

## **SOUTHERN PLANNING COMMITTEE – 30<sup>TH</sup> JULY 2025**

### **UPDATE TO AGENDA**

#### **APPLICATION NO.**

**25/2024/PIP**

#### **LOCATION**

*Land off Bridge Street, Wybunbury*

#### **UPDATE PREPARED**

#### **Officer comment**

The housing land supply position for this application is updated as follows.

The Cheshire East Local Plan Strategy was adopted on the 27<sup>th</sup> July 2017 and forms part of the statutory development plan. The plan sets out the overall strategy for the pattern, scale and quality of development, and makes sufficient provision for housing (36,000 new dwellings over the plan period, equating to 1,800 dwellings per annum) in order to meet the objectively assessed needs of the area.

As the plan is more than five years old, deliverable housing land supply is measured using the local housing need figure (plus 5% buffer), which is currently 2,603 dwellings per year rather than the LPS figure of 1,800 dwellings per year.

The National Planning Policy Framework (NPPF) identifies the circumstances in which relevant development plan policies should be considered out-of-date. These include:

- Where a local planning authority cannot demonstrate a five year supply of deliverable housing sites (with appropriate buffer) or:
- Where the Housing Delivery Test Measurement indicates that the delivery of housing was substantially below (less than 75% of) the housing required over the previous three years.

In accordance with the NPPF, the council produces an annual update of housing delivery and housing land supply. The council's most recent Housing Monitoring Update (base date 31 March 2024) was published in April 2025. The published report identifies a deliverable five-year housing land supply of 10,011 dwellings which equates to a 3.8-year supply measured against the five year local housing need figure of 13,015 dwellings.

The 2023 Housing Delivery Test Result was published by the Department for Levelling Up, Housing & Communities on the 12 December 2024 and this confirms a Housing Delivery Test Result of 262%. Housing delivery over the

past three years (7,392 dwellings) has exceeded the number of homes required (2,820). The publication of the HDT result affirms that the appropriate buffer to be applied to the calculation of housing land supply in Cheshire East is 5%.

In the context of five-year housing land supply, relevant policies concerning the supply of housing should be considered out-of-date and consequently the 'tilted balance' at paragraph 11 of the NPPF is engaged.

### **Recommendation**

**No change to the recommendation.**
