

Appendix 3

Call In of the Cabinet Decision taken 1st July 2014

Title of agenda item/report: Dementia Commissioning Plan item 10 agenda pages 87 to 98

Reason for Call In

That there has been no consultation with the community, carers and users of the service.

Response

No consultation is required in relation to this report. The report seeks support for the strategic direction of travel for Dementia support. This report does not contain any request for a decision to cease any existing provision, thus no consultation is required. As the strategy is implemented there may be a requirement to consult with users and carers on certain aspects. As and when these are identified we will carry out an appropriate consultation. The results of any consultation would need to be taken into account as part of any implementation decisions.

Reason for Call In

That the process for the commissioning of the service on the CHEST system was put out on to the system the 26th June 2014 before the Cabinet decision on the 1st July 2014.

Response

It appears that there is a misunderstanding of what was put on the CHEST in June 2014. The publication of a Request for Quotes placed on the CHEST in June 2014 was in relation to the Mountview decision taken on 24th June 2013, it was not in any way related to this report to cabinet of 1st July 2014.
