construction management plan are recommended.

TREES / LANDSCAPE

Trees

The majority of the mature trees associated with the site are protected as part of the MBC (Poynton – Lower Park Road) Tree Preservation Order 1974. Accordingly the application is supported by an Arboricultural Impact Assessment (AIA) which identifies that in order to facilitate development the removal of 13 individual trees (5 Cat B, 4 Cat C, 4 Cat U) and 12 Groups including 4 parts of groups (9 Cat B, 3 Cat C). Parts of 2 woodland areas (cat B) would also be removed to preserve the species mix and allow better specimens to develop. The majority of these trees are small early mature Oaks which are not formally protected; these trees can be replaced and accommodated as part of any proposed landscape scheme. The felling and removal of those trees which form part of the on site 1974 TPO is not contested, the reasons provided are justified; replacement planting will be required and this can broadly be accommodated within the specific group designation.

The original layout raised a number of concerns in terms of construction implementation and social proximity. However the revised plans adequately addressed all of these issues. The remaining development configuration is considered to be acceptable with adequate space available to ensure that any problems associated with shading and seasonal nuisance does not result in future pressure to allow inappropriate pruning or felling of the protected trees, and are considered defensible.

The Arboricultural officer raises no objections to the proposal subject to conditions. The proposal is considered to comply with policy DC9 of the MBLP and SE5 of the CELPS.

Landscape

The site currently forms an attractive transition between the more urban areas to the south and east and the wider rural landscape to the north and west. The green infrastructure network identified on the site plan indicates the intention of retaining areas of woodland to the west and south, a green buffer along the eastern boundary and an existing line of mature trees towards the central part of the site. The Design and Access Statement also identifies opportunities for additional tree planting within rear gardens and within the corridor of open space along the eastern boundary.

The Design and Access Statement identifies a landscape strategy for the site, namely that existing elements that make up the site's green infrastructure should be retained, the

retention of existing trees and hedges along Hazelbadge Road and recognition of the wider landscape setting and views into and out of the site. LPS 48 identifies one of the site specific principles of development as *“Appropriate boundary treatments should be implemented to provide a clearly defined Green Belt boundary that is likely to endure”*. The original layout showed a number of properties, along the northern edge of the site, as having gable ends hard up against the northern boundary, facing the open countryside to the north and a number of other properties that would have the proposed native hedgerow along the northern boundary as both a site and domestic garden boundary. The close proximity of some of the proposed dwellings to this proposed hedgerow boundary would have influenced its long term viability and success.

The revised plans significantly reduce the number of buildings along this boundary to create a much less dense boundary to the Green Belt, and provide a 5 metre wide landscape buffer to the boundary. This buffer is considered to satisfy the requirement for appropriate treatment of the Green Belt boundary, in accordance with LPS 48. However, this has resulted in an increase in the scale of 3 buildings that now sit close to the Green Belt boundary, but this is considered to be an acceptable compromise. No significant landscape impacts are now identified, and subject to standard landscape conditions the proposal is considered to comply with policy SE4 of the CELPS.

ECOLOGY

An updated ecological assessment has been submitted with the application, and the following matters are relevant to the proposal. It should also be noted that whilst the application has been with the Council for some time, the nature conservation officer has advised that the ecological reports that have been submitted can still be relied upon.

Priority Habitats

LPS 48 of the CELPS requires *“any woodland, priority habitats or habitats of Local Wildlife Site quality on the site should be retained and buffered by areas of open space/habitat creation”*.

Approximately 4.73ha of the semi-improved grassland,(which meets the criteria to be designated as a Local Wildlife Site) will be lost from the site in order to facilitate the proposed development. In addition to this, a small area of the semi-natural broad-leaved woodland in the west of the site will be lost, along with ephemeral pond P17. Furthermore all of the tall ruderal and bare ground habitats will be lost as a result of the development proposals. These areas cover approximately 5 hectares, which is virtually the whole of the developable area of the site. If all of these habitats were retained, the site could not be developed. Clearly this would be contrary to the overriding objectives of the policy, to provide housing.

On other sites within the Borough the Council has accepted a financial contribution to offset the loss of habitats, in order to fund the provision or enhancement of other sites for nature conservation purposes. However, in this case, due to the extent of habitat loss, the applicant was requested to find a site that could be used to directly mitigate for the impact.

This process was carried out in consultation with the Council's nature conservation officer, and was focused within the Cheshire East area, in order to provide compensatory habitat as close to the Hazelbadge Road site as possible. The benefits of the offsetting site location

being within the Cheshire East area represent a best practice approach, in order to replace habitats close to where they have been lost.

The Cheshire Wildlife Trust (CWT) has recently acquired a 7ha nature reserve on the eastern side of Kerridge Hill, Macclesfield, approximately 8km south east of Hazelbadge Road. The site comprises a mix of scrub, semi-natural grassland and plantation woodland. CWT is now seeking funding for the restoration of the site to improve its value for wildlife and a scheme for provision of this funding as offsetting for the Hazelbadge Road development has been agreed between the applicant, the CWT and the Council's nature conservation officer. The scheme includes grassland restoration, woodland restoration and grassland management, and the total cost for this will be £46,137.

The nature conservation officer has confirmed that the proposed offsetting compensation package will adequately address the compensation requirement for this application. The financial contribution will be secured as part of the s106 agreement.

Poynton Brook

Site plans include the retention of the trees along the brook margin. The submitted *Ecological Assessment* (TEP, January, 2018) recommends the production of a Construction Management Plan to set out how any indirect adverse impact on Poynton Brook will be avoided. This should include the fencing off of a buffer zone during the construction phase, and an appropriate condition is recommended to secure this plan.

Great Crested Newts

Great Crested Newts (GCN) have been recorded within the application site. The usage of the site by GCN is likely to be limited to a small population. The loss of aquatic/terrestrial habitat on this site in the absence of mitigation is likely to have a medium impact on GCN at the local level and a low impact upon the conservation status of the species as a whole.

Article 12 (1) of the EC Habitats Directive requires Member states to take requisite measures to establish a system of strict protection of certain animal species prohibiting the deterioration or destruction of breeding sites and resting places.

In the UK, the Habitats Directive is transposed as The Conservation of Habitats and Species Regulations 2010. This requires the local planning authority to have regard to the requirements of the Habitats Directive so far as they may be affected by the exercise of those functions.

It should be noted that since a European Protected Species has been recorded on site and is likely to be adversely affected by the proposed development, the planning authority must consider the three tests in respect of the Habitats Directive, i.e. (i) that there is no satisfactory alternative, (ii) that the development is of overriding public interest, and (iii) the favourable conservation status of the species will be maintained. Evidence of how the LPA has considered these issues will be required by Natural England prior to them issuing a protected species license.

Alternatives

The site was identified as a development site following an extensive local plan process, which included removing land from the Green Belt. As such there are no known alternatives.

Overriding public interest

The proposed development will meet an identified social need for housing within Poynton and within the wider Cheshire East area, which is considered to be of overriding public interest.

Mitigation

The submitted report recommends the creation of two new ponds, the enhancement of two existing ponds, and the creation of a native species connective hedgerow along the northern site boundary, as a means of compensating for the loss of habitat and also recommends the timing and supervision of the works to reduce the risk posed to any GCN that may be present when the works are completed.

The nature conservation officer advises that if planning consent is granted the proposed mitigation/compensation is broadly acceptable. However to ensure that the favourable conservation status of GCN is maintained it is recommended that the 5m buffer zone along the northern site boundary in addition to, and inclusive of, the native species hedgerow is included as part of the mitigation strategy. The buffer zone should remain undeveloped and not contain any features such as gardens, car parking, etc.

Bats

The tree known as T31 in the *Ecological Assessment* (TEP, January 2018) was classed as offering low potential to roosting bats due to a potential roost feature. The tree is proposed for removal under the current plans. However, the potential risks posed to bats by the removal of the tree will be adequately mitigated against by the implementation of the reasonable avoidance measures detailed within section 6.8 of the Ecological Assessment report. Accordingly a condition is recommended to secure the implementation of the report's recommendations.

Badgers

Badger activity has been recorded on site. An updated badger survey was carried out on 13 May 2019, which confirmed that the badger situation on site had not significantly changed since the last survey in June 2017. One sett is proposed to be closed after monitoring. The applicant's Badger Mitigation Strategy is acceptable, and a condition is recommended to ensure the development is carried out in accordance with the submitted badger mitigation strategy (TEP, January 2018).

Breeding Birds

If planning consent were to be granted a condition requiring a nesting bird survey is recommended.

Reptiles

There is a considered low risk that the proposed development may have an adverse impact upon reptile species which may occur in the surrounding habitat. The nature conservation officer is satisfied that the risks will be adequately mitigated against by the implementation of the reasonable avoidance measures detailed within the Reptile Reasonable Avoidance Measures report (TEP, 04/01/2018), which can be secured by condition.

Wildlife sensitive lighting

Prior to the installation of any lighting, details should be submitted for approval to ensure that lighting does not have any adverse impacts upon wildlife. The scheme should include dark areas and avoid light spill upon boundary hedgerows and trees. The scheme should also include details of: number and location of proposed luminaires; luminaire light distribution type; lamp type, lamp wattage and spectral distribution; mounting height; orientation direction; beam angle; type of control gear; proposed lighting regime; and projected light distribution maps of each lamp. An appropriate condition is therefore recommended.

Schedule 9 Species

The applicant should be aware that Himalayan Balsam, Japanese Knotweed and Cotoneaster species are present on the proposed development site. Under the terms of the Wildlife and Countryside act 1981 it is an offence to cause these species to grow in the wild.

Conclusion on ecological matters

Whilst the proposal does not strictly comply with the ecological criteria set out under LPS 48 due to the loss of priority habitats, adequate mitigation is provided on an alternate site. As noted, it would be virtually impossible for any meaningful development of the site to comply with these criteria. In addition to this, whilst policy SE3 of the CELPS seeks to resist development which has a significant adverse impact upon sites comprising priority habitats (amongst other designations), it does allow it where the reasons for, or the benefits of, the proposed development outweigh the impact of the development. The benefits of providing much needed housing within the local area are considered to outweigh the impact of the development in this case. The proposal will ultimately positively contribute to the conservation and enhancement of biodiversity in accordance with policy SE3 of the CELPS. No further ecological issues are raised, and it is therefore considered that the ecological aspects of the proposal comply with the development plan as a whole.

LAYOUT / DESIGN

Amongst other criteria, policy SD2 of the CELPS expects all development to contribute positively to an area's character and identity, creating or reinforcing local distinctiveness in terms of:

- a. Height, scale, form and grouping;
- b. Choice of materials;
- c. External design features;
- d. Massing of development - the balance between built form and green/public spaces;
- e. Green infrastructure; and
- f. Relationship to neighbouring properties, street scene and the wider neighbourhood

Policy SE1 of the CELPS expects housing developments to achieve Building for Life 12 (BfL12) standard, and that development proposals consider the wider character of a place in addition to that of the site and its immediate context, to ensure that it reinforces the area in which it is located. These principles are also reflected in the CEC Design Guide. The relevant BfL12 headings are considered below:

Connections

The site is a greenfield site located on the north western edge of the Poynton settlement, positioned between Poynton Brook and the railway line. The site is accessed from a single point of access from Hazelbadge Road. Footpaths 43 and 46 cross the site and provide

access to the north, and are now proposed to be diverted through the green infrastructure at the eastern side of the site. The diverted footpaths will also link in with footpath 88 which crosses the Brook ensuring connectivity to the surrounding area. To reach the nearest shops / facilities in Poynton centre, access is likely to be along Hazelbadge Road and Chester Road.

Facilities and services

Poynton centre and all its facilities and services is approximately 700m from the application site, and within walking distance. The site is therefore well served by existing facilities.

Public transport

There is a bus stop approximately 300m from the site which provides services to Middlewood and Hazel Grove. Other services to Macclesfield and Stockport are available from the town centre. In addition the railway station is less than a 5 minute walk from the application site and has regular services north to Manchester and south to Stoke-on-Trent. There is a cycle path along Chester road to the east of the pedestrian crossing, which leads to and from the shared space within the town centre.

Meeting local housing requirements

Draft policy HOU 9 of the PNP states that *“given the size and location of the Hazelbadge Road site, a mixture of 2, 3, and 4 bedroom properties should be achievable”*. The evidence base for this is not clear, however the aspiration of the policy is noted, and the majority (90) of the 134 dwellings proposed are 2, 3 or 4 bedroom properties. Provision of 1 (x28) and 5 (x16) bedroom properties increases the mix of units available. The 1 bedroom properties also meet an identified affordable housing need.

Character

A basic study of local vernacular, character and materials is included within the Design & Access Statement. The proposed houses are generally a standard product, although additional detailing and materials for some units has been requested to respond to the context of the site. For example, the elevations to the apartment blocks have been amended to give more acknowledgement to their rural edge location with the inclusion of agricultural references such as black weatherboard cladding, which also gives the buildings a more recessive appearance in the landscape, simpler window designs, exposed eaves and lower ridge heights. Corner plots turn corners well with dual aspect elevations. The density of the developable area of the site is 31 dwellings per hectare, or of the entire site it is 16 dwellings per hectare. The requirement for 30 dwellings per hectare within draft policy HOU 16 of the PNP is acknowledged, however the proposed density is considered to be acceptable given that the development is providing fewer dwellings than the site is allocated for.

A variety of building heights are proposed, up to 11.2m for the tallest of the three-storey apartments, and some properties have chimneys which help to create an interesting and varied roofscape and skyline. The apartments are located close to the northern boundary where the site interfaces with the Green Belt. Some concern has been raised within the representations about the appropriateness of the apartments in this location. The density of the development along its northern edge has been reduced and only the three apartment buildings are proposed along this 380m long boundary. The compromise to this being that the height of the buildings has increased. As noted above, amendments to the materials and detailing of the apartments have been received to ensure the relationship between the development and rural fringe is successful. Added to this a proposed 5m wide landscape

buffer is proposed along the northern boundary and, when viewed from the north, the apartments will be seen against the backdrop of the protected trees within the central belt, which are taller than the apartments with most being between 13m and 16m in height. It should also be noted that three-storey structures are not alien features to Poynton. Three-storey properties are present on Chester Road, opposite the entrance to Hazelbadge Road. For these reasons the character of the development is considered to be acceptable.

Working with the site and its context

The existing features within the site are predominantly the tree cover to the east alongside the Brook, the woodland to the west, and the central belt of protected trees. The Green Belt boundary is also a positive aspect of the site. The interface with the Green Belt has been discussed above, and all of these positive features of the site are retained as part of the development and have informed the layout and form of the development. The proposal is outward facing and provides a green buffer to the edges, softening the appearance from the long views over the adjacent landscape.

Some concern has been raised regarding the proposed road spur to the north of the site. One of the questions in the Urban Design Checklist within the design guide is whether “*the layout does allow for connections out into the surrounding area, even if they cannot be delivered at the present time*”. In addition to the public rights of way connections this spur achieves this, but does not suggest in anyway the acceptability of further development on the land to the north of the site, which is Green Belt.

Creating well defined streets and spaces

There is a defined street hierarchy with streets, lanes and shared drives identified, and areas of public space are well defined. The woodland to the west will be fenced off with railings in the interests of public safety due to the contamination issues associated with this area; however, the ecological value of the woodland will be retained, and will provide an attractive green buffer to the railway line beyond.

Easy to find your way around

The site is easily legible with feature buildings at key nodes. The street hierarchy is reflected in the surface materials, which will need to comply with the requirements of the CEC Design Guide; however, the street hierarchy could also be strengthened further, particularly in relation to the specification of the boundary treatments to the front of plots. This can be picked up as part of landscaping conditions.

Streets for all

Materials, road widths, deflections in the carriageway are all used to reduce vehicle speeds. A 20mph limit is proposed along Hazelbadge Road and the application site in the interests of highway safety. This will help the streets to truly function as shared spaces.

Car parking

A mix of parking solutions is encouraged by the Design Guide to ensure that the street scene is not dominated by vehicles. There is a mix of different parking solutions across the site, however the Design Officer has suggested that there is a concentration of similar solutions in places, particularly where the proposal positions the parking spaces to the front of the units within the curtilage. Whilst these comments are noted, areas where parking is shown to the front of units is broken up by landscaping, which will serve to reduce the dominance of these

vehicles on the street scene. The parking proposals are therefore considered to be in compliance with the design guide.

Public and private spaces

Additional windows have been added to some of the plots to the east of the site to encourage natural surveillance of the Brook area, and the diverted rights of way. The formal and informal play areas also benefit from surveillance from the outward facing properties opposite.

External storage and amenity

Features that encourage sustainable forms of transport, such as secure cycle provision has been provided for those properties that do not have garages, including the apartments.

Design conclusion

For the reasons outlined above it is considered that the proposal will comply with policies SE1 and SD2 of the CELPS and the Cheshire East Design Guide.

ARCHAEOLOGY

The application is supported by an Archaeological Desk-Based Assessment which outlines potential areas of archaeological interest within the application site. The heritage assessment highlights two areas of potential archaeological interest in the western part of the site, which includes brick works and brick kilns and to the south west a gas works. Cheshire Archaeology Planning Advisory Service has consulted relevant mapping and carefully considered the proposed development area, and note that these areas of archaeological potential sit within the area proposed for landscaping (within the woodland to the west of the site). As such, the level of impact on these areas of archaeological potential are minimal and they advise that no further archaeological mitigation is required for the brickworks, brick kiln or gas works. Accordingly, the proposal is considered to comply with the archaeological aspects of policy SE7 and LPS 48 of the CELPS.

FLOODING

Policy SE13 of the CELPS states that developments must integrate measures for sustainable water management to reduce flood risk, avoid an adverse impact on water quality and quantity within the borough and provide opportunities to enhance biodiversity, health and recreation, in line with national guidance.

The majority of the site is located within flood zone 1 with some areas adjacent to Poynton Brook lying in flood zone 2. The site was allocated for residential development following an extensive local plan process, and the sequential test has been applied in line with national planning policy. Policy PG 6 of the CELPS identifies that an additional 650 dwellings should be provided at Poynton. In the absence of alternative, reasonably available sites within or immediately adjacent to Poynton for housing development with a lower probability of flooding, the allocation of Land Adjacent to Hazelbadge Road satisfies the Sequential Test.

A site specific Flood Risk Assessment (FRA) carried out to inform the planning application should demonstrate that the proposed development would be safe from fluvial flooding, and would not increase the risk of flooding elsewhere. The Lead Local Flood Authority (LLFA)

initially raised some concerns regarding the details within the FRA, and discussions have taken place on site with the applicant.

The LLFA has now confirmed that following a site walkover with the applicant and the submission of additional flood risk information, they have no objections to the proposal. There are however, a couple of points which need further consideration relating to an existing overgrown ditch line, and any possible connections to it. In addition further investigation should be carried out to identify whether a cut-off drain along the northern site boundary is required to manage potential overland flow due to the topography in this area. Accordingly, conditions are recommended which require the development to be carried out in accordance with the submitted FRA, and the submission of a surface water drainage strategy. Subject to these conditions, the proposal will comply with the requirements of policy SE13 of the CELPS.

The Environment Agency also raises no objections to the proposal subject to conditions relating to groundwater and contaminated land.

CONTAMINATED LAND

A number of reports have been submitted in support of the application. Works carried out to date in the proposed residential area have identified a low risk, with the top soil chemically suitable for residential use, in all but one location where a piece of asbestos containing cement was identified. This is to be removed and the surrounding soils tested to ensure there are no residual fibres.

On the western side of the site, within the area of the former Poynton Brick Works and Poynton Gas works, which appears to have undergone no demolition or remedial works since closure, contamination has been identified.

The proposed layout originally showed this area as public open space comprising existing woodland, ponds and allotments. Since then, further ground investigations have been carried out, and have identified contamination to be present in surface soils which is not suitable for public open space areas near residential housing. Remedial recommendations were made but these were likely to have a significantly detrimental affect on the existing habitat and protected woodland. The habitat enhancements proposed as part of the on site ecological works include woodland management which will be *“implemented to protect and retain amphibian habitat as well as habitat for other protected species. Native structure planting will provide additional screening for the badger sett in the south of the western woodland while also enhancing the quality of the woodland itself”*.

As a result it is considered that the most appropriate solution is to fence off this entire area to the west of the site and prevent public access to the woodland. Confirmed details of this will need to be provided within a Remediation Strategy and the presence and effectiveness of such fencing will need to be demonstrated within a Verification Report. This area is currently utilised informally, such as by dog walkers, however this is private land and not an area of public open space. Given the remains of the previous structures that formerly existed here, there are physical hazards to anyone using this land. Consequently, fencing this area off will improve public safety and will not remove any identified open space, despite the existing informal use. In addition the nature conservation officer has confirmed that the woodland, which is protected by Tree Preservation Order, contains several important ecological features

including great crested newt breeding ponds and a badger sett and would benefit from public access being restricted to reduce the possible disturbance and contamination of the features.

The Contaminated Land Officer has raises no objections to the proposal subject to conditions relating a remediation strategy, a verification report, the testing of imported soil, and a condition relating to any unforeseen contamination.

Subject to these conditions the proposal will comply with policy DC63 of the MBLP and policy SE12 of the CELPS.

ECONOMIC SUSTAINABILITY

With regard to the economic role of sustainable development, the proposed development will help to maintain a flexible and responsive supply of land for housing as well as bringing direct and indirect economic benefits to Poynton including additional trade for local shops and businesses, jobs in construction and economic benefits to the construction industry supply chain.

OTHER MATTERS

The issues raised in representation that are material planning considerations have been considered by the relevant specialist officers of the Council, and in the preceding text. Many of the representations relate to the impact of the development upon the adjacent primary school and the fact that the school does not benefit from the proposal. There are no planning policies that seek to secure improvements to a school (such as replacement windows) because a development is taking place next door. As noted above, impacts upon the school and local environment generally, during the construction process can be minimised through the implementation of a construction environment management plan. There are also logistical matters relating to construction that can be addressed through a construction management plan, as recommended by CEC Highways, but this will be a matter to be agreed between the applicant the Local Planning Authority and the Highway Authority.

S106 HEADS OF TERMS

Further to the comments above, a s106 agreement will be required to secure:

- 30% affordable housing
- Off site ecological mitigation contribution of £46,137
- Open space provision and management
- Education contributions of:
 - £260,311 (primary)
 - £310,511 (secondary)
 - £91,000 (SEN)
- Indoor sports contribution of £22,500
- Recreation and outdoor sport contribution of £97,000
- Allotments and community gardens contribution of £61,937.50
- Healthcare contribution of £133,344
- Contribution to Poynton Relief Road of £737,000
- £7,000 to fund TRO

- £5,000 to fund bus stop opposite Hilton Grove
- £10,000 contribution towards cycle lane improvement

CIL regulations

In order to comply with the Community Infrastructure Levy (CIL) Regulations 2010 it is necessary for planning applications with legal agreements to consider the issue of whether the requirements within the S106 satisfy the following:

- (a) necessary to make the development acceptable in planning terms;
- (b) directly related to the development; and
- (c) fairly and reasonably related in scale and kind to the development.

The provision of affordable housing, off site ecological mitigation, indoor and outdoor sport (financial) mitigation, Highways (financial) mitigation, the cycle lane contribution and healthcare (financial) mitigation are all necessary, fair and reasonable to provide a sustainable form of development, to contribute towards sustainable, inclusive and mixed communities and to comply with local and national planning policy.

The development would result in increased demand for school places at the secondary school within the catchment area which currently have no projected spare capacity. In order to increase the capacity of the school which would support the proposed development, a contribution towards secondary and SEN school education is required based upon the number of units applied for. This is considered to be necessary and fair and reasonable in relation to the development.

All elements are necessary, directly relate to the development and are fair and reasonable in relation to the scale and kind of the development

PLANNING BALANCE & CONCLUSIONS

The proposal seeks to provide 134 dwellings on a site allocated within the CELPS for around 150 dwellings. Some conflict with the site specific principles of development listed under LPS 48 of the CELPS in terms of the bus service contribution, the railway car park contribution and the retention of habitats on the site has been identified above. However, whilst the contributions towards the bus service to the town centre and the railway car park are not being secured for the reasons set out above, significant contributions are being made towards the Council's strategic project of the Poynton Relief Road to mitigate for the impact of the development. Similarly, whilst LPS 48 requires the retention of habitats, again for the reasons stated above this cannot be achieved if the primary policy objective of delivering housing is to be realised on the site. Adequate off site mitigation is being provided.

The comments received in representation have been given due consideration in the preceding text, and whilst some limited conflict with LPS 48 has been identified, the proposal is considered to comply with the development plan as a whole and is therefore a sustainable form of development. In accordance with policy MP1 of the CELPS, the proposals should therefore be approved without delay.

Accordingly a **recommendation of approval is made subject to conditions and the prior completion of a s106 agreement to secure the following:**

	Requirement	Triggers
Affordable Housing	30% (40 units) of total dwellings to be provided (65% (26 units) Affordable Rent / 35% (14 units) Intermediate)	No more than 80% open market occupied prior to affordable provision within each phase
Off site Ecological Mitigation	£46,137 towards Kerridge Hill Nature Reserve	Prior to commencement
Open Space	a) Open space scheme to be submitted b) Management scheme to be submitted	Prior to commencement Prior to occupation
Indoor Sports Contribution	£22,500 towards Poynton Leisure Centre	Prior to occupation
Recreation & Outdoor Sports Contribution	£97,000 towards Deva Close Playing Fields, Poynton	Prior to commencement
Allotments & Community Gardens Contribution	£61,937.50 towards existing facilities and new opportunities in Poynton	Prior to commencement
Education	Primary £260,311 Secondary £310,511 SEN £91,000	50% Prior to first occupation 50% at occupation of 67 th dwelling
Healthcare	£133,344 towards development of Priorsleigh Medical Centre and McIlvrde Medical Centre	50% Prior to first occupation 50% at occupation of 67 th dwelling
Poynton Relief Road Contribution	£737,000 towards Poynton Relief Road	50% Prior to first occupation 50% at occupation of 67 th dwelling
Traffic regulation Order Contribution	£7,000 to fund the required traffic regulation order for works on Hazelbadge Road	Prior to occupation
Bus Stop Contribution	£5,000 to facilitate the provision of a bus stop opposite Hilton Grove	Prior to occupation

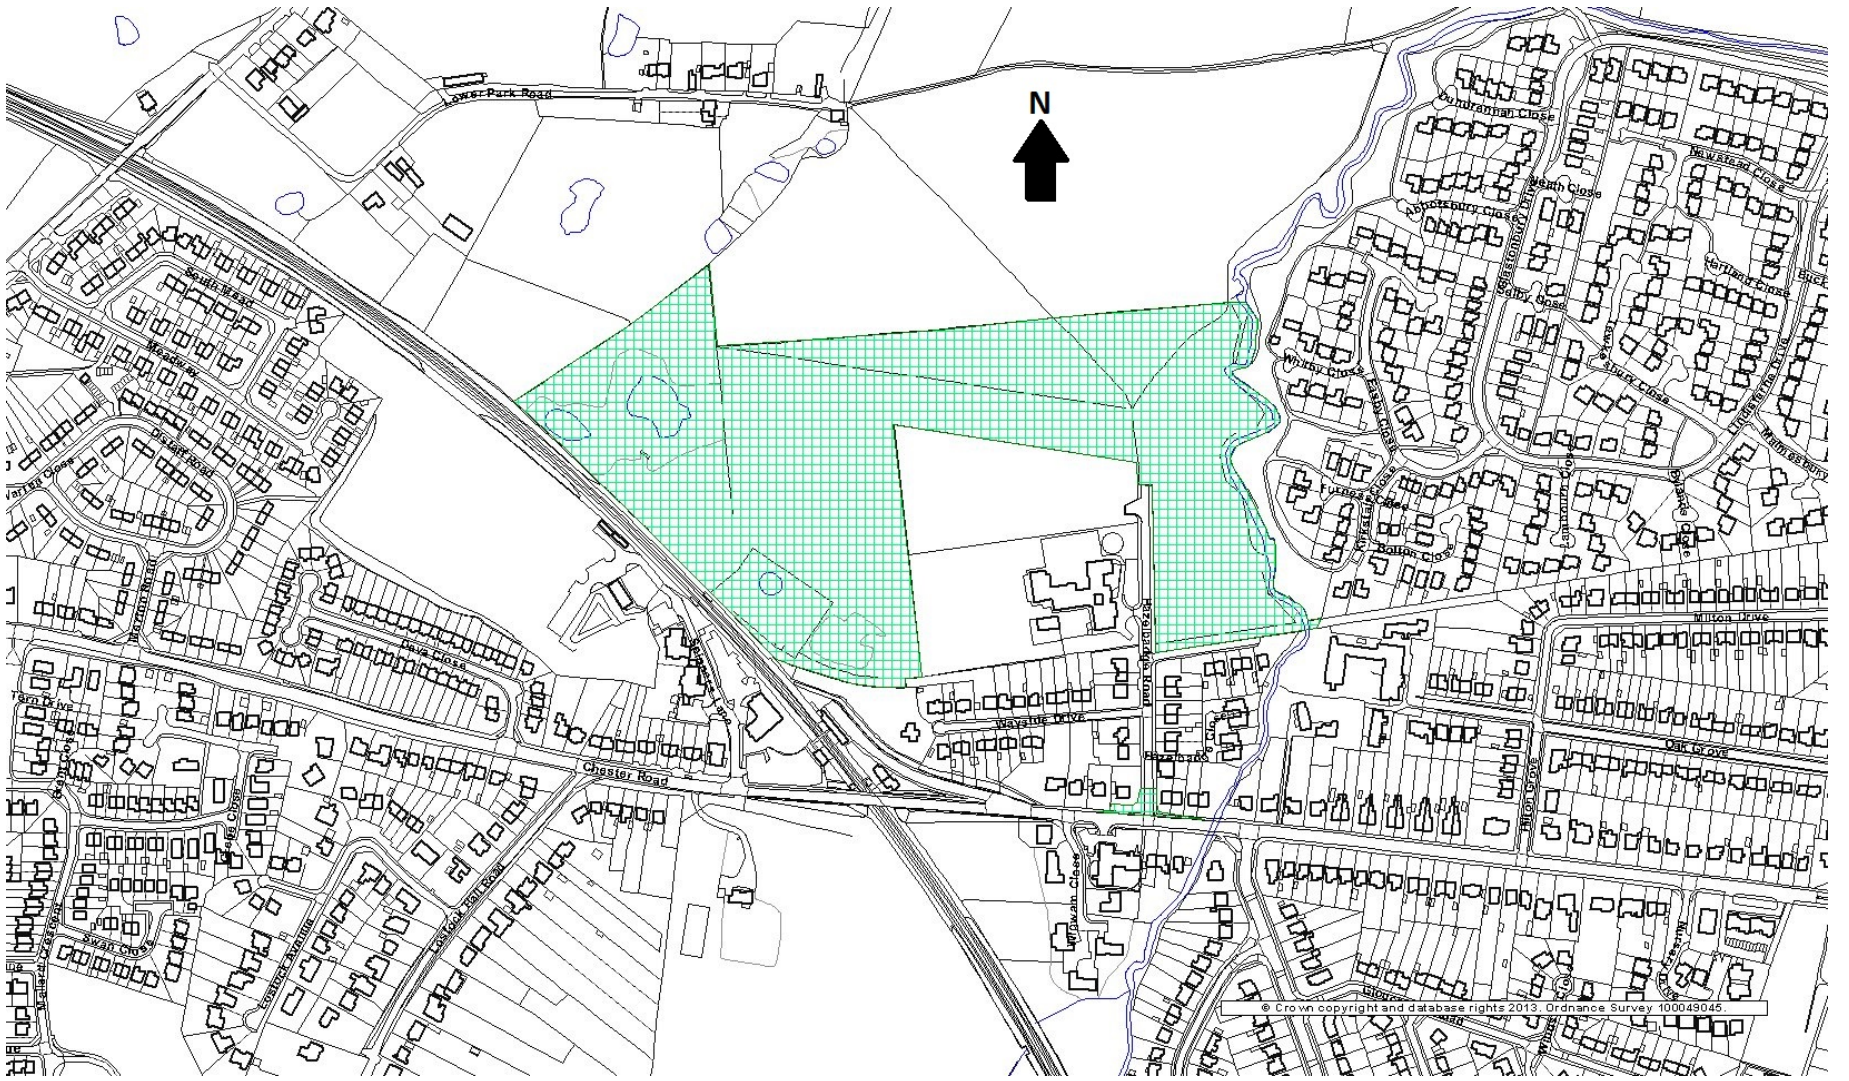

Cycle Lane Contribution	£10,000	Prior to occupation
--------------------------------	---------	---------------------

Application for Full Planning

RECOMMENDATION: Approve subject to a Section 106 Agreement and the following conditions

1. Commencement of development (3 years)
2. Development in accord with approved plans
3. Submission of details of building materials
4. Landscaping - submission of details
5. Landscaping (implementation)
6. Tree retention
7. Tree protection
8. Construction specification/method statement for access road serving Plots 1-4 and for footpath adjacent to trees T24- T46
9. Arboricultural method statement
10. Levels details to be submitted which provides for the retention of trees on the site
11. Service / drainage layout which provides for the long term retention of the trees to be submitted
12. Implementation of noise mitigation measures
13. Electric vehicle infrastructure to be provided
14. Anti idling signage to be provided
15. Remediation Strategy to be submitted
16. Verification report to be submitted
17. Testing of any imported soil
18. Reporting of any unforeseen contamination
19. Implementation of Highway improvements
20. Construction management plan to be submitted
21. Amended travel plan to be submitted
22. No infiltration of surface water drainage into the ground is permitted
23. Development to be carried out with GCN mitigation strategy (to include 5m buffer zone to north of site)

24. Implementation of the reasonable avoidance measures detailed within section 6.8 of the Ecological Assessment Report (bats)
25. Development to be carried out in accordance with the submitted badger mitigation strategy (TEP, January 2018).
26. Nesting birds survey to be submitted
27. Implementation of Reptile Reasonable Avoidance Measures (TEP, 04/01/2018)
28. Details of proposed external lighting scheme to be submitted
29. Foul and surface water shall be drained on separate systems.
30. Surface water drainage scheme to be submitted
31. Development to be carried out in accordance with submitted Flood Risk Assessment
32. Obscure glazing to be provided
33. Construction Environmental Management Plan to be submitted
34. Details of railings to western boundary of site to be submitted. Railings to be retained in perpetuity.
35. Construction Management Plan to demonstrate out how any indirect adverse impact on Poynton Brook will be avoided to be submitted

Application No: 19/1392M

Location: LAND NORTH OF, NORTHWICH ROAD, KNUTSFORD

Proposal: Reserved Matters in relation to scale, appearance, landscape and layout for the erection of 190 dwellings including allotments, community orchard, playing pitch, landscaping, open space, car and cycle parking, drainage and associated works pursuant to outline application 17/3853M

Applicant: Michael Blackhurst, Redrow

Expiry Date: 26-Jul-2019

SUMMARY

The principle of the erection of 190 dwellings on this site, along with access arrangements has already been permitted under application 173853M. This application considers the remaining Reserved Matters, which comprise of design considerations including; layout, scale and appearance and also matters of landscaping.

The design aspects of the proposals include; layout, scale, form and appearance. These elements were amended during the application process as a result of officer advice and amended further following the deferral by Strategic Planning Board. The design of the proposal is subsequently deemed to be acceptable.

Matters of landscaping are satisfactory and suitable for its purpose.

No issues are raised with regards to; highways, amenity, ecology, flooding and drainage, affordable housing, open space or public rights of way, subject conditions where deemed necessary.

RECOMMENDATION

APPROVE subject to conditions

REASON FOR DEFERRAL

This application was deferred by Cheshire East Council's Strategic Planning Board on the 28th August 2019 for the following reasons;

'That the application be deferred to allow officers to work with the applicant's agents and other stakeholders (including the Nether ward Community Group and Knutsford Town Council) to address the concerns raised about the scheme, which are housing mix; affordable housing

location; environmental/sustainability factors on the site along with the policies in the Knutsford Neighbourhood Plan and Design Guide.'

Update

In response to the above a meeting was held with the respective groups and individuals on the 18th September 2019. In the meeting, the applicant listened to the concerns and suggestions of the group. In turn, a full set of revised plans were received by the Local Planning Authority between the 1st and 4th October 2019.

These changes comprised of;

- Changes to house types, garages and detailing
- Cycle lane added to western side of main spine road
- Pedestrian links onto Northwich Road, updated so can also be used by cyclists
- Inclusion of private 2-bed Mews properties
- Greater Pepper Potting of Affordable dwelling and a different mix
- Addition of 2 smaller areas of informal Public Open Space
- Cycle store added to LEAP
- Re-siting of football pitch
- Green energy uplift – 25 dwellings now include solar panels and each dwelling has a water butt
- Permanent filling of site frontage attenuation pond (water level to be agreed)

In addition to the above, the applicant also proposed a clock tower on the site frontage. This was removed following officer advice on both Green Belt and design grounds.

It is considered that the applicant has responded positively in both design and environmental terms to some of the comments raised by Committee and the local groups. The changes identified above do represent an improvement over the earlier scheme and presents a scheme that overall does have merit. Inevitably further changes could be made to maximise the opportunities of the site and to achieve full Building for Life compliance.

Relevant plans and statements in relation to; landscape, trees, highways, ecology, affordable housing and open space have been provided. These raise no new issues, subject to conditions, where necessary.

A previously proposed ecology condition in relation to badgers has been satisfied and is no longer necessary.

The application is therefore recommended for approval, subject to the conditions detailed at the end of this report.

Previously considered Committee Report (incorporating previous updates and updated recommended conditions)

SITE DESCRIPTION

The application site extends to approximately 15.65ha located to the north of Northwich Road. The site is a greenfield site in arable production. The site is bounded by hedgerows with a strong

hedgerow along the boundary with Northwich Road. The site has Warren Avenue and Spinney Lane to the east, Acacia Avenue and Lilac Avenue across Northwich Road to the south, with open fields to the north and west. The site is currently accessed off Northwich Road. However the access point will be further to the west where a new roundabout will be created. Two local schools are located to the south of Northwich Road. The town centre is located approximately 850m from the southern portion of the site. Knutsford Railway Station is located approximately 1.07km from the site as the crow flies.

The site is allocated for housing by the Cheshire East Local Plan Strategy Policy LPS 36 and outline planning permission (including matters of Access) was granted for 190 dwellings in February 2019.

DETAILS OF PROPOSAL

This reserved matters application seeks approval of the; Appearance, Landscaping, Layout and Scale for the erection of 190 dwellings and associated open space and infrastructure, following the approval of outline application 17/3853M.

The site is recognised as low-density as per the numbers allocated for it within the Local Plan. The 190 dwellings will be made up from 133 market dwellings and 57 affordable units. Of the 133 market dwellings, these will comprise of a mix of detached, semi-detached and bungalow units ranging from 3-5 bed units and the affordable units from 1-4 bed units. The site will benefit from a large area of Open Space to the north of the site. Included in the proposals are a football pitch, an allotment, an orchard and a children's play area, including play equipment and parking provision nearby for each.

Revised plans have been received during the application process in response to concerns raised by the Council, predominantly in relation to design & open space. More specifically, concerns were originally raised regarding the mix of dwellings sought (both in terms of the market and affordable units), the formality of the street layout, the level of children's play provision and the surfacing of the footpaths and car park areas. In response, the applicant created a more informal street layout, introduced a greater mix of properties in terms of bedroom numbers and form for both the market and affordable units, and addressed the Open Space concerns.

RELEVANT HISTORY

19/2680M - Advertisement consent for 8x Direction Leader Boards, 1x V Stack and 20x Flag poles – Under consideration

19/2370M - Non-material amendment to planning approval 17/3853M - Outline planning application with means of access to be determined (all other matters reserved for subsequent approval) for the erection of up to 190 dwellings (Class C3); the provision of serviced land for allotments; a community orchard, a playing pitch, landscaping and open space; new internal highways, car and cycle parking; sustainable drainage measures including surface water retention ponds, provision of utilities infrastructure; earthworks and all ancillary enabling works – Withdrawn 2nd August 2019

17/3853M - Outline planning application with means of access to be determined (all other matters reserved for subsequent approval) for the erection of up to 190 dwellings (Class C3); the

provision of serviced land for allotments; a community orchard, a playing pitch, landscaping and open space; new internal highways, car and cycle parking; sustainable drainage measures including surface water retention ponds, provision of utilities infrastructure; earthworks and all ancillary enabling works – Approved 18th February 2019

17/4774S – EIA Screening Opinion – EIA not required 19th September 2017

ADOPTED PLANNING POLICY

Development Plan

The aspects of the Cheshire East Council Development Plan that are relevant to the application proposals include; the Cheshire East Local Plan Strategy (CELPS), the Knutsford Neighbourhood Plan (KNP) and the Macclesfield Borough Local Plan (MBLP). The relevant policies of these plans to the application proposals include;

Cheshire East Local Plan Strategy 2017 (CELPS)

LPS 36 – Northwest Knutsford

MP1 - Presumption in favour of sustainable development, PG1 - Overall Development Strategy, PG2 – Settlement Hierarchy, PG3 – Green Belt, PG7 - Spatial Distribution of Development, SD1 - Sustainable Development in Cheshire East, SD2 - Sustainable Development Principles, IN1 – Infrastructure, IN2 - Developer contributions, SE1 – Design, SE2 - Efficient use of land, SE3 - Biodiversity and geodiversity, SE4 - The Landscape, SE5 - Trees, Hedgerows and Woodland, SE6 - Green Infrastructure, SE9 - Energy Efficient Development, SE12 - Pollution, Land contamination and land instability, SE13 - Flood risk and water management, CO1 - Sustainable Travel and Transport, CO2 – Enabling Business Growth Through Transport Infrastructure, CO4 – Travel Plans and Transport Assessments, SC1 – Leisure and Recreation, SC2 – Outdoor Sports Facilities, SC5 – Affordable Homes, SC5 – Affordable Homes, EG1 – Economic Prosperity and EG5 – Town Centres First

Knutsford Neighbourhood Plan 2019 (KNP)

C4 – Utilities, D1 – The Knutsford Design Guide, D2 – Local Distinctiveness, D3 – Landscape in New Development, D4 – Sustainable Residential Design, E1 – Connections to the Countryside, E2 – Green and Blue Corridors, E3 – Habitat Protection and Biodiversity, E5 – Pollution, HW1 – Health and Wellbeing, HE1 – Landmarks, Views, Vistas and Gateways, HE2 – Heritage Assets, H1 – Housing mix, SL1 – Open Space in New Developments, SL3 – New Sport and Leisure Facilities, T1 – Walking in Knutsford, T2 – Cycling in Knutsford, T3 – Public Transport and T4 – Parking

Macclesfield Borough Local Plan (MBLP)

GC1 – Green Belts, NE3 – Protection of Local Landscapes, NE11 – Protection and enhancement of nature conservation interests, NE17 – Nature Conservation in Major Developments, H9 – Occupation of Affordable Housing Recreation and Tourism, RT5 – Open Space, RT6 – Allocated for additional Informal Recreational Facilities, RT7 – Recreation / Open Spaces Provision, DC3 – Amenity, DC6 – Circulation and Access, DC8 – Landscaping, DC9 –

Tree Protection, DC15 – Provision of Facilities, DC17 – Water Resources, DC35 – Materials and Finishes, DC36 – Road Layouts and Circulation, DC37 – Landscaping, DC38 – Space Light and Privacy, DC40 – Children’s Play Provision and Amenity Space, DC41 – Infill Housing Development and DC63 – Contaminated Land

Other material planning policy considerations

National Planning Policy Framework 2019 (NPPF)

Relevant paragraphs include;

7-14 – Achieving sustainable development, 34 – Development Contributions, 38-50 – Decision Making, 54-57 – Planning Conditions and Obligations, 59-79 Delivering a sufficient supply of homes, 80-84 Building a strong, competitive economy, 91-101 Promoting healthy and safe communities, 102-111 - Promoting sustainable transport, 112-116 - Supporting high quality communications, 122-123 Achieving appropriate densities, 124-132 – Achieving well-designed places, 133-147 Protecting Green Belt Land, 148-169 – Meeting the challenge of climate change, flooding and coastal change, 170-183 – Conserving and enhancing the natural environment, 184-202 - Conserving and enhancing the historic environment,

Cheshire East Design Guide Supplementary Planning Document (SPD)
National Planning Policy Guidance (NPPG)

CONSULTATIONS (External to Planning)

Head of Strategic Infrastructure (HSI) – No objections, but has concerns about the level of parking provision proposed for the sports pitches

Environmental Protection – No objections, subject to conditions including; the prior submission/approval of a dust management plan and the submission/approval of a piling method statement and implementation of noise mitigation measures.

All other matters environmental amenity matters were considered as part of the outline permission and/or are to be dealt with by condition as part of the outline application

United Utilities – No objections, subject to a condition that no surface water shall discharge to the existing sewerage system either directly or indirectly, in accordance with the submitted information

Flood Risk Manager - No objections, subject to the implementation of the submitted flood risk and drainage details

Environment Agency - No objections

Natural England - No objections

Public Rights of Way – No objections

Ramblers Association - No comments received at time of report

ANSA Greenspace – No objections, subject to the conditioning of the Football Pitch Management and Maintenance Strategy

Health Protection Agency - No comments received at time of report

Affordable Housing Manager – No objections

Knutsford Town Council – Object to the proposal on the following grounds;

- a. There doesn't appear to be a detailed drainage strategy as required by condition 5 of the outline application – the drainage details don't appear to include maintenance, for example
- b. It does not appear that the proposed design complies with Policy D2 of the Neighbourhood Plan as the housing is not locally distinctive. This is a key part of our Neighbourhood Plan.
- c. The proposal does not appear to include adequate and regular public transport provision required by Policy T3 of the NP
- d. The sports pitch still has no changing facilities as required by policies SL1/SL3
- e. There does not appear to be a strategy for development connecting to public utilities required by Condition 4

Tabley Inferior Parish Council - No comments received at time of report

REPRESENTATIONS

Neighbour notification letters were sent to the occupiers of all adjacent occupants, site notices were erected and the proposals were advertised in the local newspaper. In response, comments were received from approximately 31 interested properties/groups. The main areas of objection raised include;

Procedural matters

- Works on site have started – hedgerows removed along Northwich Road
- Parts of the submission do not adhere with elements of the outline application (Open Space requirements, Cycle provision requirements, Phasing plan provision)

Design

- Proposals represent a backwards step from the scheme indicated at outline stage within the Design and Access Statement. More specifically;
 - The scheme does not include character areas
 - House types proposed along spine road do not include local features
 - Western edge of spine road – garages set forward
- Street lighting proposals (Contrary to Knutsford NP)
- Too many straight roads
- 'Off the shelf' house types
- Width of 3 pedestrian/cycle routes out of the site are unclear and materials are inconsistent

Proposals contrary to the CELPS Policy SE1, Cheshire East Design Guide, Knutsford Neighbourhood Plan (including Knutsford Design Guide) and NPPF

Highways / Linkages / Footpaths / Cycleways

- No pedestrian/cycle link to Tabley Road (was conditioned within outline)
- Lack of adequate cycle ways (contrary the LPA 36, CO1, CO4 of CELPS and T2 of Knutsford NP) Also reference within conditions on outline permission
- Cyclist routes are unclear
- Lack of cycle parking provision
- Extent of cycle provision has been reduced from outline stage
- No detail of cycling surface material or cycleway width
- Travel plans are out of date and need to be updated to include cycle ways
- Lack of pedestrian crossing across Northwich Road to Knutsford Academy sites, Egerton Primary School
- No highway improvements along Northwich Road where new site meets old footpath onward to the town centre

Renewable Energy/Energy Efficiency

- Lack of provision of energy efficient features/design (contrary to CELPS, Design Guide SPD and Knutsford NP)

Landscaping and Trees

- Felling of 9 oak trees
- Landscape Management and Maintenance Plan needs updating to indicate schedule for playing pitch, amenity area and equipped play area incl facilities

Affordable Housing

- Clearly distinguishable from market homes, are single aspect only, block parking provision, lack of private amenity space

Flood Risk and Drainage

- Several areas of road that do not have suitable drainage to cover rainwater
- No drainage of Sports Area or Play Area provided
- Concerns regarding the type of drainage proposed
- Concerns over increased surface water run-off as a result of hardstanding

Amenity

- Concerns regarding hours of work and dust
- Parking areas backing onto Warren Avenue – loss of outlook, creation of anti-social behaviour, noise
- Loss of access from private garden on Warren Avenue onto field

Ecology

- Impact upon Knutsford Heath (Local Wildlife Site)
- Advocate the provision of a Wildlife corridor from Knutsford Heath westwards out to Bluebell Wood

Open Space

- Play Area
 - Location of LEAP, design and layout not supported – safety hazard
 - Lack of cycle provision
 - Management plan does not include replacement/renewal
 - Area proposed to be used as temporary site storage during construction (not allowed under S106)
 - Location close to road is dangerous. Suggestions - cycle and scooter parking, additional seating and bins
- Sports Pitch
 - Lack of detail on specification, construction, maintenance and responsibility
 - insufficient detail provided in relation to playing pitch, its construction details, drainage, parking provision or changing facilities
- Orchard
 - No detail provided in relation to planting, maintenance and management

Impact upon infrastructure

- Highway network pressures, overstretched GP practices, inadequate school places, lack of affordable housing

OFFICER APPRAISAL

Principle of development

This application shall consider the acceptability of the proposed development in the context of the reserved matters as the principle of erecting 190 dwellings, along with access, has already been granted. In this instance therefore, consideration of the Layout, Scale Appearance and Landscaping are the principal considerations.

Design

A Building for Life assessment has been undertaken to enable consideration of the Cheshire East Design Guide principles to be addressed. These are detailed below.

Layout

Hierarchy of streets – Amber

A central, tree-lined spine road extends through the site from the roundabout approved as part of the outline planning permission. It's from this road that the rest of the development is accessed.

As part of discussions during the application process, many of the roads that extended off this main central road, have been amended so they are less linear in design in order to add a degree of interest and assist with traffic calming.

Boundary treatments to the front of the properties can further enhance the hierarchy, with a more formal approach to the spine road and softer detailing to the rural/green edges of the site. The intention to enhance the hierarchy of the front boundaries to strengthen the overall street hierarchy is welcomed.

Connectivity - Amber

The site is well connected to local bus services that run along Northwich Road and additional vehicular connections have been reinstated. The site will be accessed by car by a single road extending from the approved roundabout. There are four occasions where either a cycle link or pedestrian footpath (or both) extend to the edge of the site. Two of these are pedestrian linkages onto Northwich Road to the south, another will link the site with Warren Avenue to the east and another would extend to the north of the site and eventually, provide a link into the safeguarded land and beyond.

Green Space - Green

The site has an overall low density and as such, there are large areas of green open space, most notably on the northern edge.

The dwellings that face onto the Public Open Space in the centre of the site, that will include a LEAP and a LAP (children's play equipment), provide a well surveyed area. Additional parking alongside these areas provides parking for visitors.

Parking - Green

An issue of predominantly front of plot parking with the originally submitted proposals has been resolved with a varied mix of parking solutions is now proposed across the site.

Views and Vistas - Green

There were initially concerns that there were areas of the site where the rear of properties formed the primary view from public spaces revealing rear boundary treatments. This issue has been subsequently resolved with the submission of a revised plan as the elevations that are visible from the public realm now have the same specification of detail to the window/cill/head as other primary elevations.

The addition of a quality boundary wall to public facing side boundaries that is set back and landscaped has been achieved and the intention to soften the front boundaries and landscaping towards the rural edge is there.

Legibility - Amber

The site is mostly legible with some feature buildings/activities at key nodes, particularly at the centre, where a curved grouping of dwellings is proposed that front onto an area of Public Open Space.

A varied roof scape is welcomed by the inclusion of a few taller units and bungalows during the application process.

Affordable housing and mix - Amber

The affordable houses are concentrated in certain areas of the site which is contrary to development plan policy. However, as a greater mix of dwelling forms have now been introduced, the identification of the affordable units is not as clear as it was on the original plans.

Density - Amber

Originally, the north and west edge of the site presented a dense edge which was contrary to the guidance in the design guide:

‘Areas of lesser activity, for example sub-urban residential areas adjacent to open spaces or the countryside would have a reduced density and less formal character with more generous gardens.’

During discussions during the application process, the applicant amended the scheme to address this concern to more acceptable levels. On the western edge in particular, the number of properties have reduced in number and 2 bungalows introduced which in turn has resulted in a softer transition with the rural land beyond. In turn, 3 detached properties towards the middle of the site and been amended to form 6 semi-detached units. These changes result in no change to the overall provision of 190 dwellings.

Scale – Green

The design guide encourages a diverse roofs cape which necessitates the variation of height. It is not uncommon to see taller feature buildings particularly at nodal points and adjacent to POS/squares in the existing fabric of Knutsford.

There have been a number of 2.5 storey homes as well as two bungalows introduced to the layout which will improve the diversity of the roof scape and legibility throughout the site.

The layout reflects existing adjacent developments in type and density which helps to enable the new development to sit comfortably within the area.

Appearance

Corner Plots - Green

Concerns were originally raised in relation to the strength of the corner turning designs. In response, revised plans were received. The corner turning types have been identified and strengthened by the

addition of primary windows or feature details/dual aspect types and the side boundary specification to an acceptable degree.

Materials and Type - **Amber**

Although it is encouraged in the design guide (house types, making them unique) to take elements of the local vernacular and contextual characteristics and detailing, it is also expected that these elements will be used in such a way as to provide a distinct and unique character to the new development. It is also a requirement of the Knutsford Neighbourhood Plan.

The originally proposed house types were typically generic designs and consequently did not reflect the local character or materials, resulting in an autonomous development.

The applicant subsequently introduced a greater mix of property forms, which has assisted in alleviating this concern to a degree, however, there does remain a concern regarding the appearance of the dwellings not taking characteristic cues from the local area.

A submitted materials plan shows that the proposed dwellings would be finished in a mixture of Parkhouse Western Red-Multi, Ibstock Leicester Weathered Red, Parkhouse Marlborough Stock or rendered wall finishes (all with feature bricks also), and a mixture of slate grey and sunrise blend roof tiles, all of which will add a degree of interest, as will the large mix of detached property types proposed and slight changes in land levels.

The originally submitted street surface materials did not meet the standards set out in the CEC Design Guide, however, a revised plan was received during the application process which resulted in an improvement in this regard.

Landscaping (including trees)

Landscape

The proposals have retained the landscape buffers around the perimeter of the site and have also retained a street hierarchy, with avenues and tree lined streets. The Council's Landscape Officer originally advised that whilst he considered the landscape proposals to be positive, he had concerns about the location of the allotment parking. He considered that this could be easily inverted so that there is any area of mitigation/screening to the rear of the existing residential dwellings, rather than a car park area. The applicant has subsequently updated the plans to address this concern.

Updated boundary treatment details and landscape plans (hard and soft) have been received during the application process to reflect the changes made in response to design and open space concerns. These are deemed acceptable.

Forestry

A revised Arboricultural Impact Assessment (AIA), Arboricultural Method Statement (AMS) and Tree Protection Plans (TPPs) have been received since the drafting of the committee report in response to concerns raised by the Council's Forestry Officer in relation to possible conflicts with existing trees and the proposed allotment car park and swale.

In response, the updated information proposes a reduced pruning specification for tree 30T (the impacted tree), an amended shape for the proposed Swale to reduce the impact on the RPA of tree 30T and proposed Cellweb construction for the access to the allotments.

The Council's Forestry Officer advises whilst this will not entirely alleviate the impact of the development upon this tree (30T), it does represent a reduction in the level of possible impact. The constraints of the site do not permit all development to be removed from the RPA entirely. The Council's Forestry Officer advises that in the event of approval, a condition to ensure the implementation of the AIA, AMS and tree protection measures should be included.

It is considered that the benefits of the wider development, in conjunction with the updated plans to reduce the possible impact of the development upon this particular tree are sufficient to outweigh the harm in this instance

Highways

The site access and off-site highways mitigation measures were dealt with on the outline application, which included the provision of a new roundabout.

The Council's Head of Strategic Infrastructure (HSI) has advised that the proposed road infrastructure layout is in principle, acceptable for adoption. The level of off street parking for the residential units complies with CEC parking standards.

There is a pedestrian footway & cycleway provided on one side of the main spine road with a 2m footpath on the other. It is important that the cycleway is provided to the site boundary, which it does, to potentially link to the safeguarded land to the north. There are two other pedestrian links provided to Northwiche Road from the site, these are required as they will provide access to the proposed pedestrian crossing on Northwiche Road.

A small car park is provided for the allotments (12 spaces). The Council's HSI has concerns about this level of provision. However, it should be noted that additional parking spaces have been provided around the site as it was deemed from a design perspective, that by adding the additional parking in different locations on site, the area didn't become too car dominated.

For the above reasons, the application proposals are deemed to adhere with the relevant highway and parking policies of the development plan.

Amenity

Policy DC3 of the MBLP states that development should not significantly injure the amenities of adjoining or nearby residential property or sensitive uses due to (amongst other considerations); loss of privacy, sunlight and daylight, an overbearing impact and environmental considerations. Policy DC38 provides the recommended separation standards.

Policy SE1 of the CELPS states that development should ensure an appropriate level of privacy for new and existing residential properties.

The closest existing neighbouring properties to the application site are the occupiers of the properties to the south of the site, on the opposite side of Northwiche Road, the occupiers of Memorial House to the south-east corner which shares two boundaries with the application site, the occupiers of the

properties along Warren Avenue to the east and the occupiers of the closest properties to the north-east which are accessed off Spinney Lane.

The properties on the southern side of Northwich road would all be at least 45 metres away from the closest dwelling. This distance more than adheres with the recommended policy standards ensuring the occupiers of these properties should be not impacted by the proposed development in relation to; loss of light, privacy or an overbearing impact.

Memorial House, located to the south-east of the site, would again adhere with the minimum separation standards, ensuring the existing and future occupiers would not be impacted in relation to the above considerations.

The closest properties on Warren Avenue would all be well in excess of the minimum recommended standards from the closest of the proposed dwellings with a proposed allotment providing an intervening buffer. As such, the amenity of the occupiers of these closest neighbouring dwellings would not be detrimentally impacted in relation to loss of light, privacy or an overbearing impact.

There is also a landscape buffer between the proposed new housing and the properties on the Spinney and a distance between built form that comfortably ensures that these neighbouring properties are far enough away from the site so not to be impacted in relation to the above considerations.

In consideration of the amenities of the future occupiers of the proposed development, the layout adheres to, or closely adheres with, the recommended separation standards within the development plan to ensure the future occupiers of the proposed development are not detrimentally impacted in terms of light, privacy or an overbearing impact from each other.

Although some of the proposed gardens are a little on the small size, for this area of Cheshire East, the Council have no minimum garden size standards. Notwithstanding this, it is deemed that they are sufficient in order for the future occupiers to enjoy normal activities e.g. sitting out, hanging washing, BBQs etc. Furthermore, the site benefits from a large area of shared public green space to the north of the development.

In relation to environmental amenity, the acceptability of the different elements are considered below;

Noise

In consideration of aviation noise, the application site remains outside of aviation noise contours that would give rise to concerns. As such, aviation noise is not a material planning consideration.

In relation to road traffic noise, the site lies north of the A5033. A Noise Impact Assessment (NIA) was submitted in support of the outline application and concluded that the proposed development should not result in any adverse impacts resulting from road traffic noise. The NIA includes a detailed scheme of; acoustic glazing, acoustically treated ventilation and localised noise barriers to reduce the noise from traffic in the worst affected outdoor living areas to Northwich Road (a requirement of Condition 10 the outline application). The Council's Environmental Protection Officer has advised that the mitigation details submitted are acceptable.

Air Quality

As part of the outline approval, Condition 13 required each property with allocated off road parking to include a single Mode 2 complaint electric vehicle charging point. The detail of this has been provided to the satisfaction of the Council's Environmental Protection Officer.

There are no other air quality matters to be addressed as part of this reserved matters application.

Contaminated Land

As part of the outline application, contaminated land was considered. It was determined that there were no specific contaminated land issues subject to a number of conditions. These included; Condition 15 – Prior submission/approval of Phase II contaminated land report, Condition 16 – Prior submission/approval of any soil forming materials and Condition 17 – Works to stop if contamination is identified.

The detail of the above shall be considered as part of a discharge of conditions application. There are no further contaminated land matters to consider as part of the current application.

For the above reasons, the application proposals are not deemed to have a detrimental impact upon amenity and would adhere with the relevant amenity policies of the development plan.

Ecology

There are various ecology matters to consider. These are broken down into the following subsections and assessed accordingly.

Designated Sites

This application site falls within Natural England's SSSI Impact risk zones. An 'assessment of likely significant effects' under the Habitat Regulations was completed by the applicant and submitted in support of the consented outline application at this site. No likely significant effects were identified at the outline stage and no mitigation was required.

Natural England have reviewed the submission and advised that they have 'no objections'. Based on the submitted plans, they do not consider that the proposed development will have significant adverse impacts on statutorily protected nature conservation sites or landscapes.

Badgers

The Council's Nature Conservation Officer advises that the drainage proposals would have a direct effect on disused badger sett. Assuming the sett remains inactive, the Council's Nature Conservation Officer advises that the proposed drainage works would not have a significant effect on badgers. Acceptable contingency measures have been submitted to cover the possibility that the sett did become active at the time of the drainage works. As the status of setts can change, the Council's Nature Conservation Officer advises that if consent is granted, a condition should be attached which requires the submission of an updated badger survey prior to the commencement of any drainage related works within 30 metres of the disused sett.

Bats

An updated bat survey has been undertaken of the trees on site. The following trees were identified as having moderate or above potential to support roosting bats: 30T, 32T, 35T. Arboricultural works are proposed to 30T. This tree has now been subject to a bat survey and no evidence of roosting bats were identified. The proposed works to this tree are therefore not likely to affect roosting bats.

Construction related lighting may result in a localised effect on bats foraging and commuting in the vicinity of the proposed drainage works. To avoid this impact, the Council's Nature Conservation Officer advises that a condition should be attached that no lighting should be used during construction of the drainage works.

The Council's Nature Conservation Officer has advised that construction related noise and vibration associated with the drainage works is unlikely to have a significant effect on bats.

Hedgerows

Native hedgerows are a priority habitat and hence a material consideration. As anticipated at the outline stage, the proposed development will result in the loss of a section of hedgerow to facilitate the site entrance and roundabout. The Council's Nature Conservation Officer advises that compensatory native species hedgerow planting must be provided to address this loss.

The landscape plans have now been updated to show the extent of the compensatory hedgerow proposed and the Council's Nature Conservation Officer advises that this is acceptable.

One significant length of proposed new hedgerow is proposed outside of the site edged red. However, it does fall within the blue edge of the application which denotes the applicant's ownership of this land. As such, in the event of approval, a condition is proposed to secure this provision. The applicant has agreed to this.

Habitat Landscape Management Plan

The Council's Nature Conservation Officer advises that the submitted updated management plan is acceptable. If reserved matters consent is granted a condition is required to secure its implementation.

Adherence with Ecology conditions on outline permission

- Condition 19 (Submission of a ground nesting bird strategy): Submitted detail acceptable
- Condition 20 (Updated badger survey): Updated survey submitted as required by condition. Survey shows that the proposal is unlikely to have an effect on any known badger sett. Although the proposal would result in some loss of foraging habitat, this would be limited
- Condition 21 (Lighting to avoid impacts of wildlife): Updated plans have been received and deemed acceptable
- Condition 22 (Ecology enhancement strategy): A strategy has been received. The Council's Nature Conservation Officer advises that this includes acceptable proposals, a new wildlife pond, native species planting and sufficient bird and bat boxes.
- Condition 23 (Hedgehog gaps): Proposals submitted are acceptable

Flood Risk and Drainage

The entire site falls within a Flood Zone 1, which is deemed to have a low probability of flooding. As part of the outline application, the Council's Flood Risk Manager raised no flood risk concerns in principle, but requested the applicant submitted finalised plans that propose sustainable drainage systems that do not increase the risk of flooding on or off-site. This was added as a condition on the outline application (Condition 5). This detail is being considered by the Council under a discharge of conditions application (19/1803D) and if deemed to be acceptable, the proposal is deemed to provide acceptable drainage infrastructure that would not result in flood risk concerns. The Environment Agency have raised no objections on flood risk grounds.

United Utilities raised no objections on the outline application and again have raised no issues in relation to the current application, subject to a condition that no surface water shall discharge to the existing public sewerage system either directly or indirectly in accordance with the submitted information.

The application proposals are therefore deemed to adhere with Policy SE13 of the CELPS.

Affordable Housing

It was a requirement of the S106 agreement as part of the outline permission that the scheme would provide 57 affordable units.

The submission shows that the scheme will provide the required 57 units and are split directly to the required 65%/35% tenure split.

The revised proposed Affordable housing plan shows the provision of an appropriate mix of property sizes and split. Furthermore, the affordable housing officer is satisfied with the siting of the provision which is now better distributed throughout the site. An acceptable affordable housing statement has now also been provided.

Open Space

The application proposes; a sports pitch, a play area, an orchard and an allotment. The acceptability of these elements are considered below;

Sports Pitch

An 11 v 11 sports pitch is proposed (87.8 metres x 51.2 metres), including run-offs for U13/14 football. The Council's Open Space Officer advises that this will satisfy the Playing Pitch Strategy; comply with the outline planning consent and the local community. A Football Pitch document has been provided that includes more detail and a management and maintenance regime for a minimum period of up to 15 years, again, deemed to be acceptable and should be conditioned.

Play Area

The requirement is for 40sqm of Public Open Space, 20sqm of which should be for children's play [formal and informal]. Originally, just a LEAP was proposed where there should also be a requirement for a LAP. The applicant has provided updated plans in order to provide this requirement. The siting of the LEAP and LAP are together in an area of Public Open Space towards the centre of the site. This is deemed to be a good location so all future occupiers of the scheme and

wider members of the community can access the facility. The Council's ANSA Open Space Officer raises no objections to the proposed updated plan.

Orchard

The Council's Open Space Officer originally had concerns regarding the location of the proposed Orchard, with a preference that they are located within the allotments. However, the officer has accepted the applicant's rationale that, if the allotments are to be transferred over to the Town Council, essentially, they will become semi-private and will not be used and benefited by everyone within the development and within the local community. Moving the orchard within the Allotments will remove the natural connection people can have whilst walking & cycling through the development.

Allotment

The Council's ANSA Open Space Officer is supportive of the position of the allotments and the associated proposed car park because it will assist in accessibility. In consideration of the associated boundary treatment, a higher treatment was agreed during the application process to give more security whilst still in keeping with the site. In addition, the allotment car park surfacing has been amended to be tarmac for maintenance purposes at the request of the Council's Open Space Officer.

The revised plans received during the application process in order to show the correct curvature in the swale design only. The Council's ANSA Officer has raised no objections to this slight change.

POS pathways

The Council's Open Space Officer was originally concerned about the surfacing materials proposed and their suitability for year-round use. The Officer advises that Self Binding Gravel was not an acceptable option for routes within the proposed development. Self binding gravel is a maintenance burden. It does not provide a long term, accessible surface, it deteriorates quickly, becomes dirty, uneven and unusable to all but the most mobile and in 'outdoor' shoes. As a result of this concern, the applicant updated to plans to show that the surfacing will now be tarmac, which is welcomed by the Council's Open Space Officer.

Public Rights of Way

The Council's Public Rights of Way Officer has advised that the proposal does not appear to affect a public rights of way.

Other Matters

The associated outline planning application included a number of requirements to include details of certain elements of the scheme with the reserved matters application. It is confirmed that all of this documentation has been received to the satisfaction of the relevant consultees.

Conclusions

The principle of the erection of 190 dwellings on this site, along with access arrangements has already been permitted under application 173853M. This application considers the remaining

Reserved Matters, which comprise of design considerations including; layout, scale and appearance and also matters of landscaping.

The design aspects of the proposals include; layout, scale, form and appearance. These elements have been improved during the application process to an extent where the design of the development is now deemed to be acceptable.

Matters of landscaping are satisfactory and is suitable for its purpose, subject to a final review by the Council's Landscape Officer.

No issues are raised with regards to; highways, amenity, ecology, flooding and drainage, affordable housing, open space or public rights of way, subject to either final reviews of the revised plans by relevant consultees or conditions where deemed necessary.

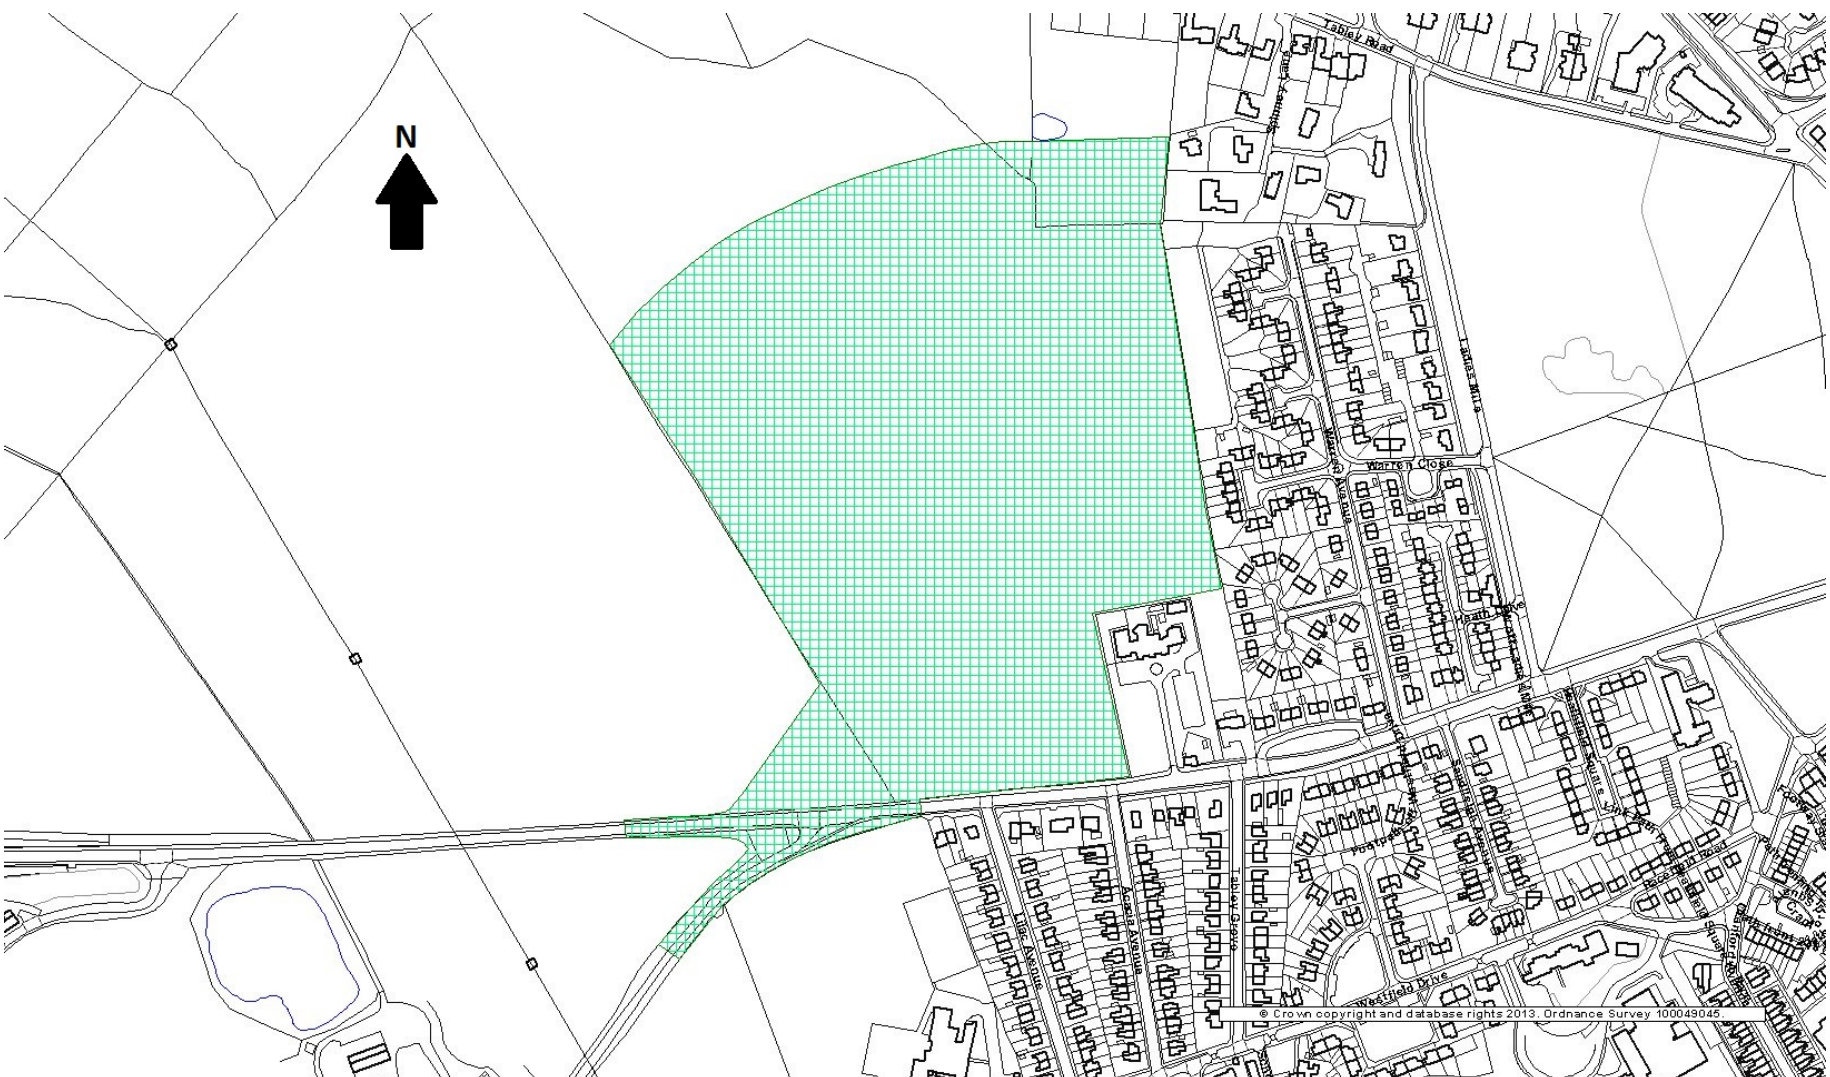

The application is therefore recommended for APPROVAL, subject to the receipt for further consultation responses.

RECOMMENDATION

APPROVE, subject to the following conditions;

- 1. In accordance with outline permission**
- 2. In accordance with approved plans**
- 3. Materials – As per application**
- 4. AIA – Implementation**
- 5. Tree protection – Implementation**
- 6. Landscape (soft/hard)– Implementation**
- 7. Submission/approval of updated boundary treatment plan**
- 8. Noise mitigation – Implementation**
- 9. No lighting should be used during construction of the drainage works on Sudlow Lane**
- 10. Hedgerow planting – Implementation**
- 11. Habitat Landscape Management Plan – Implementation**
- 12. Ecology enhancement strategy/plan – Implementation**
- 13. No surface water shall discharge to the existing public sewerage system either directly or indirectly in accordance with the submitted information**
- 14. Football Pitch Installation and Maintenance Strategy – Implementation & submission/approval of a final inspection by sports turf agronomist prior to first use**
- 15. Levels – Implementation**

In order to give proper effect to the Strategic Planning Board's intent and without changing the substance of its decision, authority is delegated to the Acting Head of Planning in consultation with the Chair (or in their absence the Vice Chair) to correct any technical slip or omission in the resolution, before issue of the decision notice.

This page is intentionally left blank

Application No: 19/3420M

Location: Land East Of Royal London House, Alderley Road, Wilmslow

Proposal: Outline planning application for up to 17,000sqm of new office development (Use Class B1) and up to 1,100 associated car parking spaces; access improvements for vehicles and creation of new pedestrian and cycle routes; and the enhancement of existing and provision of new landscaping (Renewal of 16/2314M)

Applicant: The Royal London, Mutual Insurance Society Limited

Expiry Date: 12-Nov-2019

SUMMARY

The site forms part of the strategic allocation LPS 54 contained within the Cheshire East Local Plan. The application proposes to provide 17000sq.m of employment space to contribute to the allocation at the site. The site will provide B1 office use and associated infrastructure which includes access.

The proposal is in outline form, therefore at this stage an illustrative masterplan showing car parking and positioning of buildings and parameters is included. The proposed parameters are considered to be acceptable as a vital landscape buffer will be maintained around the site. The building heights do not exceed those in the parameters of the previously approved scheme albeit, more buildings are proposed. The proposal is considered to be acceptable and policy compliant, subject to a number of conditions required to ensure at the reserved matters stage all technical requirements are met.

The proposed development is required to ensure a sustainable economic development locally and within Cheshire East.

No objections have been raised by consultees in relation to technical matters, for the reasons mentioned the application is recommended for approval subject to conditions.

SUMMARY RECOMMENDATION

Approve subject to conditions

PROPOSAL

The application is for outline planning permission for a new office development (Use Class B1) and associated car parking, access improvements for vehicles and creation of new pedestrian and cycle routes to the site and enhancement of existing and provision of new landscaping. The application is in outline with only the means of access for approval at this

stage. Detailed matters relating to layout, scale, appearance and landscaping are reserved for future approval.

The site will be accessed through the existing Royal London campus with the existing connections on to Alderley Road being improved. A key part of the proposals involve the widening of a stretch of Alderley Road providing additional capacity travelling south towards the existing roundabout. The existing access point into the Royal London site from Alderley Road is proposed to be widened as is the access road that runs through the existing site.

The application is effectively a resubmission of a previous permission which is extant. The site has planning permission for 17000sq.m of B1 office space with associated infrastructure.

The previous application was for the expansion of Royal London at the site. However the company are now due to leave the site and relocate elsewhere although still within Cheshire East. Therefore the application is now speculative. The previous application was a departure to Green Belt policy and was referred to the Secretary of State. However the site now forms part of a strategic allocation, LPS54 – Royal London including land to the west of Alderley Road, Wilmslow.

The illustrative masterplan now shows 4 individual buildings for speculative occupation. The previous application showed a single building on the masterplan albeit with the same floorspace of 17000sq.m.

The application has been submitted as an EIA development due to its location within a wider strategic site and the cumulative impacts the site could have. As such an Environmental Statement has been submitted with the application, which, consisting of several chapters contains technical information upon which the application has been assessed.

SITE DESCRIPTION

The planning application site consists of four distinct elements. The first element is the site of the proposed office building and car park. This area is located to the east of the main Royal London site sitting between the existing site and the west coast mainline. This area of the site consists of fields the southern one of which sits at a higher ground level than the surrounding land and the existing parking areas at the southern end of the Royal London site. The ground levels are as a result of spoil being tipped on the site through the development of the existing Royal London site and the A34. Some mature trees are located along the red line boundary of the site as well as a row of trees dissecting the site. To the north of the site are fields that separate the site from Wilmslow High School and residential properties.

The second element of the site consists of a strip of land that runs from the north western corner of the main application site to join a footpath onto Harefield Drive. Part of this route is already in use as a footpath with the remainder being part of the wider fields directly to the north of the application site.

The third element of the application site is made up of the existing access road that runs from Alderley Road and through the existing Royal London site through to the proposed location of the office building. The boundary of the application runs at either side of the road allowing for this to be widened before widening out to included existing parking areas that are proposed to

be re-configured to accommodate access.

The remaining element is separate from the main application site. This consists of a strip of land that adjoins Alderley Road and runs from the existing secondary access point into the site and runs in a southerly direction to the Whitehall Bridge Roundabout. This area of land currently contains a number of mature trees.

RELEVANT HISTORY

The Royal London site has been subject to numerous planning applications in the past. The previous applications upon the site of the proposed office building are as follows;

19/1735S – EIA Scoping Opinion for an office development, Not determined

17/4342M - Proposed landscape buffer, Approved, 22.03.2018

17/3747M - This application seeks permission for the matters of appearance, landscaping, layout and scale. reserved in the outline application 16/2314M, Approved, 22.03.2018

17/4469M - Proposed development of an access road off Alderley Road (part permanent, part temporary) together with the provision of a temporary car park for a maximum period of 3 years, a temporary construction compound and associated landscaping works, Application Withdrawn (no decision), 16.11.2017

17/3725M – Non material amendment relating to 16/2314M, Approved, 09.08.2017

16/2314M - Outline planning permission is sought for a new office development (Use Class B1) and associated car parking, access improvements for vehicles and creation of new pedestrian and cycle routes to the site and enhancement of existing and provision of new landscaping. Approved 09.08.2016

15/3488M - Formation and laying out of permanent car park. Approved 29.10.2015

76234P – Land-raising with inert materials sourced from materials as unsuitable in the construction of the A34 Wilmslow to Handforth by-pass. Approved 25.02.1994

41761P - Tipping of material from adjoining site and land to be returned to pasture. Approved 11.06.1985

41807P – Tipping of material from adjoining site and land to be returned to pasture. Approved 25.07.1985

Requirements for LPS 54

The development of the Royal London site over the Local Plan Strategy period will be achieved through:

1. The retention of the existing Royal London Campus unless buildings become surplus to the requirements of existing occupiers, in which case the council will consider their suitability for reuse or redevelopment for a range of alternative uses;
2. The delivery of around 175 dwellings (around 80 on land to the east of the existing campus, around 20 to the north of the existing campus (92) and around 75 on land west of Alderley Road);
3. The provision of 5 ha of employment land for up to around 24,000 square metres of B1 employment space and a hotel;
4. Incorporation of green infrastructure and the provision of public open space at the southern end of the land west of Alderley Road;
5. Retention and extension of the existing Wilmslow High School playing fields for educational use in the area marked as protected open space on the map. This may include additional buildings for education use provided they do not harm the integrity of the open space overall;
6. Provision of at least 1 ha of land set aside for use as school playing fields within the land to the east of the existing campus, in addition to the areas marked as protected open space on the map, and an appropriate level of amenity open space and children's play space; and
7. Pedestrian and cycle links and associated infrastructure.

Site Specific Principles of Development

- a. Phased delivery on land to the east of the existing campus so that a serviced site for B1 employment uses is delivered in conjunction with the residential development.
- b. High quality design and appropriate landscaping/green infrastructure should be provided within the site in order to preserve the character of the area and ensure an acceptable relationship between residential and employment uses. The design must respect the site's location as a key entrance into Wilmslow.
- c. Provision of areas of open space within the scheme, including:

- i. A new public realm between existing and proposed employment uses, which will assist with the integration and provide an attractive setting for new development;
- ii. Land for additional playing fields accessible from Wilmslow High School; and
- iii. A new public open space at the southern end of land west of Alderley Road.
- d. Retention and enhancement of features within the site that are of amenity value, where feasible, specifically the mature wooded area to the west of the site, the brook, the ponds that are present, and the tree and hedge lined frontages to Alderley Road.
- e. Improved connectivity and access into the site to the wider local area (including Wilmslow Railway Station), through the provision of appropriate linkages.
- f. Provision of contributions to education and health infrastructure.
- g. Provision of affordable housing in line with the policy requirements set out in Policy SC 5 'Affordable Homes'.
- h. Respect for the setting of listed buildings on site including Fulshaw Hall.
- i. A detailed site-specific flood risk assessment should be prepared.
- j. A minimum of a Phase 1 Preliminary Risk Assessment for contaminated land should be carried out to demonstrate that the site is, or could be made, suitable for use should it be found to be contaminated. Further work, including a site investigation, may be required at a pre-planning stage, depending on the nature of the site.
- k. Retention of the existing Royal London Campus landscape setting.

By virtue of Section 38(6) of the Planning and Compulsory Purchase Act 2004, the application should be determined in accordance with the development plan unless material considerations indicate otherwise.

The Development Plan for Cheshire East currently comprises the saved policies from the Congleton Borough (January 2005), Crewe and Nantwich (February 2005) and Macclesfield Local Plan (January 2004).

The **Macclesfield Borough Local Plan** is the relevant plan in relation to this site.

Therefore the relevant Local Plan policies are considered to be:

Policy DC3: Amenity

Policy DC6: Circulation and Access

Policy DC7: Car Parking

Policy DC8: Landscaping

Policy DC9: Tree Protection

Policy DC13: Noise

Policy DC14: Noise

Policy DC15: Provision of Facilities

Policy DC17: Water Resources

Policy DC63: Contaminated Land

Policy DC64: Floodlighting

Policy NE14: Natural habitats

Policy NE11: Protection and enhancement of nature conservation interests

Policy NE17: Nature Conservation in Major Developments

Wilmslow Neighbourhood Plan – Referendum held 10th October post regulation 18.

National Policy:

The National Planning Policy Framework

CONSULTATIONS (External to planning)

Highways – No objection. The comments are considered in detail in the main body of the report.

Environmental Protection – No objections subject to conditions

Environment Agency - We have no objection in principle to the proposed development, subject to conditions.

PROW – Following consultation of the Definitive Map of Public Rights of Way The development does not appear to affect a public right of way.

Natural England – No objection - Based on the plans submitted, Natural England considers that the proposed development will not have likely significant effects on statutorily protected sites and has no objection to the proposed development.

United Utilities – No objections subject to conditions.

Cheshire Police – No specific comments to make.

Cheshire Archaeology - A comprehensive desk based assessment, prepared by Orion Heritage was submitted in support of the preceding application 16/2314M. It is concluded that based on the available evidence, the site has low potential for remains of all archaeological periods and no further archaeological work was required is still appropriate.

Cadent Gas – No objection subject to informative.

VIEWS OF THE TOWN COUNCIL

Wilmslow Town Council – Wilmslow Town Council recommend refusal of this application.

Wilmslow Town Council is concerned on a number of levels which should be addressed by any application of this scale on this site. The numbers of vehicles on the site as demonstrated by the application for 1100 additional parking bays would have a significant impact of Alderley Road and the Town Centre in terms of congestion, air pollution levels and road safety and the access to and from the site by car should be directly off the adjacent A34 to mitigate these issues.

Wilmslow Town Council is concerned that the proposals for the entire strategic site are coming forward piecemeal and is concerned that the plans to link in to existing foul drainage provision may be satisfactory when developments are looked at in isolation but may well not be when considered as a whole.

The recent history of flooding along Alderley Road would suggest that the Environment Agency Assessment of the flood risk requires revisiting and that the earlier point regarding sewerage capacity could be impacted by more frequent flooding events.

With regards to the proposed cycle provision the Town Council is concerned that Harefield Drive doesn't have the capacity to accommodate the proposed two-way cycle track.

The Town Council also noted that the permission granted over 3 years ago was granted by the Cheshire East Council's Northern Planning Committee on the basis of 'very special circumstances put forward by the applicant' and that it was 'the expectation of the Planning Committee at that time that the completed development would be occupied by Royal London'. Clearly the renewal is being requested at a time when these very special circumstances are no longer to be met.

Alderley Edge Parish Council - The Parish council has no objection to this application subject to conditions of:

Softening of visual approach to the scheme, improvement of approach to Whitehall bridge roundabout, toucan crossing on Pendleton Way.

REPRESENTATIONS

The Edge Association - The Edge Association of Alderley Edge recommends that there shall be no automatic renewal of the previous Applications concerning this site.

The application should be rejected until a complete strategic plan covering the infrastructure, service facilities, impact of the increased traffic and effects on the local environment of the application for this site development if it is accepted and also those of further applications which may follow if this is accepted.

The comments already raised by United Utilities illustrate the need of further information required before this application can be considered for acceptance. Far more consideration of the traffic plan is required in terms of vehicles, cyclists and pedestrians for the whole area round this traffic island and the surrounding roads.

This area already has a major traffic problem caused by issues not addressed when the bypass was conceived.

Clarity of how and who will be financing all of the road schemes, the infrastructure and services should be clear and available prior to consideration.

The road into the car park extends to the boundary. This would suggest there are plans for further planning applications into the green belt land are being considered. Therefore there should be a condition making a specific exclusion of this possibility to prevent the loss of further green belt land along the whole of Pendleton Way.

No plan has been submitted on how the impact on the area will be managed during the construction period.

Wilmslow Civic Trust -

This application is for the renewal of Application no. 16/2314 made in May 2016 and Approved on 09.08.2016. [No application form shown in documents submitted]

Section 1 of the approval notice states that all reserved matters be submitted within 18 months of the approval date and the development to start within 2 years from the approval date of the last reserved matter.

Also that any material change from this approval would require a new application.

Therefore the Wilmslow Civic Trust consider this approval to be out of date and with the changes to the layout to be materially different, requiring a new application, not a renewal of the existing.

Any new application made on the basis of or similar to 19/3420m must take into account the following.

- a. Latest Government Policies.
- b. Policies contained within the emerging Neighbourhood Plan.
- c. That the original permission was granted under 'Very special circumstances to enable 'Royal London' to accommodate their business expansion plans' this requirement no longer exists.
- d. The effect this development will have upon traffic volume in a worsening traffic situation which is rapidly reaching breaking point.
- e. The effect upon air pollution along Alderley Road and adjoining properties at a time when Government Policy Directives and commitment by Cheshire East Council is to control and reduce such development impact.
- f. The fact that Harefield Drive and area is unable to accommodate a two way cycle track.
- g. This development will exceed the need for or requirements of new office space since the approval in 2016.
- h. It is considered that the flood plain predictions are not realistic when local knowledge and experience indicates a much more severe situation.
- i. Whether the combined sewer in Alderley Road is capable of the extra outfall from the site.
- j. that the masterplan should cover all intended development to enable comprehensive consideration to be applied to the whole site, as one should expect from a proposal with such an impact upon Wilmslow.

14 letters of representation received

- The application is not a renewal, site area is significantly bigger.
- The proposal would compete with the Wilmslow town centre as it is speculative.
- The allocation of this site was to keep Royal London at the site.
- 1 year after approval of previous application, Royal London announced their move to Alderley Park
- The previous application was on the basis that the site would be occupied by Royal London.
- Proposed parking levels are higher than would be expected from equivalent office space in the Wilmslow Town Centre.

- The local policy environment is not materially different to that upon which the previous permission was granted.
- Lack of transparency of the documents prepared to remove Green Belt status.
- Compared to previous application, there will be lack of control over the companies.
- Wilmslow has almost zero unemployment, this will encourage commuting into Wilmslow, which will have an impact on traffic flows and air quality.
- Proposal does not reveal long term plan for the site
- No consent should be given until whole scheme is put forward
- Concerns over traffic, by foot and bicycle in the immediate area
- The use of Harefield Drive as a cycleway is impractical and dangerous
- No urgency in developing the site
- Impact on the town centre
- Already empty offices in Handforth Dean, do we need more?
- Proposal will not meet zero carbon objectives
- Need a masterplan to show all sites
- Lack of transparency in the application

Principle of development

The site is located within Wilmslow on the south east side. The site forms part of the wider LPS 54 strategic site, the allocation forms part of the Cheshire East Local Plan Strategy, formally adopted in July 2017. The site was originally within the Green Belt, however the allocation of the site removes the site from the Green Belt and the site is no longer afforded the protection provided by its former status.

The application proposes 17000sq.m of employment land, through B1 office space. The site forms part of the existing Royal London campus. However, Royal London has announced that

they are due to move from the site in 2020. Therefore the application is now a speculative one.

LPS 54 at point 1 states:

1. The retention of the existing Royal London Campus unless buildings become surplus to the requirements of existing occupiers, in which case the council will consider their suitability for reuse or redevelopment for a range of alternative uses.

Due to the move proposed by Royal London, the campus will no longer be theirs, however the existing buildings on the site are not affected by this proposal. Therefore the proposal meets this requirement.

Point 3 of LPS 54 states:

3. The provision of 5 ha of employment land for up to around 24,000 square metres of B1 employment space and a hotel;

This application will provide 17000 of the 24000sqm required by the allocation. Therefore makes a significant contribution to this aim, and ensures that the allocation is being proposed to be developed in an efficient way. This application is not the only parcel of land within the allocation as a whole. Therefore must make a significant contribution. The proposal does not provide for a hotel, therefore this must be delivered elsewhere on the site.

The proposals therefore make a significant contribution to the delivery of site LPS 54, and do not preclude other elements of the allocation from coming forward. Therefore the principle of development is acceptable.

The policy includes site specific requirements for development. A number of these relate to the residential element of the allocation, which is not proposed as part of this application. However requirements to retain the landscape setting of the Royal London campus and design requirements will not be adversely affected by the proposals. A number of the site specific details relate to matters that will form part of reserved matters applications. As this application is only for outline approval and details of access, it will be at reserved matters stage that the proposals are assessed against the site specific LPS 54 requirements.

The principle of development has been established at the site through the previous outline application that was approved. However this was approved prior to the adoption of the Cheshire East Local Plan Strategy, therefore the site was within the Green Belt and therefore was assessed in a different policy context. Notwithstanding the fact that the site is no longer within the Green Belt, the landscape context and setting as an edge of town site is important and the transition from rural to urban fringe must be a carefully designed one. This will be considered further at reserved matters stage but parameters will be set out as part of this application.

Therefore the proposal is acceptable in principle.

Economic Development

The proposal makes an important contribution to the Council's requirements to provide employment land - and in particular B1 development - in order to maintain a sustainable economy within Cheshire East. East Cheshire Chamber of Commerce has commented on the

application and is supportive of the application. As the application in accordance with the Council's vision for the site and would help realise a significant part of the employment aspect of the allocation. The provision of additional employment floorspace (allowing for the creation of new jobs) would equally be in line with the Cheshire East Council Economy Strategy.

The Chamber are of the view that additional supply of modern office accommodation, the demand for which is set out in the supporting statement by Colliers, is vital to enabling growth and prosperity in the Wilmslow area. It would help existing businesses in the area relocate to larger, more flexible accommodation and could also attract new businesses into the Borough.

Without new office space of this nature and scale the Chamber consider that businesses could find their ambitions restricted. Wilmslow is an engine for growth in East Cheshire and is identified by the Council as a key service centre. Cheshire East is one of the UK's most successful places with our economic performance consistently and significantly exceeding both the regional and national average.

The economic base in the Borough is diverse; principal contributions to GVA are production activities such as advanced manufacturing including automotive (4,000 jobs) and pharmaceuticals (3,000 jobs) and software development (1,250 jobs). The business density is high compared to the UK, North West and neighbouring authorities with 20,230 businesses within the Borough. More businesses are being created than closing and the number of jobs created continues to rise.

The office market is buoyant across the borough with the highest number of deals taking place in the north of the Borough dominated by Alderley Park. Rents are strong reflecting the demand for inward investment and business growth in Cheshire East and the low supply of land and premises, particularly of higher quality based on these levels of take up.

There are a number of key priorities related to this proposed development that are set out within the draft Cheshire East Council Economy Strategy (2019-2024):

- Grow the Cheshire East Economy to at least £15 billion
- Create an additional 7,000 jobs
- Build up to 11,000 new homes
- Be more productive than the UK average

A crucial area in relation to the above strategy is continuing to deliver a programme of promotional activity for key investment opportunities and employment sites to encourage and secure new investment from businesses looking to relocate.

The proposed development of 17,000sqm of new office development (Use Class B1) and up to 1,100 associated car parking spaces would provide a key new employment site that the borough would be able to promote to secure potential new inward investors and existing businesses that are looking to relocate.

Highways/Accessibility

A previous outline permission has been approved in application 16/2314M for a office development of 17,000sq.m. A requirement of this permission was that off-site highway improvements on Alderley Road be implemented prior to occupation of the office.

This is a similar application in that 17,000 Sq.m of office is proposed with up to 1,100 parking spaces with a revised masterplan submitted. The same access proposals to the site are submitted with this application with the main access from Alderley Road.

Since the approval of the previous application there have been no material changes in circumstances regarding the impact of the proposals on the local highway network. Committed development was previously included and although there is a site allocation adjacent to this development, this is not currently approved.

Therefore, the previously agreed mitigation measures on Alderley Road are still sufficient to address the traffic impact of this current application and should be secured by condition to be implemented via a S278 Agreement.

The development does not appear to affect a Public Right of Way recorded on the Definitive Map and Statement, the legal record of Public Rights of Way.

The accessibility of the site to pedestrians is important in regards to sustainability, the site is connected via the access road to the existing pedestrian network on Alderley Road that provides connectivity with Wilmslow. There are existing bus stops located on Alderley Road and are within a 400m walking distance of the site. In regard to providing convenient access to the Railway Station, a pedestrian/cycle route is being provided that links to Harefield Drive this then connects to other residential streets that have good footways and provides access to the station. It is considered that this route is a more convenient route and it is much less trafficked than the main Alderley Road. The Alderley Road widening scheme does include a shared footway and cycle facility that does link the southern site access with the cycle facilities on Pendleton Way.

Providing strategic connectivity is an important consideration and there is no pedestrian connectivity to the pedestrian route under the railway line. As this site abuts this facility, a footway/cycle connection from this facility to Alderley Road should be provided as it allows for linkages to other sites and routes

This a resubmission of a previous application and in regards to highways there are no material changes to the scheme, as such there are no objections to the application. A condition is required to secure the highway improvements and also as this is outline a condition is required for the submission of pedestrian/cycle routes to be agreed.

Detailed pedestrian and cycle links through the site will be provided at the reserved matters stage.

Heritage Assets

The site edged red sits within the setting of Fulshaw Hall and its former coach house and stables, both Grade II Listed Buildings, therefore, in assessing the application the council, in line with Sections 16(2) and 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 is to have special regard to the desirability of preserving listed buildings or their setting or any features of special architectural or historic interest which they possess.

Fulshaw Hall, a Former manor house Jacobean in style, now offices, constructed in 1684 for Samuel Finney. The building is imposing, with highly decorative architectural features, including Flemish bond plum brick with painted sandstone dressings, Kerridge stone-slate

roof and brick chimneys. The Fulshaw estate was sold to Samuel Finney in the 17th century who built the present house on the site of Shern Manor House, an earlier timber framed building. The land immediately around the hall, retains much the same character and space as is shown on historic OS plans, it largely open and landscape as would be expected with a Hall of status in this area, with extensive gardens to the north. The OS map shows a number of lodges and outbuildings, these are also listed by virtue of curtilage to the Hall; there are 4 buildings in total, two lodges and two outbuildings.

Since the previous outline consent determined in August 2016 Royal London House was assessed for statutorily listing by Historic England, the building was considered not to possess sufficient architectural and historic interest in the national context to merit listing, however, it was identified as having local interest and is considered a non designated heritage asset. The Royal London House designed by BDP architects in 1985, is a significant part of the site and a good local example of a post-war Greenfield Headquarters complex, a concept which integrates a status building with carefully designed landscape.

The site allocation LPS 54 does make reference to the retention of the Royal London campus landscape setting.

The Hall does not sit within the Wilmslow 3 Parks SPG, but the land shown with the site edged blue to the west of Alderley Road, is with the boundary of Fulshaw Park SPG as identified in the LPS 54 commentary, therefore the policy guidance within this document should be applied. There are 3 locally listed buildings sit to the boundary of the site.

The allocation within the LPS 54, sits at varying degrees within the historic curtilage of the listed buildings, the red line of this application is an established piece of open land, which historically development of the land has the potential to impact on the setting of the Hall at the reserved matters stages when the detail of the development is available. The principle of development and the impact this will have was considered through the allocation of LPS 54, therefore, until the reserved matters stages when further consideration can be given to the detailed scheme, the application for outline consent is therefore considered to be acceptable in the context of the statutory duty. When the detailed submission is received this can then be appropriately applied to the historic context in which the site sits.

Cheshire Archaeology has raised no objections to the proposals.

Landscape Impact

The application includes a Landscape and Visual Impact Assessment carried out by Tyler Grange landscape consultants in accordance with the Guidelines for Landscape and Visual Impact Assessment 3rd edition 2013 (GLVIA3). This is Chapter 9 of the EIA. The study area covers approximately a 4Km radius around the site.

In accordance with the guidelines the landscape and visual effects are considered separately:

Landscape Assessment

The landscape assessment is based on National Character Area 61 (NCA 61) Shropshire, Cheshire and Staffordshire Plain, and the Cheshire Landscape Character Assessment 2008 (CLA 2008). The assessment also refers to the Cheshire East Landscape Character Assessment 2018 (CELCA 2018) which is currently a supporting document for Part II of the Local Plan. In the LCA 2008 the site lies within the Lower Farms and Woods Landscape

Character Type and the Chonar Landscape Character Area whereas in the CELCA 2018 the site is within the Wilmslow urban area because it's now part of Local Plan Strategy site - LPS 54.

Visual Assessment

In order to determine the extent of potential views of the site a computer generated Zone of Theoretical Visibility (ZVT) was created – refer to fig 9.3 This does not take in to account the screening effect of built form, trees and other vegetation.

Twelve visual receptor groups were considered to have the potential of experiencing significant effects as a result of the development.

Moderate and major adverse effects are considered to be significant.

The application proposals include the following 'embedded' mitigation:

- The maximum height of future development will be restricted to 95m AOD
- Existing trees will be retained where possible
- A landscape buffer will wrap around the northern, eastern and part of the southern site boundaries.

During the operational phase of the development effects were assessed as negligible for Chonar LCA and TCA 2. And minor adverse for key the landscape features.

The assessment found that there would be no significant visual effects arising from the completed operational development.

Minor adverse effects are predicted for residents off Harefield Drive, Whitehall Close and Harefield Farm and people travelling along the railway line.

Negligible effects were predicted for all other receptors.

The assessment found that no landscape or visual effects would be considered significant. Furthermore, as the proposed landscape buffer matures the visual effects on the residents off Harefield Drive, Whitehall Close and Harefield Farm and people travelling along the railway line would reduce from minor adverse to negligible in the long-term.

The landscape officer has commented that at the maximum height parameter the top of the building would be around 16 metres higher than the railway embankment. It is therefore recommended that the reserved matters application should include a further visual appraisal and visualisations to illustrate visual effects of the location, height, mass and scale of the proposed buildings in the landscape. The height of the proposed buildings should ideally be as low as possible to minimise visual impacts. A number of conditions have been recommended.

Trees

As part of the revised proposals the Arboricultural Impact Assessment identifies further tree removals in addition to those identified under the previous outline approval (para 2.5)

These losses include:-

A mature Oak (T9) to accommodate the revised parking area. The tree is identified as a Category C tree in para 2.5 but shown as a Category B1 tree in the Survey Schedule

A 25 metre section of a Moderate (B) category group of early mature Scots Pine, Sycamore, Ash, Hawthorn, Silver Birch, Horse Chestnut and Oak (G7) to accommodate the repositioning of the proposed roundabout and main access road.

The removal of 7 trees to accommodate the proposed pedestrian/cycle route comprise of 2 low (C) category trees within G47 (Sycamore/Ash); 1 moderate (B) category Silver Birch with G50; 2 low (C) category Japanese Cedar within G51 and 1 moderate (B) category tree within G53

The Arboricultural Assessment confirms the retention of 4 High (A) category trees within Group G9 which were proposed for removal under the previous application. Only one low (C) category tree is now proposed for removal within this group and a short section of low value hedgerow to accommodate the revised parking area and access

The Assessment also identifies some proposed pruning works to trees to allow access for the pedestrian walkway/cycle path and internal access road. The proposed works essentially comprise of crown lifting to achieve adequate clearances and are within the requirements of best practice.

The majority of the works include the removal of existing hard standing within Root Protections Areas and some minor encroachment and the proposed footway/cycleway. It is agreed that the works can be carried out in accordance with a detailed Method Statement and use of 'no dig' engineering construction.

The arboricultural officer has raised no objections subject to conditions for details of a tree protection scheme, construction specification/method statement and arboricultural method statement.

Ecology

Woodland

The proposed development will result in the loss of an area of plantation woodland of local value. The revised ecological assessment anticipates a loss of 0.3ha of plantation woodland as a result of the development. Macclesfield Local Plan policy NE7 seeks to protect woodlands.

It is advised that in accordance with the mitigation hierarchy loss of woodland associated with the development should firstly be avoided. If the loss of these areas of woodland is considered unavoidable it must then be ensured that suitable replacement woodland planting and/or enhancement of the existing woodland is provided to compensate for this loss. Due to the length of time it takes for woodland to mature a significantly greater area of woodland planting will be required to compensate for the temporal loss of habitat that will occur as the planting matures. It is recommended that the applicant utilises the Defra offsetting metric

methodology as a means of calculating a suitable area of replacement habitat (this is discussed further below).

As with the earlier application at this site an area of habitat creation is proposed adjacent to the railway line. The areas of proposed habitat creation are however located outside of the red line of the application. Consideration must therefore be given to how the implementation of this off-site habitat creation can be secured in the event that outline planning permission is granted.

Pond

No ponds are to be lost as a result of the proposed development. New ponds are however shown on the illustrative master plan and the enhancement of two off-site ponds is proposed as part of the proposed ecological mitigation. As the two ponds are located outside of the red line of the application, consideration must be given to how the implementation of this off-site habitat management can be secured in the event that outline planning permission is granted.

Hedgerows

Hedgerows are a priority habitat and hence a material consideration. The proposed development is likely to result in the loss of a 20m section of hedgerow to facilitate the site access. It must be ensured at the reserved matters detailed design stage that suitable compensatory replacement planting is provided to address this loss. This can be dealt with by means of a condition for an ecological mitigation and enhancement strategy.

Water courses

The proposed development will result in the culverting of a section of Whitehall Brook and the culverting or bridging of a ditch on site. It must be ensured at the reserved matters stage that any culverts or bridges are designed so as to minimise the impacts of these works on wildlife. If planning consent is granted it is recommended that a condition be attached requiring detailed designs for all bridges and culverts to be submitted with the relevant reserved matters application.

Bats

The level of bat activity recorded on site during the previous surveys on site appeared to be relatively low.

The ES refers to two trees on site with potential to support roosting bats (tree T9 and G9a) and recommends that further surveys of these trees are undertaken. Confirmation has been received from the applicant's ecologist that surveys of these trees has been undertaken and no evidence of roosting bats recorded. Roosting bats are therefore not likely to be affected by the proposed development.

Area of habitat supporting bat activity are however likely to be affected by the proposed development. The potential impacts of this will be localised, but the level of impact will to large extent depend on whether any lighting of the car parks is required and the hours of operation of any lighting.

It is recommended that a condition be attached requiring any lighting strategy for the car parks to be agreed with the LPA as part of any future reserved matters application.

Hedgehog

This priority species was previously recorded on the application site. The landscaped buffers around the site will assist in facilitating the movement of this species through the site. To ensure any losses of habitat for this species are compensated for it must be ensured that any hedgerows, woodland etc lost are adequately replaced as part of the ecological mitigation strategy for the scheme.

Polecat and Brown Hare

These two priority species, which are a material consideration, have been recorded in the broad locality of the application site. It is advised that the proposed development may have a minor adverse impact on these species due to the loss of habitat. This impact can be compensated for through the creation of compensatory habitats as part of the scheme.

Common Toad

This species was recorded on site during reptile surveys. As with hedgehogs, to ensure any impacts on this species are adequately addressed it must be ensured that sufficient replacement habitat is provided as part of the detailed design of the scheme. The provision of an additional pond on site as shown on the illustrative layout would be beneficial for this species.

Badgers

Badgers are known to be present in this locality, but no evidence of a sett being present was recorded. If planning consent is granted it is recommended that a condition be attached requiring an updated badger survey to be submitted with reserved matters application.

Birds

A number of widespread species have been recorded as breeding on site. Whilst the site does not appear to be particularly important for birds, it should be ensured that any suitable habitat (trees, woodland, hedgerows etc.) lost is suitable replaced at the detailed design stage.

Ecological Mitigation and enhancement

An outline ecological mitigation strategy, including the provision of additional ponds and offsite habitat creation, is provided as part of the submitted Environmental Statement.

This planning application also provides an opportunity to incorporate features, such as bat and bird boxes, and features for hedgehogs etc. to increase the biodiversity value of the final development in accordance with Local Plan Policy SE 3.

If planning consent is granted a condition should be attached which requires the submission of an ecological mitigation and enhancement strategy with each reserved matters application. Along with a condition to ensure the submission of a 25 year habitat management plan with each reserved matters application. The condition should also secure the implementation of the submitted management plan.

Biodiversity Net gain

Local Plan Policy SE 3(5) requires all developments to aim to positively contribute to the conservation of biodiversity. It is recommended the applicant undertakes and submits an

assessment of the residual ecological impacts of the proposed development using the Defra biodiversity offsetting 'metric' methodology.

An assessment of this type would both quantify the residual impacts of the development (after identified potential impacts have been avoided, mitigated and compensated for in accordance with the mitigation hierarchy) and calculate in 'units' whether the proposed development would deliver a net gain or loss for biodiversity.

Amenity

In order for the proposals to be acceptable, it is important that they do not have a detrimental impact on the amenities of existing residents and that the development is not located within an area which would harm the amenities of future residents, or the proposals would not cause undue harm by overlooking, loss of light or loss of privacy to neighbouring residents. The proposal does not affect any neighbouring properties, however it is important that the proposal does not affect the community or the future users of the site.

Air Quality

Policy SE12 of the Local Plan states that the Council will seek to ensure all development is located and designed so as not to result in a harmful or cumulative impact upon air quality. This is in accordance with paragraph 181 of the NPPF and the Government's Air Quality Strategy.

When assessing the impact of a development on Local Air Quality, this office has regard to (amongst other things) the Council's Air Quality Strategy, the Air Quality Action Plan, Local Monitoring Data and the EPUK Guidance "Land Use Planning & Development Control: Planning for Air Quality January 2017)

This is a proposal for an office development of up to 17,000 sq. m including up to 1,100 parking spaces. Air quality impacts have been considered within the air quality assessment submitted in support of the application by Royal London Mutual Insurance Society Ltd. The report considers whether the development will result in increased exposure to airborne pollutants, particularly as a result of additional traffic and changes to traffic flows. The assessment uses ADMS Roads to model NO₂, PM₁₀ and PM_{2.5} impacts from additional traffic associated with this development and the cumulative impact of committed development within the area.

A number of modelled scenarios have been considered within the assessment. These were:

- Scenario 1: 2018 Model Verification;
- Scenario 2: 2019 Base Year;
- Scenario 3: 2023 Completion Year 'without development'; and
- Scenario 4: 2023 Completion Year 'with development'.

The assessment concludes that the impact of the future development on the chosen receptors will be not significant with regards to NO₂, PM₁₀ and PM_{2.5} concentrations. None of the receptors are predicted to experience greater than a 1% increase relative to the AQAL. A sensitivity analysis has also been undertaken which makes the assumption that real world driving emissions will not reduce as much as predicted over the coming years. This can be

taken as a “worst case scenario” assessment and the results of this also show that the impacts on the receptors are predicted to be not significant.

That being said there is a need for the Local Planning Authority to consider the cumulative impact of a large number of developments in a particular area. In particular, the impact of transport related emissions on Local Air Quality. Taking into account the uncertainties with modelling, the impacts of the development could be significantly worse than predicted.

Poor air quality is detrimental to the health and wellbeing of the public and also has a negative impact on the quality of life for sensitive individuals. It is therefore considered appropriate that mitigation should be sought in the form of direct measures to reduce the adverse air quality impact. The report also states that the developer should implement an adequate construction dust control plan to protect sensitive receptors from impacts during this stage of the proposal. Therefore measures to protect ensure air quality impact is mitigated will be secured by condition.

Contaminated Land

A further desk study report, RoC Consulting Phase 1 Desk Top Study (May 2019) has been submitted to that of 16/2314M. The report recommends that (further) site investigation works be carried out.

There are two historic landfills on site. The report is not able to confirm whether the Permit for Alderley Road Landfill has been surrendered. It is understood that the Whitehall Landfill site was a licensed landfill site. Environment Agency records show that two historic landfills are present extending onto the southern, eastern and central portions of the subject site. Off-site sources of potential contamination include a railway embankment and the formerly licenced Brick Hill Farm Landfill to the east.

The report states that intrusive site investigation has been carried out on the northern half of the site but due to access constraints the southern half of the site has not been investigated. The site investigation data such as borehole logs and laboratory testing certificates for chemical testing have not been presented with the report. A Site investigation of the southern half of the site will be required.

The previous use of the proposed development site as inert landfill presents a ‘medium risk’ of contamination that could be mobilised during construction to pollute controlled waters. Controlled waters are particularly sensitive in this location because the proposed development site is:

- ☐ within 50 metres of Whitehall Brook.
- ☐ located upon a principal aquifer

The application’s Phase 1 desk top study demonstrates that it will be possible to manage the risks posed to controlled waters by this development. However, further detailed information will however be required before built development is undertaken for both the northern and southern sections of the site. The EA consider that it would place an unreasonable burden on the developer to ask for more detailed information prior to the granting of planning permission. Therefore conditions have been recommended.

There are no objections to the proposal on the ground of noise /vibration and dust subject to conditions being applied to any approval. Environmental Health has considered the noise and vibration assessment submitted with the application and has accepted the findings of the report. Any noise sensitive receptors are a sufficient distance from the proposed B1 development.

Therefore the proposals accord with policies in the development plan and the NPPF.

Flood Risk

The site is a greenfield site and to ensure that flooding is not caused by the development, run-off rates must not exceed the current greenfield levels. A Flood Risk Assessment was submitted with the application, which concludes the following:

The vast majority of the site is located within Flood Zone 1, indicating that the site is not at risk from fluvial or tidal sources. A small area of the site along its southern boundary around Mobberley Brook is within flood zones 2 and 3 which means that part of the site are at medium or high risk of flooding. This area does not impact upon the site of the office building itself. Data obtained from the Strategic Flood Risk Assessment (SFRA) also places the site at low risk of flooding from other sources. In accordance with NPPF and local policy, this FRA has considered the impact on the surface water regime in the area should development occur.

The Environment Agency has commented and that they have no objections in principle to the proposals, that the site is a sensitive area with respect to controlled waters. The western arms of the site are overlain by alluvium (Secondary A aquifer) and the remainder of the site appears to be overlain by Till (Secondary Undifferentiated). The site is underlain by Wilmslow Sandstone, a Principal Aquifer. The Environment Agency has recommended conditions with regard to this.

United Utilities has commented on the application and raised no objections to the proposals. No objections have been raised in relation to flooding and drainage subject to suitably worded conditions.

It is concluded therefore that the proposals accord with policy SE13 of the CELPS and the NPPF.

Representations

A number of representations have been received in relation to the application. Many of the objections have raised issues with highways matters, such as congestion, air quality as a result of vehicle pollution and the cycle way. These matters have been taken into account by the highways officer and environmental health officers, and based on the information provided with the application they have no objections to the proposals.

Further objections have been raised with regard to the nature of the application and the procedure with which it has been submitted. A number of local residents have commented on the fact that this has been submitted as an outline only, so the detail is not available. However the mechanism of submission of an outline application is well established within the planning system in order to give consideration to the principle of development and in this case, details

of access. This is especially common in applications such as this where no end user is identified, as it is not known at this stage what the end users' requirements will be.

Representations have been made stating that this application is not a renewal, despite being described as this. The application is not identical to the previously approved application. The area of ownership is slightly larger; however the red line remains the same. The illustrative masterplan is also different. However, it is not considered that the title is misleading, as the reserved matter of access has the same detail and the quantum of development proposed remains as previously approved. In any event, the application has been assessed against current local plan policies, and has been supported with up-to-date information.

Representations have also been received in the lack of requirement for office development in Wilmslow, and the impact this development will have on Wilmslow Town Centre. As part of the local plan process, the site has been allocated for employment development. The evidence provided by Cheshire East has demonstrated a need for B1 employment land to be provided, and forms an important part of delivering the objectives of the CELPS. With regard to the site affecting the town centre, the site is of a large scale which will attract businesses with large workforces, in order to be able to make use of the offices. This scale of office development is significant, and generally sites such as this meet differing needs to those businesses requiring smaller town centre locations. Therefore it is not considered that this development would be in direct competition with office space in the town. This matter will have been considered as part of the local plan process when the site was allocated.

Comments relating to this scheme and its merits have been addressed in the main body of the report. Having taken into account all of the representations received including internal and external consultation responses, the material considerations raised have been addressed within the main body of the report.

Paragraph 11 of the NPPF states that development that accords with an up-to-date development plan should be approved without delay.

CONCLUSIONS

The site forms part of the strategic allocation LPS 54 contained within the Cheshire East Local Plan. The application proposes to provide 17000sq.m of employment space to contribute to the allocation at the site. The site will provide B1 office use and associated infrastructure which includes access.

The proposal is in outline form, therefore at this stage an illustrative masterplan showing car parking and positioning of buildings and parameters are included. The proposed parameters are considered to be acceptable as a vital landscape buffer will be maintained. The building heights do not exceed those in the parameters of the previously approved scheme albeit, more buildings are proposed. The proposal is considered to be acceptable and policy compliant, however this is subject to a large number of conditions required to ensure at the reserved matters stage all technical requirements are met.

The proposed development is required to ensure a sustainable economic position locally, to provide employment, and would be in line with the Cheshire East Economy Strategy.

No objections have been raised by consultees in relation to technical matters, for the reasons mentioned the application is recommended for approval subject to conditions.

RECOMMENDATION

Approve subject to the following conditions:

1. Time Limit
2. Development in accord with approved plan
3. Submission of reserved matters
4. Tree protection scheme
5. Construction Specification/Method Statement for trees
6. Arboricultural Method Statement
7. As part of reserved matters application Existing and proposed levels, contours and cross sections
8. Visual appraisal and/or visualisations from agreed viewpoints.
9. As part of reserved matters landscape masterplan plus full hard and soft landscape details and boundary treatments for the employment area, the landscape buffer zone and the Alderley Road frontage.
10. Landscape implementation and 5 year replacement
11. A phasing plan for the implementation of landscape works, ideally with advance planting of screen buffers where feasible.
12. A long-term (25 year) Landscape and Habitat Management Plan to ensure existing and proposed trees and woodland provide long-term screening and enhancement, and other habitats are properly managed.
13. Access available for use before occupation
14. Details of pedestrian/cycle routes
15. Limitation on use (B1) removal of permitted development class I Part 3 (change to B8)
16. Site investigation/remediation strategy
17. Verification Plan – completion of remediation
18. Low emission boilers to be installed
19. Electric Vehicle Charging Points 5% new parking rapid charging.
20. Details of new sound sources, details to be submitted.
21. Noise impact assessment to be carried out
22. Importation of soil

23. Unexpected contamination
24. Refuse storage facilities to be approved
25. Details of cycle storage/parking
25. 12 months to submit reserved matters
26. Submission of materials
27. Travel Plan
28. Ecological mitigation and enhancement strategy
29. Details of lighting
30. Submission of detailed design of any bridges and culverts with reserved matters application.
31. Submission of Ecological Mitigation and enhancement strategy with each reserved matters application.
32. Updated badger survey and mitigation measures to be submitted with each reserved matters application.
33. Submission and implementation of 25 year habitat management plan with reserved matters application.
34. Drainage Scheme
35. Foul and surface water to be drained on separate systems
36. Restriction of floorspace to 17,000 square metres

In the event of any changes being needed to the wording of the Board's decision (such as to delete, vary or add Conditions/informatives/planning obligations or reasons for approval/refusal) prior to the decision being issued, the Acting Head of Planning has delegated authority to do so in consultation with the Chairman of the Strategic Planning Board, provided that the changes do not exceed the substantive nature of the Board's decision.
