Section 1: Introduction

In 2018, Cheshire East Council began a Community Governance Review of all the parishes within the Borough area. The Review relates to the whole of the Borough and has considered changes to parish areas and parish electoral arrangements across the Borough. These changes include: the alteration, merging, creation and abolishing of parishes; the naming of parishes; and the adoption of an alternative style for new parishes. They also include changes to the electoral arrangements for parishes (the ordinary year of election; the council size; the number of councillors to be elected to the council, and whether to divide the parishes into wards for the purposes of elections).

Following a period of extensive evidence-gathering, analysis and a public consultation on its Draft Recommendations, the Borough Council has now published its Final Recommendations.

This 'Final Recommendations Maps Report' contains maps that show the recommended changes (where there are any) to parish and parish ward boundaries.

An overview of the Final Recommendations can be found in the accompanying 'Final Recommendations Summary Report'.

To provide some overall context, Map 1.1 shows the current parish boundaries for all 142 parishes within the Borough.

Section 2 shows the Final Recommendations' changes (where there are any) to these parish boundaries and to parish ward boundaries. Each of the maps in this section of the Maps Report has a unique reference number. These same map reference numbers are cited in the relevant part of the Summary Report's recommendations table (Section 4 of the Summary Report), so that the location and extent of any recommended boundary changes affecting a particular council, parish or parish ward can be fully understood.

Besides the Summary Report and Maps report, the Borough Council has published a 'Final Recommendations Assessment Report', which sets out in detail the evidence and analysis on which the Final Recommendations are based, and which explains the reasoning behind each recommendation. This document includes, among other things, analysis and interpretation of the evidence submitted during the consultation stage of the Review. It also includes details of the data and calculations used to forecast changes in elector numbers and to estimate the numbers of electors who would be affected by the recommended governance changes.
